IDB Invest’s Environmental and Social (E&S) Review Process

**Client Engagement**
The Client receives a copy of the IDB Invest Environmental and Social Sustainability Policy, which establishes the E&S commitment and requirements for all operations and describes the approach for E&S risk management and opportunities. The Policy is underpinned by the IFC Performance Standards on Environmental and Social Sustainability, a widely accepted standard in the international finance community establishing Client requirements. These include:

- Performance Standard 1: Assessment and Management of Environmental and Social Risks and Impacts
- Performance Standard 2: Labor and Working Conditions
- Performance Standard 3: Resource Efficiency and Pollution Prevention
- Performance Standard 4: Community Health Safety and Security
- Performance Standard 5: Land Acquisition and Involuntary Resettlement
- Performance Standard 6: Biodiversity Conservation and Sustainable Management of Living Natural Resources
- Performance Standard 7: Indigenous Peoples
- Performance Standard 8: Cultural Heritage

**Environmental and Social (E&S) Appraisal**
IDB Invest E&S Team conducts its due diligence (ESDD) process, which includes:
- Obtaining information about the Client’s assets and management of E&S risks and impacts;
- Assigning a project categorization based on E&S risk;
- Conducting a site visit to the project’s area of influence and meetings with company and relevant stakeholders to discuss project E&S aspects, unless project is low risk;
- Assessing the project against IDB Invest Sustainability Policy requirements; and
- Preparing an E&S Review Summary (ESRS) describing the project’s key impacts and mitigation measures and E&S Action Plan (ESAP) listing the actions required by the Client to reach compliance with IDB Invest E&S requirements.

**Consultation and Disclosure**
IDB Invest publicly discloses on its website the Investment Summary, ESRS and ESAP 30 days prior to IDB Invest Board approval. For high risk projects, the Client’s E&S information is disclosed earlier in the process. The Client is expected to engage in stakeholder consultation commensurate to the level of project E&S risk, disclose relevant E&S information locally in the project area and maintain an ongoing dialogue with project-affected communities for project life.

**Financial Closure and Disbursement**
The legal agreement includes standard E&S conditions and specific ESAP requirements tied to specific milestones. Prior to each disbursement, IDB Invest verifies E&S conditions and ESAP requirements for compliance.

**Supervision Monitoring**
The IDB Invest E&S Team supervises the Client’s compliance with the E&S requirements and ESAP conditions on a regular basis. The Client produces an E&S Compliance Report (ESCR) annually on the status of the ESAP.

**Dialogue**
IDB Invest’s Disclosure of Information Policy specifies the release of corporate information to the public and reaffirms its commitment to transparency and accountability in all its activities. Project-related queries are best addressed through the Client’s grievance mechanism. The project information and Client’s contact is posted on IDB Invest website www.idbinvest.org/en/projects or contact divulgacionpublica@adb.org
The Business Case for Environmental and Social (E&S) Risk Management

Businesses that implement sustainable practices and manage environmental and social risks responsibly are more likely to succeed.

IMPROVES FINANCIAL AND OPERATIONAL PERFORMANCE
- Optimizations in resource management, working conditions and corporate governance translate in cost savings and higher ROI.
- The amount a portfolio of companies with strong ESG scores tends to outperform its benchmark.

MINIMIZES LOSS
- Early E&S considerations in investment decisions increase project resilience to the effects of climate change and reduce the risk of loss.
- The estimated price tag on the financial cost of climate change.

$54 - 69 TRILLION

PROTECTS BRAND VALUE AND REPUTATION
- Good E&S performance by companies boosts their reputation and brand value.
- In brand value when companies implement ESG practices.

MAINTAINS A SOCIAL LICENSE TO OPERATE
- Establishing constructive relationships, managing community impacts and promoting local benefits prevent opposition, generate support and maximize ROI.
- Amount companies can save by avoiding social conflicts in infrastructure projects.

$20 MILLION/Week

ATTRACTS INVESTMENT
- Adhering to internationally recognized ESG criteria provides a seal of approval on sustainability and attracts new funding.
- Amount that ESG assets under management have grown in last two years in US.
