**INFORMATION
STATEMENT**

Information Statement

Inter-American Investment Corporation

The Inter-American Investment Corporation (IDB Invest) intends from time to time to issue its debt securities with maturities and on terms based on market conditions at the time of sale. The debt securities may be sold to dealers or underwriters, who may resell them in public offerings or otherwise, or they may be sold by IDB Invest directly or through agents. The terms, conditions and other details of debt securities being offered at any particular time will be set forth in a prospectus and various incorporated or supplemental documents thereto. Unless otherwise stated, all information in this annual Information Statement is provided as of December 10, 2021, and all amounts are expressed in United States dollars.

AVAILABILITY OF INFORMATION

IDB Invest will provide, upon request, copies of this Information Statement without charge. Written, or e-mail requests should be directed to the principal office of IDB Invest at 1350 New York Avenue, N.W., Washington, D.C. 20577, Attention: InvestorRelationsIDBInvest@iadb.org.

The Information Statement is also available on the IDB Invest's website at <https://www.idbinvest.org/en/investors>. Other documents and information on this website are not intended to be incorporated by reference in this Information Statement.

Recipients of this Information Statement should retain it for future reference, since it is intended that each prospectus and any supplemental Information Statement issued after the date hereof will refer to this Information Statement for a description of the IDB Invest and its financial condition, until a subsequent Information Statement is issued.

Overview

IDB Invest is an international organization established in 1986 pursuant to the Agreement Establishing the Inter-American Investment Corporation (the Establishing Agreement or Agreement) and began operations in 1989. IDB Invest is owned by its member countries, including 26 regional developing countries of Latin America and the Caribbean (the Regional Developing Member Countries), and 21 countries outside of Latin America and the Caribbean. IDB Invest is a member of the Inter-American Development Bank Group (the IDB Group or IDBG), but is a legal entity separate and distinct from the Inter-American Development Bank (the IDB) and the Multilateral Investment Fund (commercially known as IDB Lab) with a separate governance structure, including a separate Board of Governors and Board of Executive Directors, and its own share capital, financial structure, management, and staff.

On March 30, 2015, the Boards of Governors of IDB Invest and the IDB approved the transfer to IDB Invest of all operational and administrative functions associated with the IDB private sector and non-sovereign guaranteed (NSG) activities (the IDBG Private Sector Reform) to better serve Latin America and the Caribbean (the Region), clients and partners, and to maximize developmental impact. The IDBG Private Sector Reform was effective on January 1, 2016.

As a member of the IDB Group, IDB Invest's mission is to support and encourage the establishment, expansion, and modernization of private and state-owned enterprises in the Region that do not benefit from a sovereign guarantee by partnering with the private sector to support projects that aim to bolster competitiveness and growth while maintaining sustainability, helping to overcome core challenges to growth, refine business strategies, and embrace new technologies to improve productivity.

IDB Invest provides financing in the form of loans, guarantees, equity and investments in debt and securities, and arranges additional project funding from other investors and lenders, i.e., through joint financing, through loan syndications, loan participations and guarantees. In addition, IDB Invest provides financial and technical advisory services to clients. IDB Invest aims to finance projects that offer profitable investment opportunities and sustainable economic and social development. The objectives of these investments include job creation and broadening capital ownership, which facilitate transfers of resources and technology to projects whose goal is to promote economic growth and sustainability. Further examples of projects that are eligible for IDB Invest funding are those that generate foreign exchange income or promote economic integration across countries in Latin America and the Caribbean.

IDB Invest assesses the potential environmental, social, and corporate governance (ESG) risks and impacts of all projects it finances, including an assessment of compliance with host country laws and regulations, and the requirements specified in the IDB Invest Environmental and Social Sustainability Policy, the IFC Performance Standards, and the World Bank/Environmental, Health and Safety (EHS) Guidelines.

The financial highlights, financial results, and financial statements in this Information Statement include IDB Invest amounts only, however, the operational amounts and discussions refer to the combined NSG portfolio of IDB Invest and the IDB for the purposes of this Information Statement.

COVID-19 Pandemic

During 2020, Latin America and the Caribbean were at the epicenter of the global crisis caused by the COVID-19 pandemic. Adding to the devastating toll of lives and livelihoods lost, no other region in the world suffered a sharper drop in GDP, a setback that risks erasing the social and economic gains made in the Region over the previous decade.

As the COVID-19 pandemic unfolded, the IDB Invest Board of Executive Directors approved Management's COVID-19 Operational Response in April 2020 and the 2021 Update to the Plan of Operations in March 2021. The COVID-19 Operational Response was guided by two broad criteria: to protect and alleviate by targeting the immediate effects of the crisis; and to help reignite economies aiming at the medium- to long-term effects of the crisis. IDB Invest increased its lending capacity to \$7 billion in financing, which included an additional \$500 million in long-term investments and \$2 billion in trade finance operations versus original business plan projections for 2020, to support new and existing

clients who experience short-term financial or operational issues as a result of the COVID-19 pandemic and economic downturn. The goal was to finance interventions that alleviate healthcare constraints, maintain jobs, restore supply chains, and sustain sources of income, especially for micro, small and medium enterprises (MSMEs).

By the end of FY2020, IDB Invest met all operational goals defined in its COVID-19 Operational Response. Commitments reached \$6,156.8 million, and Core Mobilization reached \$2,304.0 million, a record milestone under such difficult circumstances.

The path to a post-COVID world remains uncertain. While signs of economic recovery are starting to appear, significant challenges lie ahead. The rolling out of vaccination campaigns and the return to growth are positive signs for the Region; however, the timeline for achieving herd immunity is expected to be longer than in developed economies. As countries across the world face renewed shutdowns, the risk of further job loss continues, and the financing needs addressed by the criteria that guided the COVID-19 Operational Response remain. While still addressing the consequences of the COVID-19 pandemic, it is imperative to plan and prepare for the next stage. As economic activity returns, IDB Invest will increase its focus on operations that support recovery and contribute to sustained growth.

The above information is supplemented and qualified by the additional information and financial statements appearing elsewhere in this Information Statement. In addition, the Information Statement contains forward-looking information, which may be identified by such terms as "believes", "expects", "intends" or words of similar meaning. Such statements involve a number of assumptions and estimates that are based on current expectations, which are subject to risks and uncertainties beyond IDB Invest's control. Consequently, actual future results could differ materially from those currently anticipated. IDB Invest undertakes no obligation to update any forward-looking statements.

Management Discussion and Analysis

Financial Highlights

Selected Financial Data

The following information is based upon and should be read in conjunction with, the detailed information appearing in this Information Statement. (Amounts expressed in thousands of United States dollars, USD, US\$ or \$).

¹Includes recognition of net actuarial losses and prior service credit on IDB Invest's Pension Plans and Postretirement Benefit Plan and net fair value adjustments on borrowings attributable to changes in instrument-specific credit risk.

²Ratios definitions:

Return on average assets: Net income divided by the average of current and previous year's Total assets.

Return on average equity: Net income divided by the average of current and previous year's Equity.

Debt to equity: Borrowings plus Guarantees outstanding divided by Total paid in capital plus Retained earnings (Expressed in units).

Equity to assets: Equity divided by Total assets.

Liquidity to total assets: Cash and cash equivalents plus Investment securities divided by Total assets.

Allowance for credit losses to development related investments: Allowance for credit losses divided by development related loans and debt securities at amortized cost.

On January 1, 2020, IDB Invest adopted the current expected credit loss (CECL) model. This ratio is related to development related assets only, and does not consider the liability for undisbursed commitments and financial guarantees. Prior to 2020, this ratio was defined as Allowance for loan losses as a percentage of Loan portfolio.

Financial Results

In 2020, IDB Invest marked its fifth year of consecutive profits since the IDBG Private Sector Reform with net income of \$6.9 million in 2020 compared to \$43.9 million in 2019. The reduction in net income compared to the prior year was mainly driven by significant continued portfolio growth along with the recent global crisis triggered by the COVID-19 pandemic resulting in a higher provision for credit losses of \$75.1 million that was significantly impacted by the adoption of the current expected credit losses (CECL) methodology.

Total income/(expense) from development related investments, liquid assets and other income, net of borrowings expense, amounted to \$144.7 million in 2020. Interest and other income from development related debt investments (includes loans and debt securities) grew by \$51.8 million as a result of growth in the outstanding portfolio despite a lower global interest rate environment. Borrowings expenses increased by \$3.4 million, as the level of borrowings outstanding increased by \$2,260.3 million at the end of 2020 compared to the end of 2019 driven by IDB Invest's benchmark bond issuances under the Euro Medium Term Note Program to support its COVID-19 Operational Response. However, this increase was offset by an increase of \$75.1 million in provisions for expected credit losses as detailed above, and a decrease of \$15.6 million in gains from the liquid assets portfolio. These factors explain the decrease of \$33.8 million in Total income/(expense) from development related investments, liquid assets and other income, net of borrowings expense as compared to the prior year.

Administrative expenses increased 13% from \$130.0 million in 2019 to \$147.2 million in 2020, primarily due to higher pension costs driven by historically low discount rates. The limited increase in workforce costs as compared to the 71% growth of the gross development related investments portfolio, is a signal of IDB Invest's operational efficiencies in its first five years of operations since the IDBG Private Sector Reform. IDB Invest also continued strengthening its operational platform with the creation of the Operations Division and investments in process and system improvements. The Operations Division provides transactional, financial, and administrative services to support IDB Invest operations. It was created in 2020 by centralizing formerly separate areas of IDB Invest into one single organizational unit to increase standardization and automation, improve processes, and achieve synergies.

Development Related Investments

IDB Invest adopted several measures to alleviate the economic strain caused by the COVID-19 pandemic, including development of new financial instruments and mobilization products, a substantial increase in the availability of short-term financing, more long-term commitments, and continued expansion of local currency financing, including in Trinidad and Tobago dollars.

Assets

(in US\$ million)

Liabilities and capital

IDB Invest's gross development related investments, comprised of loans, debt securities and equity investments, increased approximately 71% from \$2,543.4 million as of December 31, 2019, to \$4,358.0 million as of December 31, 2020. In addition, undisbursed commitments toward development related investments as of December 31, 2020, were \$1,304.1 million, or 72% higher than as of December 31, 2019.

Development related investments portfolio

(in US\$ million)

Allowance for credit losses

Dec-16	Dec-17	Dec-18	Dec-19	Dec-20
\$(34.9)	\$(49.7)	\$(65.8)	\$(97.6)	\$(181.1)

Asset Quality

IDB Invest's gross development related investments portfolio continued to grow in 2020 while maintaining a consistent level of portfolio credit quality relative to 2019. Upon adoption of ASU 2016-13, *Financial Instruments – Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments* and related ASUs on January 1, 2020, IDB Invest recorded a cumulative-effect adjustment resulting in a net decrease of \$46.2 million to the 2020 opening retained earnings balance. The allowance for credit losses as a percentage of development related investments outstanding remained constant compared to the end of 2019 (4.8% at the end of 2020 vs. 4.7% at the end of 2019). Also, the ratio of impaired loans to loan portfolio outstanding improved from 1.5% at the end of 2019 to 0.8% at the end of 2020. Further, despite the Region facing the challenges of the COVID-19 pandemic, the ratio of development related debt investments 90 days past due to the total development related debt investments portfolio decreased slightly from 0.7% at the end of 2019 to 0.5% at the end of 2020, demonstrating the continued health of the portfolio and the limited impact to date of the pandemic on the portfolio.

Capital, Leverage and Liquidity Adequacy

IDB Invest's total capital increased by 4% from \$2,033.1 million as of the end of 2019 to \$2,108.2 million as of the end of 2020 as a result of \$184.7 million in capital contributions received in 2020 and \$6.9 million of net income, partially offset by other comprehensive losses of \$70.2 million, which were primarily composed of unrealized valuation adjustment losses on pension obligations and losses in the fair value of borrowings resulting from changes in IDB Invest's own credit risk spread. As of December 31, 2020, IDB Invest had received \$1,311.1 million in total capital contributions and approximately \$734.6 million was expected to be paid in under the second general capital Increase (GCI-II) authorized by the Board of Governors in 2015, demonstrating continued shareholder support.

Capital Contributions

As of December 31, 2020 (in US\$ million)

IDB Invest operates under a robust financial risk management framework. IDB Invest's solvency and liquidity ratios remained within established thresholds in 2020 despite the events caused by the COVID-19 pandemic. Specifically, IDB Invest's capital adequacy ratio, liquidity coverage ratio and debt to equity ratio remained fully in compliance with financial risk management policies and targets.

IDB Invest's capital-to-total-assets ratio was 33% at the end of 2020 compared to 52% at the end of 2019 as a result of the aforementioned portfolio growth. The debt-to-equity ratio increased to 186% at the end of 2020 compared to 81% at the end of 2019 as a result of increased funding in the capital markets. IDB Invest's liquidity-to-total-assets ratio was 33% in 2020 (35% in 2019) and the liquidity-to-debt ratio was 54% in 2020 (82% in 2019).

Financial Statement Presentation & Accounting Developments

IDB Invest's financial statements are prepared in accordance with generally accepted accounting principles of the United States of America (GAAP). The preparation of such financial statements requires Management to make estimates and assumptions that affect the reported results. Refer to Note 2 – Summary of Significant Accounting Policies in IDB Invest Financial Statements for critical accounting policies used to present financial results in accordance with GAAP, which may involve a high degree of judgment and complexity and relate to matters that are inherently uncertain.

Development Operations Strategy

The first component of IDB Invest's strategic framework is the IDB Group's Institutional Strategy, which was last updated in 2019. The second component is the Renewed Vision underlying the IDBG Private Sector Reform approved in 2015 by the Board of Governors, which reflects the Governors' long-term mandate for the institution to maximize development impact and provide access to financing, technical knowledge, and sectoral expertise to private sector clients in the Region. Drawing from the IDB Group's joint Institutional and Country Strategies further define the Group's vision and guide its actions. The implementation of the IDB Group's Institutional Strategy is monitored through the IDB Group's [Corporate Results Framework \(CRF\)](#), which sets institutional targets that map directly to the UN Sustainable Development Goals ([SDGs](#)).

IDB Invest's strategic priorities are focused on areas where the private sector shows high potential contribution to the IDB Group's goals, specifically, the development challenges of "Productivity and Innovation" and "Economic Integration" and the cross-cutting issues of "Gender Equality, Inclusion, and Diversity" and "Climate Change and Environmental Sustainability". The 2019 Update to the Institutional Strategy ("UIS") added Technology and Innovation and Resource Mobilization to the strategic priorities mentioned above.

Additionally, in March 2021, the Board of Governors reaffirmed its commitment to the IDB Group's critical role in promoting sustainable social and economic development and reducing poverty and inequality throughout the Region, which guides the IDB Group's "Vision 2025" agenda for recovery and sustainable economic growth in Latin America and the Caribbean. The Vision 2025 outlines the IDB Group's new priorities to advance implementation of the UIS for the 2021-2025 period and respond to the challenges that the Region faces and will continue to face in the years to come, as well as a path to come out of the crisis with more sustainable growth and resilience.

The strategic framework is implemented through IDB Invest's Business Plan, which establishes the areas of focus and performance indicators for a three-year period in alignment with the Renewed Vision and the UIS. In December 2019, the Board of Executive Directors approved IDB Invest's 2020-2022 Business Plan, setting a clear strategic framework to guide its work throughout the following three years. The Business Plan sets a strong focus on knowledge and innovation and defines five core institutional indicators to direct IDB Invest's activity: (i) C&D (Small and Vulnerable) Countries, (ii) S&I (Small and Island) Countries, (iii) MSMEs, (iv) Climate Change, and (v) Gender and Diversity. Finally, IDB Invest's Impact Management Framework ensures alignment with the three pillars of the Renewed Vision: Strategic Selectivity, Development Effectiveness and Systemic Impact.

Impact Management Framework

IDB Invest's Impact Management Framework is an end-to-end series of tools and practices that support the complete project lifecycle and integrate impact and financial considerations into portfolio management. The framework supports IDB Invest's dual mandate to achieve the highest possible impact while maintaining financial sustainability, also allowing the institution to play a countercyclical role throughout economic cycles. It is also fully aligned with leading global initiatives such as the Operating Principles for Impact Investing, of which IDB Invest is a signatory and a member of the Advisory Board.

The Impact Management Framework is rooted in a portfolio approach that seeks to balance impact and financial sustainability and is based on three founding strategic pillars:

- i) Strategic Selectivity**, which allows for the selection of projects with the greatest impact potential, focusing on the deepest development challenges and key priority areas: climate change, gender equality and diversity, MSMEs, as well as serving the Region's smaller economies, including small and island countries.
- ii) Development Impact**, which prioritizes the development impact of the project from the origination to ex-post evaluation, in addition to ensuring financial sustainability.

iii) **Systemic Approach**, which optimizes the use of IDB Invest’s limited resources by focusing on projects with the potential to transform markets or industries through demonstration effects, market linkages, or knowledge and innovation, as well as those with strong catalytic capacity to mobilize private investment for sustainable development.

Figure 1 below gives an overview of the tools comprising the Impact Management Framework.

Figure 1: The Impact Management Framework across the Project Cycle

DELTA = Development Effectiveness Learning, Tracking, and Assessment Tool
 FCR = Financial Contribution Rating
 XSR = Expanded Supervision Report
 IE = Impact Evaluations
 DEA = Development Effectiveness Analytics Platform

The following is a brief description of the tools that make up the Impact Management Framework across the project lifecycle, from how we target high-impact sector opportunities and systematically assess the expected impact of each investment to how we track, evaluate, and disseminate the impact achieved:

1. Selecting the right projects and clients

The **Strategic Selectivity Scorecard** identifies for each country’s private sector investment priorities by industry, helping us pinpoint sectors where the development gaps are greatest. This tool helps us guide project selection and resource allocation, in line with our development appetite and corporate targets, including a focus on small economies, small and island countries, MSMEs, climate change, and gender equality, diversity, and inclusion.

2. Assessing potential impact and designing projects for results

The **Development Effectiveness Learning, Tracking, and Assessment tool (DELTA)**, is a rigorous, fact-based scoring system, that assesses the expected impact of each investment and tracks results achieved over time. Embedded within the DELTA score calculated for each investment is an approximation of the economic and social rate of return (monetization), a stakeholder analysis to ensure that the most important direct and indirect effects are considered (who will benefit and how), a sustainability assessment to ensure that the project is financially sustainable and meets ESG requirements, and an assessment of the additionality that IDB Invest brings to the project.

The DELTA score is a key decision-making factor in IDB Invest's portfolio approach, together with our **Financial Contribution Rating**, which assesses each project's contribution to IDB Invest's long-term financial sustainability. Proposed investments need to meet certain impact and financial rating thresholds to advance, with decreasing financial contribution requirements for highly impactful projects. In this way, we can build and manage a portfolio that maximizes development impact while maintaining financial sustainability and working toward meeting the SDGs in the Region.

3. Managing and evaluating the portfolio for impact

Monitoring

The ex-ante impact assessment is just the beginning. In addition to the results matrix, which includes key indicators and targets, each project has a monitoring and evaluation plan that specifies the frequency, methods, sources, and responsibilities for data collection and analysis. As part of the annual supervision exercise that integrates both financial and impact performance, the DELTA Project Score is updated to reflect actual performance toward achieving impact targets set in the results matrix. Changes in project DELTA scores are factored into the overall tracking of portfolio-level progress toward delivering development outcomes. Similarly, the expected SDG contributions of each project in supervision are updated annually.

Impact measurement and evaluation

IDB Invest conducts a mandatory final self-evaluation for each operation in the portfolio. This evaluation compares the expected and actual impact of each project through a systematic assessment of its relevance, efficiency, effectiveness, and sustainability, as well as the main lessons learned. The final performance rating of each evaluation is validated by the IDB Group's independent Office of Evaluation and Oversight.

In addition, to further build the impact evidence base, we select some investments for more in-depth evaluations. By generating and sharing rigorous causal evidence about what works and does not work from our investments, we can help bolster the effectiveness of the broader impact investing industry as it continues to grow.

4&5. Impact analytics, learning and dissemination

Impact analytics

The Development Effectiveness Analytics (DEA) platform visualizes data collected by the DELTA to help us analyze how the portfolio is evolving. Dashboards at the approval and supervision stages provide management with real-time data to inform decision-making. Additional dashboards capture portfolio-level SDG contributions. The DEA also includes a repository of lessons learned from completed operations, showcasing which projects succeeded or failed in meeting their objectives and why. Lessons are then fed into current or new projects.

Impact dissemination

Ensuring that we share the knowledge and learning generated from our operations and evaluations with clients, investors, and within the IDB Group is a cornerstone of our Impact Management Framework. IDB Invest publishes the results of our impact evaluations, sector knowledge gap analyses, and other studies in the Development through the Private Sector peer-reviewed technical note series. We distill study results further through concise two-page summaries (DEBriefs) and blogs (Negocios Sostenibles). In addition, we publish the SDG-aligned results and impact of our projects annually in the IDB Group's Development Effectiveness Overview. Knowledge sharing also involves working with clients to impart practical knowledge about how to measure and manage impact and other advisory services.

Covid-19 Operational Response and 2021 Business Plan Update

The IDB Invest Board of Executive Directors approved Management's COVID-19 Operational Response in April 2020 and the 2021 Update to the Plan of Operations in March 2021. The COVID-19 Operational Response included a plan to closely monitor the financial sustainability of both the existing portfolio and

new business, as well as introduced more ambitious targets considered as part of the 2021 Update to the Plan of Operations to provide a countercyclical response to the Region. IDB Invest will continue to provide countercyclical support to the private sector in the Region throughout 2021, while also considering the long-term stability and financial sustainability of the institution.

Project Cycle

IDB Invest's project cycle consists of two phases: (i) the origination phase, which begins with origination and client engagement and proceeds through transaction approval, closing, commitment, and first disbursement, and (ii) the supervision phase, which entails client supervision and, if applicable, recovery, and concludes with ex-post evaluation after financial maturity.

Origination and Client Engagement

The origination and client engagement stages involve the identification of eligible clients and projects. This identification is based on IDB Invest's Strategic Selectivity Scorecard, enabling IDB Invest to steer origination towards development priority areas identified through the country strategy process.

Path to Approval

In the path to approval, the project team, which includes investment officers, credit analysts, economists, sustainability experts and lawyers, performs the due diligence, structuring, impact assessment, and independent risk analysis in preparation for the project approval. With certain exceptions, where this authority has been delegated to management, the Board of Executive Directors approves each project.

Closing/First Disbursement

After the approval, the project team proceeds to closing, where the signing of the financial documents occurs. The origination phase ends with the project's first disbursement, subject to the fulfillment of conditions set forth in the financial documents.

Supervision and Recovery

During the supervision stage IDB Invest closely monitors projects to identify events and circumstances that could adversely affect performance and to proactively take corrective action. The supervision of projects also includes tracking the compliance with financial covenants, with environmental, social, and corporate governance requirements and with targeted development outcomes.

A strong presence in the Region allows IDB Invest to closely oversee the performance of projects through site visits. Quarterly portfolio reviews by the Portfolio Supervision Committee ensure an ongoing oversight of IDB Invest's portfolio and include in-depth discussions of country and sector exposures, distressed assets, industry and country developments.

Ex-Post Evaluation

Upon completion, IDB Invest conducts a final evaluation for each operation in the portfolio. This evaluation compasses the expected and actual impact of each project through a systematic assessment of its relevance, efficiency, effectiveness, and sustainability, as well as the main lessons learned. The final performance rating of each evaluation is validated by the IDB Group's independent Office of Evaluation and Oversight, and aggregate results are published annually in the Development Effectiveness Overview. After the final maturity of the project, an ex-post evaluation of projects is undertaken. The analysis compares expected outcomes at project inception with the actual outcomes at the project's final maturity. Conclusions of this analysis are documented by IDB Invest and independently reviewed by the IDBG's Office of Evaluation and Oversight.

Origination Divisions

IDB Invest's origination operations are organized into three Divisions:

1. The **Infrastructure and Energy Division** is organized by geographic regions, covering: (i) Mexico, Central America and the Caribbean, (ii) Andean Countries, and (iii) Southern Cone. The Division focuses on four key sectors: energy, transport, water and sanitation, and social infrastructure.
2. The **Financial Intermediaries Division** is organized by geographic regions, covering: (i) Mexico, and Central America, (ii) the Caribbean, (iii) Andean Countries, and (iv) Southern Cone. The Division focuses on three different areas: banks and other financial institutions, investment funds, and financial inclusion.
3. The **Corporates Division** is organized in four different sectors covering the Region: (i) manufacturing, (ii) agribusinesses, (iii) tourism, and (iv) technology, media and telecommunications.

Furthermore, IDB Invest has a **Portfolio Management Division** to supervise project execution and a **Financial Products and Services Division** to develop and offer a range of solutions to clients.

Investment Products and Services

To meet the evolving demands of the Region's private sector, IDB Invest offers a broad range of financial products and services to its clients, including loans, guarantees, equity and mezzanine products, and Trade and Supply Chain Finance products.

In addition, to amplify impact in the Region, IDB Invest offers: (i) a range of debt capital market solutions, including bond purchases, (ii) blended finance products, and (iii) mobilization of third-party capital.

Loans. IDB Invest offers loans at market-based rates, in U.S. dollars or selected local currencies, with tenors in line with the client's objectives and flexible terms and conditions based on the client's needs or project requirements.

Guarantees. IDB Invest issues guarantees under different structures to enable its clients to finance projects, obtain access to trade finance or capital markets, or enhance the working capital of their supply chains. IDB Invest also offers risk-sharing facilities or loss-sharing arrangements, which allow its clients to reduce risks while expanding their products and services.

Trade and Supply Chain Finance (TSCF). IDB Invest's supply chain products address the needs of buyers and sellers in the Region by offering a set of efficient, reliable, and comprehensive financial solutions for every stage of a client's value chain, supporting the client's local and international trade activities. The product catalog includes accounts payable financing (reverse factoring), accounts receivable finance (factoring), pre-export finance, import and export finance, stand-by letters of credit (SBLC) and trade-related working capital liquidity lines.

Additionally, through its Trade Finance Facilitation Program (TFFP), IDB Invest promotes international trade with two main products: (i) credit guarantees issued in favor of confirming banks to cover the commercial and political risks they assume on accepting eligible trade instruments issued by issuing banks in the Region; and (ii) loans to borrowers in the Region to finance their international trade portfolio, for which IDB Invest may also mobilize third-party capital.

Debt Securities. IDB Invest subscribes bonds, notes, and other debt securities issued by clients. In recent years, IDB Invest has developed a strong market position supporting clients issuing thematic bonds (e.g., green, social, and sustainable) through the purchase of the bonds and the delivery of advisory services and blended finance.

Equity and Mezzanine. IDB Invest provides equity and mezzanine investments to support companies in scaling up their operations. IDB Invest's equity and mezzanine investments include loans with income participation or conversion features, subordinated loans, payment-in-kind loans, preferred and common equity, warrants, and interests in limited partnerships or similar entities. In addition, through participation on the board of directors of investee companies and through advisory mandates, IDB Invest can add

value to investee companies, most notably by strengthening environmental, social and governance standards and by crowding in additional investors.

Blended Finance. Blended Finance refers to the use of concessional financing in high impact projects where risks are too high for commercial finance alone. This product provides financial flexibility as it allows for multiple types of interventions, ranging from performance grants, equity, debt, and risk mitigation instruments. IDB Invest also offers advice and investment management solutions to providers and recipients of concessional finance and is the main channeler of concessional resources in the Region.

Core Mobilization. IDB Invest has extensive experience connecting clients and projects with investors to suit different time horizons, sector priorities, risk appetites and return expectations. IDB Invest works with a range of market players – international commercial banks, regional commercial banks, institutional investors, such as insurance companies and pension funds, impact investors and sovereign wealth funds – to mobilize financing through loan participations (B Loans), parallel loans, credit insurance and unfunded risk participations. IDB Invest may also structure its transactions to include B Bonds to cater to institutional investors. Through its mobilization efforts, IDB Invest is able to provide clients access to larger financing packages.

Non-Financial Solutions

IDB Invest combines its financial product offering with non-financial solutions to improve the value proposition for clients.

Climate Change. IDB Invest promotes smart solutions for sustainable businesses by helping companies implement mitigation and adaptation strategies into their business. IDB Invest works with clients from various sectors to develop and rethink their strategy, making the most of new climate technology power, identifying present and future climate risks, and discovering and entering into new markets.

Gender, Diversity and Inclusion. IDB Invest works with its clients to narrow gender, diversity and inclusion gaps and to find new business opportunities. IDB Invest supports companies in their human capital strategy to attract and retain the best talent advises clients on their market strategy to identify potential opportunities and segments both within their customer/client base and throughout their value chain.

Sustainability and Micro, Small and Medium sized Enterprises (MSMEs). IDB Invest offers inclusive and sustainable financial solutions by supporting clients to maximize their unique role in promoting sustainable and inclusive economic growth. IDB Invest does this by integrating a sustainability lens in its investments, products, and services to its clients, and by expanding its clients' financial inclusion of MSMEs and underserved populations. IDB Invest focuses on integrating sustainability with the aim of working closely with its clients in further understanding and addressing their most material sustainability issues, embedding sustainability in their strategy and operations. Finally, IDB Invest supports business transformation by understanding and adopting innovative solutions, such as the transformation towards a circular economy business model.

Public-Private Partnerships (PPP). IDB Invest's solution to support PPP development draws on its experience and leadership in financing this type of project and developing sustainable infrastructure to improve the prospects for success of PPPs in the Region. IDB Invest advises on the design and implementation of bankable bidding processes, including the financial, legal, and socio-environmental structure of tender documents and PPP contracts, and provides support during the bidding processes, during the definition process of winning bidders, as well as during the development and implementation of global- scale bid promotion. Additionally, for the private sector, IDB Invest supports the presentation of private initiatives, aiming to create projects that have an impact on development and mobilization of private capital.

Sources of Funds

IDB Invest funds its operations with capital and debt, mainly bond issuances in the capital markets.

Capital

IDB Invest issues only whole shares. In 1999, IDB Invest authorized a general capital increase (GCI-I) and all the available shares were subscribed for with a par value of ten thousand dollars each.

On March 30, 2015, the Board of Governors of IDB Invest further authorized the GCI-II for \$2,030.0 million. GCI-II is comprised of: (i) \$1,305.0 million in capital to be paid by the IDB Invest shareholders during the 2016-2022 period (Annex A Shares); and (ii) annual transfers from the income of the IDB, on behalf of its shareholders, to be made to IDB Invest during the period 2018-2025, totaling \$725.0 million for the entire period, and conditional upon annual approval by the IDB Board of Governors (Annex B Shares). Subscribed shares are recorded at the stock issuance price of \$16,178.60 each and are expected to be paid in over time. Shares corresponding to transfers from the IDB, on behalf of its member countries, will be conditional upon annually approved transfers by the Board of Governors of the IDB. Annex B transfers have been made in 2018, 2019, 2020 and 2021 and are expected to extend through 2025.

Borrowings

Under its Establishing Agreement, IDB Invest may borrow funds provided that its leverage, measured as the ratio of the total amount of outstanding borrowings plus guarantees given by IDB Invest to the sum of its subscribed capital, earned surplus and reserves, shall not exceed 3.0. As of December 31, 2020, IDB Invest's leverage ratio was 1.78.

IDB Invest raises funds primarily through the issuance of debt securities in the international capital markets and it diversifies its funding sources by borrowing in different currencies, products, and maturities, while maintaining a small borrowing facility with the IDB. IDB Invest also issues bonds in local currency to promote the development of local capital markets in the Region.

In 2020, IDB Invest's new borrowings amount to \$2,302.5 million, after \$980.4 million in 2019. New borrowings were denominated in 7 currencies with final contractual maturities ranging from 2 to 19 years. Actual maturities may differ from contractual maturities as call and prepayment features may be embedded in certain of IDB Invest's borrowings.

Consistent with its growth objectives, IDB Invest pursues a strategy of expanding its funding sources. As examples of newly incorporated funding instruments, in 2020, IDB Invest established a Euro Commercial Paper Program and a Sustainable Debt Framework aligned with the Green Bond Principles and Social Bond principles published by the International Capital Markets Association (ICMA), allowing it to issue green, social and sustainability debt instruments. In 2021, IDB Invest further expanded its funding sources through a new Global Debt Program and the establishment of an Australian Debt Issuance Program.

From time to time, IDB Invest enters into interest rate and currency swaps to convert the proceeds of borrowing transactions mostly into US dollar floating rate obligations. As of December 31, 2020, IDB Invest had gross payables from borrowing-related interest rate swaps of \$2,000.0 million and gross receivables from borrowing-related currency swaps of \$107.9 million. Taking into consideration the effect of these borrowing related swaps, 73% of IDB Invest's borrowings as of December 31, 2020, were floating rate, US dollar-denominated (45% as of December 31, 2019).

IDB Invest also raises funds in local currency to provide local currency financing to its clients and to promote the development of local capital markets. Proceeds of such borrowings not disbursed to clients are primarily invested in securities of the highest credit quality and liquidity in the currency of the issuances. Local currency borrowings with no associated interest rate or currency swaps amounted to 14% of the total borrowings as of December 31, 2020.

Risk Management

In its ordinary course of business, IDB Invest is exposed to an array of financial and non-financial risks that it must monitor and manage. The Establishing Agreement and subsequent resolutions approved by the Board of Governors and Board of Executive Directors define IDB Invest's overall risk profile. IDB Invest's risk policies have been updated as of March 3, 2021.

IDB Invest's Risk Appetite Policy, as approved by its Board of Executive Directors, provides both qualitative and quantitative guidance for different types of risk and establishes the maximum leverage ratio and a minimum international credit rating by the major rating agencies. These directives form the cornerstone of IDB Invest's risk appetite and underlie all risk management policies and guidelines.

IDB Invest's overall market risk appetite is limited, and the Risk Appetite Policy defines a limit based on value-at-risk and rules that IDB Invest shall match the structure of its assets and liabilities to avoid risk that cannot be passed on to borrowers.

Diversification is an important part of the Risk Appetite Policy, with limits defined in terms of country, sector, economic groups, and clients. IDB Invest intends not be a sole source of funding in projects and limits its participation so that the risk is always shared with other market participants.

The Risk Appetite Policy also stipulates that project must meet specified environmental and social sustainability criteria and mitigate corporate governance, integrity and reputational risks to be eligible for investment consistent with IDB Invest's Environmental and Social Sustainability Policy and Integrity Framework. Projects in which IDB Invest participates must include adequate provisions for actions necessary to prevent, control and mitigate negative impacts on the environment and/or on communities, improve environmental quality, and comply with local labor laws and regulations and IDB Invest's standards.

Other types of risks, such as operational risk, are also discussed in the Risk Appetite Policy.

IDB Invest operates under a three lines of defense model. The first line of defense resides with Management and the process owners that have primary responsibility for their respective day-to-day operational activities. The Risk Management department, an independent department at IDB Invest, headed by the Chief Risk Officer (CRO) who reports directly to the CEO, is part of the second line of defense that identifies, measures and controls existing and emerging risks related to certain financial and operational matters providing compliance and oversight in the form of frameworks, policies, tools and techniques to support risk and compliance management. The Risk Management department is organized into the following areas: Credit Risk; Social, Environmental and Corporate Governance; Financial and Operational Risk; and Special Assets. The second line of defense also includes the Office of Institutional Integrity (OII) and the Office of Ethics. The third line of defense provides objective and independent assurance and includes the IDB Office of the Executive Auditor (AUG), Office of Evaluation and Oversight (OVE), and Independent Consultation and Investigation Mechanism.

Capital Adequacy

Regular capital adequacy assessments are a fundamental pillar of the management of any financial institution. Development banks, such as IDB Invest, although not regulated, by virtue of their mandates are required to hold more capital than their commercial counterparts. Within its financial risk framework, as approved by the Board of Executive Directors, IDB Invest has devised a method for estimating how much capital it needs to retain, which helps determine its overall lending capacity.

IDB Invest assesses capital adequacy by comparing Available Capital (AC) to Required Capital (RC). AC is equal to IDB Invest's net worth, as stated in its most recent financial statements (composed of paid-in capital plus retained earnings and reserves). RC is the highest capital requirement from either IDB Invest's internally developed economic capital model or the estimated capital requirements under the methodologies of the international credit rating agencies that assess IDB Invest's capital adequacy in a quantitatively supported and replicable way. The Capital Adequacy Policy describes different possible levels of capitalization, requiring different levels of disclosures, analysis and potential action plans. The policy also considers a buffer and requires compliance under forward looking stress scenarios. The CAR factors into IDB Invest's financial planning and is calculated on a monthly basis, while stress tests are performed on a quarterly basis.

Ratings provided by international rating agencies are generally based on a combination of qualitative and quantitative metrics. IDB Invest's annual targets are based on quantitative metrics that are designed to

maintain a minimum financial profile level that, in combination with its business profile, results in at least an AA rating.

Liquidity Risk

Liquidity risk is defined as the risk that IDB Invest would not be able to meet its financial obligations on a timely basis. Overall liquidity requirements at IDB Invest are driven by a Liquidity Coverage Ratio (LCR) whose target is approved by the Board of Executive Directors on an annual basis. Aligned with best practices that are specific to development banks, the LCR measures IDB Invest's ability to fulfill liquidity needs in a stressed market environment for an extended period of time (generally near the 12-month mark). The LCR is the ratio of available liquidity at a point in time to the liquidity required to sustain cash payments during a pre-determined time period (Coverage Period) considering estimated sources and uses of liquidity under stressed market conditions.

Under the Board approved Liquidity Policy, stressed market conditions are defined as follows:

- a. IDB Invest is assumed to be unable to access additional sources of funding, such as issuing debt in the markets or obtaining funding through other means;
- b. IDB Invest's initial sources of liquidity, including marketable assets and inflows, are assumed to be adjusted conservatively by applying proportional reductions in value, also referred to as Haircuts; and
- c. IDB Invest is assumed to continue to originate new operations for half of the Coverage Period in accordance with the annual Business Plan.

In addition to the Liquidity Policy, IDB Invest manages liquidity in accordance with (i) the Authorization to Invest Corporation Funds and (ii) the Risk Appetite Policy. The Authorization to Invest Corporation Funds is a resolution of the Board of Executive Directors authorizing IDB Invest to invest all or part of assets held by IDB Invest that are not immediately required for use in its operations. The resolution gives Management flexibility to obtain diversification from IDB Invest's loan portfolio and optimize the risk and return through investment in instruments in a wide number of market segments.

Credit Risk

Credit risk refers to financial or economic losses that may result from time to time from counterparties that default on their obligations to IDB Invest or whose credit quality fluctuates adversely. On- or off-balance sheet exposures of IDB Invest, as well as all investments in debt securities acquired for liquidity management purposes are subject to the credit risk management process.

There is a systematic approval process in place to analyze the credit risk and the safety and yield of proposed investments in development related investments and to monitor IDB Invest's committed development related investments portfolio. IDB Invest's Operating Policy defines, among other topics, the main guidelines for the supervision of the portfolio.

Once a debt or equity investment is committed, the Portfolio Management Division and Management's Portfolio Supervision Committee are responsible for monitoring. The portfolio is monitored by personnel in its headquarters in Washington D.C., and in the regional offices. Individual projects are reviewed at least once a year, which may involve a field visit. Certain projects facing critical risks are reviewed with greater frequency.

Among the main risk drivers affecting credit risk of IDB Invest's portfolio of counterparties are the following:

- i. lower demand that could lead to an excess of supply and lower prices impacting company revenues;
- ii. higher costs of raw materials that could lead to lower margins;
- iii. a higher rate of inflation;
- iv. deterioration of the financial position of the end-users that purchase the goods and services from borrowers, which could lead to an increase in days of account receivables, putting pressure on working capital needs;

- v. liquidity constraints for counterparties in the country, which could lead to higher interest expense and lower credit supply by financial intermediaries;
- vi. income volatility to the counterparty's exposure to exchange rate risk when their revenue is generated mainly by local currency sales but their debt is in foreign currency;
- vii. for some investments, risks are related to the implementation of expansion projects or start-up operations and risks may arise due to cost over-runs, delays or cost increases during the implementation process;
- viii. the political and regulatory environment in which the counterparty operates compared to that affecting other competitors from foreign countries that sell their products in the same market;
- ix. the demand for financial services, which could be hindered by lower growth expectations of the economy or higher burdens foreseen by the economic agents. Moreover, a decrease in the market interest rate could impact the income of IDB Invest clients in the financial sector; and
- x. any deterioration in the macroeconomic conditions and the competitiveness of borrowers could impact the credit quality of the portfolio of investments in financial intermediaries and have an impact on their earnings due to higher provisions.

The credit risk of every debt investment is quantified with the use of credit ratings. IDB Invest utilizes specific scorecards depending on the segment and type of investment, that generates an internal credit rating. The internal credit ratings resemble the S&P rating scale. There is also a model to calculate the Loss Given Default (LGD) of each facility. The internal ratings with the LGDs are used in different risk management applications like economic capital calculation, risk-adjusted return on capital (RAROC) and loss allowance calculation.

Credit risk is also managed in terms of portfolio concentration. Diversification is an important topic for IDB Invest, so there are several limits to control exposure concentration in terms of countries, industry sectors, economic groups and single name. There are also limits for equity and quasi-equity investments.

Market Risk

Market risk refers to the potential impact on the economic value of IDB Invest's net worth caused by changes in the general level of interest rates in the market due to mismatches in the overall duration of assets and liabilities. It also captures the impact of changes in foreign exchanges rates on net currency positions on the balance sheet. These exposures could materialize from time to time due to temporary operational mismatches, direct or indirect equity investments denominated in local currency or through contingent exposures denominated in local currency.

IDB Invest's Risk Appetite Policy provides key guidelines that set forth the aim of minimizing mismatches in market risk exposures. Guidelines further detail exposure limits by risk type and line of business. Local currency debt transactions are matched back-to-back either through a dedicated funding source or through a currency swap, while foreign currency exchange risk from local currency equity investments remains unhedged. Interest rate risk mismatches are only allowed in USD and Mexican peso (MXN).

Treasury's Liquidity portfolio is managed in US Dollars and is subject to limits in terms of interest rate risk and credit risk. There are also guidelines defining into what instruments and conditions the investments can be made.

Counterparty risk comes mainly from cross-currency and interest rate swaps used to hedge assets and liabilities. This risk is managed by the Market Risk team.

IDB Invest has a dedicated Market Risk team that sets limits, monitors, and controls exposures. In addition, Management provides additional oversight through an asset and liability management committee.

Operational Risk

IDB Invest's defines operational risk as the risk resulting from inadequate or failed internal processes, people or systems or from external events that may result in financial losses and/or damage to IDB Invest's reputation.

IDB Invest maintains an operational risk management framework, in which all personnel has ownership, responsibility and accountability for assessing, controlling, and mitigating operational risks, as well as establishing and maintaining effective internal controls in their respective functions.

Integrity Risk

Integrity risk is defined as the possibility that a person or entity engages in serious ethical or financial misconduct in connection with an IDB Invest operation. When such misconduct occurs, it adversely affects the ability of IDB Invest to further its development purpose and safeguard its financial sustainability. IDB Invest expects its clients and its employees to abide by the highest standards of ethics, integrity, transparency, and accountability in relation to all IDB Invest operations.

To manage integrity risk, IDB Invest conducts a risk based due diligence for all its lending and equity operations regarding its counterparties and any other entity closely associated with the project, which is updated annually. The key elements of that integrity due diligence include: (i) general integrity review of all IDB Invest clients and relevant entities; (ii) an assessment of the AML/CFT systems of all financial institution clients; and (iii) an assessment of tax-related risks presented by cross-border corporate structures used by proposed IDB Invest clients.

The integrity due diligence process allows IDB Invest to identify risk indicators, including but not limited to: politically exposed persons, persons subject to economic or administrative sanctions, relevant litigation or enforcement activity involving the client, or use of cross-border structures that may be used for tax evasion. When the counterparty is a financial institution, IDB Invest also assesses the effectiveness of its AML/CFT controls.

The integrity due diligence process is overseen by the Office of Institutional Integrity, an independent office of the Inter-American Development Bank that provides services to IDB Invest.

Data Privacy Risk

With the objective to uphold IDB Group's reputation as a trusted partner and meet expectations of its stakeholders, on February 24, 2021, the Board of Executive Directors of IDB Invest and the IDB approved the IDB Group Personal Data Privacy Policy, which applies to how IDB Invest and the IDB will operate the personal data collection and process, and is intended to develop consistent practices and procedures across the IDB Group. The policy provides the guiding principles for each IDB Group institution to establish their own privacy program, which shall provide for the implementation of administrative, technical, and physical safeguards for personal data processing tailored to their unique mandate and business needs. The policy will become effective for IDB Invest and the IDB upon their respective adoption of implementing guidelines, procedures, technology solutions, and other measures, in a period not to exceed 3 years after its approval. The achievement of this important milestone is reflective of the IDB Group's firm commitment to protect personal data in line with global data privacy standards and is aligned with the approach taken by other multilateral development banks.

Environmental, Social and Corporate Governance

Environmental and Social Sustainability Policy

IDB Invest's Environmental and Social Sustainability Policy is applied to all projects financed by IDB Invest. It also conveys IDB Invest's commitment to sustainable development, as the foundation of its approach to risk management, as well as its development mandate. During the appraisal process for proposed investments in development related assets, robust environmental and social risk management standards are applied. The Policy and its Implementation Manual include a detailed description as to how the Policy is applied during the project approval process. A summary is provided below.

Environmental, Social and Corporate Governance (ESG) Due Diligence and Supervision

IDB Invest assesses the potential environmental and social risks and impacts of all projects in which it considers investing for compliance with host country laws and regulations and its Sustainability Policy and Exclusion List prior to final approval. This assessment is based on the mitigation hierarchy approach whereby clients should avoid, minimize, or manage environmental, social and health and safety risks and impacts. IDB Invest requires its clients to comply with the Sustainability Policy, which incorporates IFC standards and guidelines: the Performance Standards on Environmental and Social Sustainability of the

International Finance Corporation (IFC) (the “Performance Standards”); and the World Bank/IFC Environmental Health and Safety (EHS) Guidelines (including both General EHS guidelines and Industry Sector EHS Guidelines) (the “EHS Guidelines”). Any subsequent revisions to the above-mentioned Performance Standards and EHS Guidelines will apply to the Sustainability Policy unless otherwise determined by IDB Invest’s Board of Executive Directors.

IDB Invest will only finance operations that are expected to meet the Sustainability Policy’s environmental and social requirements within a reasonable time frame. In certain cases, a project may not be in full compliance at the time of signing the legal agreement with IDB Invest, in which case approval of financing will be linked with the contractual obligation of achieving compliance within a designated timeframe. IDB Invest’s investment agreements include obligations requiring clients to comply with applicable requirements of the Performance Standards and conditions included in action plans, as well as relevant provisions for environmental and social reporting, and supervision visits by IDB Invest staff or representatives, as appropriate. Persistent delays in meeting these requirements may lead to the exercise of remedies or withdrawal of financial support by IDB Invest, in its discretion.

Additionally, IDB Invest works with clients to assess their corporate governance practices and provide advice on how to improve them. This may include issues related to board effectiveness, representation of women and minority groups on company boards and in leadership positions, the control and accountability environment of a company, or engagement with different business partners.

IDB Invest has adopted the Corporate Governance Development Framework (CGDF), a common methodology among Development Finance Institutions for assessing corporate governance of investee companies. Under the CGDF, IDB Invest carries out the following activities: (i) integrates corporate governance in its investment operations, (ii) establishes an internal corporate governance function, (iii) provides training and capacity building, (iv) collaborates with other signatories, and (v) reports annually on implementation. Through its technical assistance activities, IDB Invest provides private sector companies in Latin America and the Caribbean with direct corporate governance support, capacity-building programs, and other forms of assistance.

Finally, IDB Invest monitors projects for compliance with its ESG standards throughout implementation and the repayment period. This approach aimed at identifying and managing ESG risks throughout the project lifecycle provides a comprehensive framework to promote effective sustainability gains to its portfolio.

Access to Information Policy

IDB Invest is accountable for the use and management of its resources. As such, IDB Invest produces information regarding its activities and operations to enable its member countries, clients, third parties, and the public to learn about and stay up to date with IDB Invest’s activities.

IDB Invest is responsible for disclosing information in accordance with its Access to Information Policy. In addition, in accordance with the Policy, IDB Invest’s business approach requires that, as part of the process of managing the risks and impacts of the investment projects, IDB Invest’s clients engage with communities affected by their projects, including through the disclosure of information, in a manner that aligns with IDB Invest’s Environmental and Social Sustainability Policy.

Independent Investigation and Consultation Mechanism

IDB Invest’s Independent Consultation and Investigation Mechanism (the “ICIM”) is independent from the management structure at IDB Invest and reports directly to the Board of Executive Directors of IDB Invest. The ICIM’s objectives are as follows: provide a mechanism and process independent of Management in order to investigate allegations by Requesters of Harm produced by the IDB Invest’s failure to comply with its Relevant Operational Policies in IDB Invest-Financed Operations; provide information to the Board regarding such investigations; and be a last-resort mechanism for addressing the concerns of Requesters, after reasonable attempts to bring such allegations to the attention of Management have been made.

Other Developments

LIBOR Replacement

In July 2017, the Financial Conduct Authority, the regulator of LIBOR, announced that it would no longer compel panel banks to submit rates required to calculate LIBOR after December 31, 2021. Therefore, market participants, including IDB Invest and its borrowers, would need to move to alternative reference rates. In December 2020, the Intercontinental Exchange Benchmark Administration Limited (IBA) published a consultation on its intention to postpone the discontinuation date for the most liquid U.S. LIBOR tenors from December 31, 2021 to June 30, 2023 and this postponement was confirmed in March 2021. Although the transition from LIBOR is faced with numerous uncertainties and challenges, the transition decision is aimed at increased transparency in the financial markets by better aligning the alternative reference rates with actual market transactions.

LIBOR transition has broad implications for IDB Invest. As a result, Management established a governance structure to manage the transition process. IDB Invest's LIBOR Transition Program includes a dedicated program management office, cross-departmental workstreams and a Steering Committee for oversight and approval of major decisions. To begin its LIBOR transition efforts, IDB Invest completed an impact assessment of its LIBOR exposure across portfolios (Lending, Investments and Funding), systems, and functions. Next, a detailed implementation plan was created incorporating steps to get IDB Invest operationally ready to originate SOFR products by the year end 2021 and to transition existing LIBOR portfolio by June 30, 2023. Implementation efforts are well underway and major milestones achieved so far include adherence to the ISDA protocol in January 2021 and achievement of system readiness for SOFR lending products during the second half of 2021. Remaining efforts are mainly focused on finalization of Asset Liability Management (ALM) transition strategy and execution of transition efforts for the existing LIBOR lending portfolio.

Pension Plans and Postretirement Benefits Plan

The volatility in the equity and credit markets affects the funded status of the Pension Plans and Postretirement Benefits Plan (PRBP). IDB Invest's Pension Plans are 68% funded (\$123.1 million underfunded) and the Post Retirement Benefit Plan is 84% funded (\$34.7 million underfunded) as of December 31, 2020. The funded status of the Pension Plans decreased by \$45.2 million and the PRBP decreased by \$16.9 million from 2019. The changes to the funded status of the Pension Plans and PRBP were driven by a decrease in the discount rates of 73 bps and 71 bps, respectively, maintaining the trend of historically low discount rates despite a recovery in asset values from the economic impacts of the COVID-19 pandemic on financial markets. IDB Invest, in coordination with the IDB, actively monitors management strategies to address the short-term and long-term performance of the Pension Plans and PRBP. For further information, refer to Note 14 – Pension and Postretirement Benefit Plans of the financial statements.

Management Changes

Mauricio Claver-Carone was elected as new President of the IDB in September 2020 and took office in October 2020. As IDB President, Mr. Claver-Carone also serves as Chairman of the Board of Executive Directors of IDB Invest. Management believes that ensuring full alignment with the new administration's vision and priorities is essential to construct IDB Invest's program of operations for 2021 and beyond. In March 2021, IDB Invest's General Manager appointed Orlando Ferreira as Chief Financial Officer and Alexandre Meira da Rosa as Chief Strategy Officer.

Administration and Governance

IDB Invest has a Board of Governors, a Board of Executive Directors, a Chairman of the Board of Executive Directors, and a General Manager. The General Manager, in consultation with the Board of Executive Directors and the Chairman of the Board, is responsible for the organization, appointment and dismissal of the officers and staff.

Board of Governors

All the powers of IDB Invest are vested in its Board of Governors, which consists of one Governor and one Alternate Governor appointed by each member country. The Board of Governors has delegated all of

its powers to the Board of Executive Directors except for the power to admit new member countries, suspend a member, increase or decrease the capital stock, decide on appeals on interpretations of the Establishing Agreement made by the Board of Executive Directors, engage the services of external auditors, declare dividends, approve IDB Invest's audited financial statements, amend the Establishing Agreement, and suspend permanently the operations of IDB Invest.

The Governor or Alternate Governor from each member country exercises the voting power to which its member country is entitled, each member country having one vote for each fully paid share held by it. A list of the members as of December 31, 2020, showing the voting power and the number of shares subscribed by each member country, is set forth in the table in Note 9 – Capital of the financial statements. The quorum for any meeting of the Board of Governors is the majority of the Governors representing at least two-thirds of the votes of the member countries. Matters before the Board of Governors are decided by a majority of the votes of the members except as specifically detailed in the Establishing Agreement or other regulations. Governors and Alternate Governors serve without compensation from IDB Invest.

The Board of Governors holds regular meetings, at least annually.

Board of Executive Directors

Function

The Board of Executive Directors is responsible for the conduct of the operations of IDB Invest. To this end, the Board of Executive Directors exercises all the powers granted to it under the Establishing Agreement and those delegated to it by the Board of Governors. The Board of Executive Directors establishes the basic organizational structure of IDB Invest, including the number and general responsibilities of its main administrative and professional positions. The Board of Executive Directors is also responsible for adopting IDB Invest's annual budget.

Membership

The Board of Executive Directors is composed as follows: (i) one Executive Director appointed by the member country having the largest number of shares in IDB Invest (as of the date of this Information Statement, this is the United States); (ii) nine Executive Directors elected by the Governors for the Regional Developing Member Countries; and (iii) three Executive Directors elected by the Governors for the remaining member countries. Executive Directors are persons of recognized competence and wide experience in economic and financial matters. Each Executive Director appoints an Alternate Executive Director who has full power to act for the Executive Director when he or she is not present. Executive Directors generally serve for three years. The president of the IDB is the ex-officio Chairman of the Board of Executive Directors of IDB Invest and presides over meetings of the Board of Executive Directors but does not have the right to vote except in the case of a tie. The Chairman of the Board of Executive Directors may participate in, but may not vote at, meetings of the Board of Governors. Directors are neither officers nor staff of IDB Invest.

The table below shows a list of Executive Directors and Alternate Executive Directors as of December 10, 2021:

Country	Executive Director or Alternate Executive Director
Argentina and Haiti	Guillermo Alberto Francos (Argentina) Jorge Eduardo Srur (Argentina)
Austria, Belgium, Germany, Italy, the Netherlands, and the People's Republic of China	Adolfo Di Carluccio (Italy) Jing Chen (China)
Bahamas, Barbados, Guyana, Jamaica, and Trinidad and Tobago	R. Brian Langrin (Jamaica) (vacant)
Belize, Costa Rica, El Salvador, Guatemala, Honduras, and Nicaragua	Edna Gabriela Camacho (Costa Rica) Diego Aycicena Abascal (Guatemala)
Bolivarian Republic of Venezuela and Panama	Gustavo Tarre Briceno (Venezuela) Carlos Alberto Vallarino Rangel (Panama)
Brazil and Suriname	José Guilherme Almeida dos Reis (Brazil) Sergio Savino Portugal (Brazil)
Canada, Denmark, Finland, France, Norway, Sweden and Switzerland	Harald Tollan (Norway) Eric Daniel Madueño (Canada)
Chile and Colombia	Matias Acevedo Ferrer (Chile) Luis Martin Uribe Velez (Colombia)
Croatia, Israel, Japan, Portugal, Republic of Korea, Slovenia and Spain	Alberto Nadal (Spain) Shigeo Shimizu (Japan)
Dominican Republic and Mexico	Mario Alejandro Gaytan Gonzalez (Mexico) Ernesto Alejandro Selman Mejia (Dominican Republic)
Ecuador and Peru	(vacant) Bernardo Acosta (Ecuador)
Paraguay, Plurinational State of Bolivia, and Uruguay	Germán Hugo Rojas Irigoyen (Paraguay) Mario Alberto Guillen Suarez (Bolivia)
United States of America	(vacant) (vacant)

Operation

The Board of Executive Directors functions in continuous session at the principal offices of IDB Invest in Washington D.C., or exceptionally at such other locations as shall be designated by the Board of Executive Directors and meets as often as business requires.

Agendas, minutes, and resolutions of the meetings of the Board of Executive Directors are made available to the public at the end of the corresponding deliberative process.

Each Executive Director is entitled to cast the number of votes which the member or member countries of IDB Invest whose votes counted towards his or her nomination or election are entitled to cast. All the votes that an Executive Director is entitled to cast, are cast together. The quorum for any meeting of the Board of Executive Directors is the majority of the Directors representing not less than two-thirds of the votes of the member countries.

Unless an Executive Director requires formal voting, the Chairman of the Board of Executive Directors may declare any matter approved based on verbal affirmations. In the event that a formal voting is called, unless otherwise provided, all matters are decided by a majority of the votes of the member countries.

Key Governing Committees

The Board of Executive Directors has the following committees: the Executive Committee, the Audit Committee, the Committee of the Board of Executive Directors, and the Special Ad Hoc Committee for Problem Projects. In addition, there are two joint committees of the IDB Invest Board of Executive Directors and the IDB Board of Executive Directors: the Steering Committee and the Conduct Committee.

Executive Committee of the Board of Executive Directors

The Executive Committee of the Board of Executive Directors is composed of: (i) the Director or Alternate appointed by the member country having the largest number of shares in IDB Invest (as of the date of this Information Statement, this is the United States); (ii) two Directors representing the Regional Developing Member Countries; and (iii) one Director representing the other member countries. Rotating agreements among the Directors result in a change in the composition every quarter.

The Executive Committee considers all loans and investments in Regional Developing Member Countries. To be approved, a loan, investment or financing program requires the vote of the majority of the Executive Committee. A quorum for any meeting of the Executive Committee shall be three members. A report with respect to each operation approved by the Executive Committee is then submitted to the Board of Executive Directors. If requested by any Executive Director, such approved operation will be presented to the Board of Executive Directors for a vote. An operation approved by the Executive Committee shall be deemed approved by the Board of Executive Directors in the absence of such request within the period specified by the Board of Executive Directors.

Audit Committee of the Board of Executive Directors

On June 30, 2016, the Board of Executive Directors created an Audit Committee of the Board of Executive Directors. The purpose of this committee is to assist the Board of Executive Directors in its oversight of (i) IDB Invest's accounting and financial reporting processes, and internal controls over financial reporting, (ii) the qualifications, independence, reports and written communications of IDB Invest's External Auditor, and (iii) the performance, work program and reports of IDB Invest's internal audit function, which is carried out by the IDB Office of the Executive Auditor (AUG).

Key Executives and Personnel

The Board of Executive Directors appoints the General Manager of IDB Invest by a four-fifths majority of the total voting power of the member countries, on the recommendation of the Chairman of the Board of Executive Directors and for such term as she/he shall indicate.

The General Manager is responsible for the ordinary business of IDB Invest under the direction of the Board of Executive Directors and the general supervision of the Chairman of the Board of Executive Directors. The General Manager is responsible for the organization, appointment, and dismissal of IDB Invest officers and staff in consultation with the Board of Executive Directors and the Chairman of the Board of Executive Directors. The General Manager may participate in meetings of the Board of Executive Directors but does not have the right to vote at these meetings. The departments that provide support for project and program activities include Investment Operations; Strategy, Development Effectiveness and Programming; Legal; Risk; and Finance and Administration. As of December 10, 2021, IDB Invest has approximately 382 staff and 92 consultants on-board.

The table below shows a list of key Executives and Management of IDB Invest as of December 10, 2021 (together, the "IDB Invest Management").

IDB Invest's Executives and Management

Executives	Position
James P. Scriven	General Manager
Management	Position
H. Rosemary Jeronimides	General Counsel
Gema Sacristán Postigo	Chief Investment Officer
Orlando Ferreira Caballero	Chief Finance and Administration Officer
Rachel Robboy	Chief Risk Officer
Alexandre Meira da Rosa	Chief Strategy Officer

Office of Evaluation and Oversight

The Office of Evaluation and Oversight, which reports directly to the Board of Executive Directors, undertakes independent and systematic evaluations of IDB Invest's strategies, policies, programs, activities, delivery support functions and systems, and disseminates the findings of such evaluations so that recommendations for improvement can be used in new operations. The Office of Evaluation and Oversight also provides oversight and support for the enhancement of the effectiveness of IDB Invest's evaluation system.

Ethics Matters

IDB Invest fosters an ethical work environment for its staff and is committed to safeguard the activities financed by IDB Invest from fraud and corruption.

Code of Ethics

IDB Invest requires employees to maintain the highest standards of professional and ethical conduct. To assist in preserving such institutional standards, IDB Invest has in place a Code of Ethics and Professional Conduct that applies to all employees. This Code, which is available on IDB Invest's website: <https://www.idbinvest.org/en/how-we-work/institutional-information>, contains guidelines concerning conflicts of interest and use of IDB Invest information, among other matters.

Office of Institutional Integrity

The Office of Institutional Integrity (OII), an independent office of the Inter-American Development Bank established to promote institutional integrity, provides services to IDB Invest and reports to its Board of Executive Directors, the Chairman of the Board and the General Manager. The OII complies with its mandate through the detection and investigation of fraud, corruption and misconduct and the support of initiatives for their prevention. Allegations of corrupt or fraudulent activities involving IDB Invest-financed activities or IDB Invest staff may be reported to the OII in person, by telephone, e-mail, facsimile, regular mail, or through the allegation forms available on the website: <https://www.iadb.org/en/about-us/departments/oii>. Such allegations may be made confidentially or anonymously.

External Auditors

The external auditors are appointed by the Board of Governors. In March 2012, the Board of Governors appointed KPMG LLP (KPMG) as the external auditors of IDB Invest for the five-year period 2012-2016, following a competitive bidding process. In April 2017, the Board of Governors reappointed KPMG as IDB Invest's external auditor for a second five-year term, covering fiscal years 2017 through 2021. Contracted fees for audit services provided to IDB Invest by KPMG in connection with the 2020 financial statement audit amounted to \$531,372. KPMG also provides audit services to trust funds administered by IDB Invest, for which contracted fees related to the 2020 audits amounted to \$94,492.

The Agreement Establishing the Inter-American Investment Corporation

The Establishing Agreement sets forth IDB Invest's purpose and functions, capital structure and organization. The Establishing Agreement outlines the operations in which IDB Invest may participate and prescribes limits and directives. The Establishing Agreement also establishes IDB Invest's status, legal capacity, immunities, and privileges, and regulates membership and the termination of IDB Invest's operations.

The Establishing Agreement may be amended only by decision of the Board of Governors by a majority representing at least four-fifths of the votes of the members and two-thirds of the number of Governors. The unanimous agreement of the Board of Governors is required for the approval of any amendment modifying: the right to withdraw from IDB Invest; the right to purchase shares in IDB Invest; or any changes to the limitation of liability of its member countries.

Under the Establishing Agreement, any member may withdraw from IDB Invest by notifying IDB Invest's principal office in writing of its intention to do so. Such withdrawal shall become effective on the date specified in the notice provided that it is not prior to six months from the date on which such notice was delivered to IDB Invest. Even after withdrawal, a member shall remain liable for all obligations to IDB Invest to which it was subject at the date of delivery of the withdrawal notice. In the event that a member withdraws from IDB Invest, IDB Invest and the member may agree on the terms for the repurchase of such member's shares. If an agreement is not reached, the repurchase price of the member's shares shall be equal to the book value determined by IDB Invest's audited financial statements.

Legal Status, Immunities and Privileges

The following is a summary of the principal provisions of the Establishing Agreement relating to the legal status, immunities, and privileges of IDB Invest in the territories of its members.

IDB Invest possesses legal personality and has full capacity to contract, acquire and dispose of immovable and movable property, and to institute legal and administrative proceedings.

Actions may be brought against IDB Invest only in a court of competent jurisdiction in the territories of a member country in which IDB Invest has an office; has appointed an agent for the purpose of accepting service or notice of process; or has issued or guaranteed securities. No action shall be brought against IDB Invest by member countries or persons acting for or deriving claims from member countries. However, such countries or persons may have recourse to such special procedures to settle controversies between IDB Invest and its member countries as prescribed in the Establishing Agreement.

The property and assets of IDB Invest are immune from all forms of seizure, attachment or execution before the delivery of final judgment against IDB Invest. Immunity for IDB Invest's property and assets also applies against searches, requisitions, confiscation, expropriation and any other form of taking or foreclosure by executive or legislative action. The archives of IDB Invest are also inviolable.

The Governors, Executive Directors, Alternates, officers and employees of IDB Invest have the following privileges and immunities:

- a. immunity from legal process with respect to acts performed by them in their official capacity, except when IDB Invest waives this immunity;
- b. when not local nationals, the same immunities from immigration restrictions, alien registration requirements and military service obligations and the same facilities as regards exchange provisions as are accorded by a member country to the representatives, officials, and employees of comparable rank of other member countries; and
- c. the same privileges in respect of travelling facilities as are accorded by member countries to representatives, officials, and employees of comparable rank of other member countries.

IDB Invest, its property, other assets, income, and the operations and transactions it carries out are immune from all taxation and from all customs duties in its member countries.

IDB Invest is also immune from any obligation relating to the payment, withholding or collection of any tax or duty. No tax is levied on or in respect of salaries and emoluments paid by IDB Invest to officials or

employees of IDB Invest who are not local citizens or other local nationals. No tax of any kind is levied on any obligation or security issued by IDB Invest, including any dividend or interest thereon, by whosoever held:

- a. which discriminates against such obligation or security solely because it is issued by IDB Invest; or
- b. if the sole jurisdictional basis for such taxation is the place or currency in which it is issued, made payable or paid, or the location of any office or place of business maintained by IDB Invest.

The IDB Group

Inter-American Development Bank (IDB)

The IDB is an international organization, with a separate governance structure, including its own Board of Governors and Board of Executive Directors, capital structure and balance sheet. The IDB's objective is to achieve economic and social development in a sustainable, climate-friendly way. The IDB's current strategic priorities include three development challenges: social inclusion and inequality, productivity and innovation, and economic integration; and three cross-cutting issues: gender equality and diversity, climate change and environmental sustainability, and institutional capacity and the rule of law.

Multilateral Investment Fund (MIF)

The Multilateral Investment Fund (now commercially known as IDB Lab), a trust fund with resources from IDB donor countries, is the innovation laboratory of the IDB Group. The purpose of IDB Lab is to drive innovation for inclusion in the Region, mobilizing financing, knowledge, and connections to co-create solutions capable of transforming the lives of vulnerable populations due to economic, social, or environmental conditions. IDB Lab offers a range of financing products, such as grants for technical assistance, loans and equity investments, as well as a combination of these tools to better support clients.

Independent Auditors' Report

The Board of Governors
Inter-American Investment Corporation:

We have audited the accompanying financial statements of Inter-American Investment Corporation (the Corporation), which comprise the balance sheets as of December 31, 2020 and 2019, the related income statements and the statements of comprehensive income/(loss), changes in capital and cash flows for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Inter-American Investment Corporation as of December 31, 2020 and 2019, and the results of its operations and its cash flows for the years then ended in accordance with U.S. generally accepted accounting principles.

Emphasis of Matter

As discussed in Note 2 to the financial statements, in 2020, the Corporation adopted new accounting guidance related to the recognition and measurement of credit losses under Accounting Standards Update (ASU) 2016-13, *Financial Instruments – Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments* and other related ASUs. Our opinion is not modified with respect to this matter.

Inter-American Investment Corporation

Notes to Financial Statements

1. Purpose

The Inter-American Investment Corporation (the IIC or IDB Invest), an international organization, was established in 1986 and began operations in 1989, and is owned by its member countries. These members include 26 regional developing member countries, all of which are located in Latin America and the Caribbean (the Regional Developing Member Countries), and 21 members from non-regional countries. The purpose of IDB Invest is to promote the economic development of its Regional Developing Member Countries by encouraging the establishment, expansion, and modernization of private enterprises in such a way as to supplement the activities of the Inter-American Development Bank (IDB). IDB Invest provides financing through its development related investments that include loans, investments in debt securities, guarantees and equity investments where sufficient capital is not otherwise available on adequate terms in the market. IDB Invest also arranges additional project funding from other investors and lenders, either through joint financing or through loan syndications, loan participations and guarantees. In addition, IDB Invest provides financial and technical advisory services to clients. IDB Invest is an autonomous international organization and a member of the Inter-American Development Bank Group (the IDB Group), which also includes the IDB and the Multilateral Investment Fund (commercially known as IDB Lab).

2. Summary of Significant Accounting Policies

Basis of presentation – These financial statements are prepared in accordance with generally accepted accounting principles in the United States of America (US GAAP). References to US GAAP issued by the Financial Accounting Standards Board (FASB) in these notes are to the FASB Accounting Standards Codification (ASC) or Accounting Standards Update (ASU).

All amounts presented in the accompanying financial statements and notes are expressed in United States dollars (USD, US\$ or \$), which is IDB Invest's functional and reporting currency.

Use of estimates – The preparation of the financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. A significant degree of judgment has been used in the determination of: the adequacy of the allowance for credit losses; the evaluation for other-than-temporary impairment on available-for-sale and held-to-maturity debt securities and equity investments; the fair value of investment securities, loan and equity investments, debt securities, derivative instruments and borrowings; the determination of the projected benefit obligations of the pension and postretirement benefit plans; the fair value of plan assets, and the funded status and net periodic benefit cost associated with these plans. There are inherent risks and uncertainties related to IDB Invest's operations including the potential impacts of changing economic conditions on IDB Invest's clients and the global investment markets that could have an adverse effect on the financial position of IDB Invest.

Cash and cash equivalents – Highly liquid investments purchased with original maturities of three months or less are considered cash equivalents. IDB Invest may hold cash deposits in excess of Federal Deposit Insurance Corporation (FDIC) insured limits. In addition, cash and cash equivalents include restricted cash for project related activities.

Liquid asset portfolio – IDB Invest's liquid asset portfolio consists of Cash and cash equivalents¹ and Investment securities. IDB Invest's overall portfolio management strategy is to provide liquidity and resources to finance development related investments and to invest in money market funds and debt securities issued by

¹ References to captions in the financial statements are identified by the name of the caption beginning with a capital letter every time they appear in the notes to the financial statements.

Inter-American Investment Corporation

Notes to Financial Statements

corporations, governments, supranationals and agencies (Investment securities). These investments may include fixed and floating rate bonds, notes, bills, certificates of deposit, commercial paper and mutual funds.

Securities are classified based on management's intention on the date of purchase. Purchases and sales of securities are recorded on a trade date basis. The first-in, first-out method is used to determine the cost basis of securities sold. Within the liquid asset portfolio, Investment securities are classified as trading and are recorded at fair value with unrealized gains and losses reported in income from Gain/(loss) from liquid assets, net. For the year ended December 31, 2019, Investment securities classified as available-for-sale are carried at fair value with net unrealized gains or losses reported in Other comprehensive income/(loss). Available-for-sale debt securities are evaluated for other-than-temporary impairment. For impairments that are deemed to be other-than-temporary, the credit portion of the loss is recognized in income and the non-credit portion is recognized in Other comprehensive income/(loss). Interest and dividends on securities, amortization of premiums, accretion of discounts, and realized gains and losses from both trading and available-for-sale debt securities are reported in income from Gain/(loss) from liquid assets, net.

As a result of management's conclusion that IDB Invest's business model requires greater available liquidity to meet strategic business needs, IDB Invest did a one-time reclassification of its remaining available-for-sale debt securities into the trading portfolio on January 1, 2020. Unrealized gains of \$3.2 million previously recorded to Accumulated other comprehensive income were recognized in income on the date of transfer.

Loans and development related debt securities (Development related debt investments) – Loans and debt securities in the development related investments portfolio are recorded when disbursed. As described in Note 4, these development related debt investments are carried at amortized cost or fair value through income, depending on the nature of the instrument. Debt securities designated as held-to-maturity (HTM) and carried at amortized cost and loans carried at amortized cost are adjusted for an allowance for expected credit losses. IDB Invest utilizes the net asset value (NAV) as a practical expedient for the fair value measurement for certain development related debt securities.

For credit monitoring and portfolio management purposes, the development related debt investments portfolio includes loans and debt securities. Loans are classified into three portfolio segments: corporates, financial institutions and project finance. Debt securities are classified as corporate securities.

IDB Invest's loans may be secured or unsecured. Secured loans may be guaranteed by mortgages and other forms of collateral security, as well as third-party guarantees. IDB Invest also enters into standalone insurance contracts as a form of credit enhancements that are generally not transferable. IDB Invest estimates its recovery assets under these contracts and records them as Receivables and other assets in the balance sheets and as Interest and other income in the income statements.

Guarantees – IDB Invest offers credit guarantees covering, on a risk-sharing basis, third party obligations on loans undertaken for or securities issued in support of projects located within Regional Developing Member Countries to enhance their credit standing and enable them to complete a wide variety of business transactions. These financial guarantees are commitments issued by IDB Invest to guarantee payment performance by a borrower to a third party. IDB Invest's policy for requiring collateral security with respect to these instruments and the types of collateral security held is generally the same as for loans. Guarantees are regarded as issued when IDB Invest executes the guarantee agreement, outstanding when the underlying financial obligation of the third party is incurred and called when IDB Invest's obligation under the guarantee has been invoked. There are two obligations associated with the guarantees: (1) the stand-ready obligation to perform; and (2) the contingent obligation to make future payments. The stand-ready obligation to perform is recognized at the issuance date at fair value. The contingent liability associated with the financial guarantee is recognized following the current expected credit losses (CECL) methodology. Any stand-ready and contingent liabilities associated with the guarantees are included in Payables and other liabilities in the balance sheets. The expense related to the contingent liability is recorded in (Provision)/release of provision for credit losses on development related investments in the income statements. Guarantee fee income is recognized as IDB Invest is released from risk and its stand-ready obligation to perform and recorded in Interest and other income in the income statements. In the event the guarantees are called, the amount disbursed is recorded as a loan and reserves are established based on the expected credit loss.

Inter-American Investment Corporation

Notes to Financial Statements

Undisbursed commitments – Under CECL, IDB Invest estimates expected credit losses over the contractual period in which it is exposed to credit risk through a contractual obligation to extend credit unless management has the discretion to cancel the commitment at any time (unconditionally cancellable). The estimate considers the likelihood that funding will occur and the expected credit losses on estimated funded commitments over its estimated life. Liability for off-balance sheet credit losses is recorded as a contingent liability and included in Payables and other liabilities in the balance sheets. The expense related to the contingent liability is recorded in (Provision)/release of provision for credit losses on development related investments in the income statements.

Allowance for credit losses – The allowance for expected credit losses considers historical credit loss information that is adjusted for current conditions and reasonable and supportable (R&S) forecasts of future economic conditions in the related portfolio as of the balance sheet date and is recorded as a reduction of the respective development related debt investments carried at amortized cost (loans and HTM debt securities) and as a contingent liability for undisbursed commitments and guarantees (related off-balance sheet credit exposures). Changes in the allowance for credit losses are recorded through the (Provision)/release of provision for credit losses in the income statements.

Expected credit losses are estimated over the contractual term of the development related debt investment in accordance with its current estimate of the collectability risk over the contractual life of such asset and for related off-balance sheet exposures over the contractual period in which IDB Invest is exposed to credit risk via a present contractual obligation to extend credit. The contractual term excludes expected extensions, renewals, and modifications unless either of the following applies: (i) management has a reasonable expectation at the reporting date that a troubled debt restructuring (TDR) will be executed with an individual borrower or (ii) the extension or renewal options are included in the original or modified contract at the reporting date and are not controlled by IDB Invest (not unconditionally cancellable by IDB Invest). Expected credit losses are estimated over the contractual term adjusted for expected prepayments. Prepayment assumptions are based on historical data from IDB's private sector portfolio given the common portfolio characteristics that include borrower's country, risk rating and industry sector.

IDB Invest assesses credit risk for development related debt investments using a series of sector specific scorecards to determine borrower risk ratings. IDB Invest's portfolio segments — corporates, financial institutions and project finance — are aligned to the scorecards.

The major credit risk factors considered for a project finance development related debt investment may be grouped into the following categories: political risk, commercial or project risk, technical and construction risk, and financial risk. Political risks can be defined as the risks to a project's financing emanating from governmental sources, either from a legal or regulatory perspective. Commercial or project risks are related to the construction or completion risks, economic or financial viability of a project and operational risks. Financial risks consider the project's exposures to cash flow generation, interest rate and foreign currency volatility, inflation risk, liquidity risk, and funding risk.

The major credit risk factors considered for a development related debt investment to financial institutions considers country-related risk including regulatory, competition, government support and macro-economic risks, which acts as an anchor for the risk assessment as a whole. Additionally, the rating scorecard assesses the following institution-specific factors: capital adequacy, asset quality, operating policies & procedures and risk management framework; quality of management and decision making; earnings and market position, liquidity and sensitivity to market risk; quality of regulations and regulatory agencies; and potential government or shareholder support.

The major credit risk factors considered for corporate development related debt investments are country and industry risks, business and market risks, an assessment of the borrower's management, and financial risks, including a qualitative assessment of financial risks and a quantitative assessment of financial ratios. After consideration of these borrower specific characteristics, extraordinary support from shareholders or from the government may be considered if applicable.

The CECL methodology incorporates Point in Time (PIT) term structures for probability of default (PD), loss given default (LGD) term structures and exposure at default (EAD). In addition, the methodology incorporates forward looking conditioning, which takes into consideration current market conditions, macroeconomic

Inter-American Investment Corporation

Notes to Financial Statements

forecasts and their corresponding impact to the PIT PDs and LGDs. The macroeconomic forecasts in the CECL model include various scenarios, where each scenario represents a different state of the economy in the R&S period. For each scenario, a lifetime loss rate for each instrument is calculated using the appropriate PD and LGD for every quarter for the remaining life of the instrument. The results are then multiplied by the instrument's amortized cost. If multiple scenarios are considered, then results are weighted.

Management currently considers the R&S period to be three years, after which the model reverts to historical averages for long-term values over a two year period. IDB Invest uses PDs published by international rating agencies for similarly rated credits to determine PDs.

To augment the quantitative process described above, qualitative adjustments arising from information lags implicit in the quantitative loss estimation models, known model or data limitations, significant changes in portfolio composition or lending operations and uncertainty associated with economic and business conditions are applied as necessary based on management judgment.

The recent global crisis triggered by the COVID-19 pandemic has had a direct effect on economies within IDB Invest's Regional Developing Member Countries. The crisis affected risk parameters of the portfolio, such as internal ratings in specific industries and countries. These parameters are considered in the CECL methodology, as well as the deterioration in the macroeconomic forecasts during the R&S period and mean reverting period to historical losses.

For individually assessed development related debt investments, the determination of the allowance for identified probable losses reflects management's best judgment of the creditworthiness of the borrower and is established based upon the periodic review of individual development related debt investments. This estimate considers all available evidence including, as appropriate, the present value of the expected future cash flows discounted at the development related debt investment's contractual effective rate, the fair value of collateral less disposal costs, and other market data. Due to the nature of the development related debt investments, secondary market values are usually not available.

IDB Invest considers a development related debt investment impaired when, based on current information and events, it is probable that IDB Invest will be unable to collect all amounts due according to the investment's contractual terms. Information and events considered in determining that an investment is impaired include the borrower's financial difficulties, the borrower's competitive position in the marketplace, the risk associated with the underlying collateral, the willingness and capacity of the sponsor who organized the project to support the investment, the borrower's management team, as well as geopolitical conflict and macroeconomic crises.

A modification is considered a TDR when the borrower is experiencing financial difficulty and IDB Invest has granted a concession to the borrower that it otherwise would not grant in order to maximize recoveries on the existing development related debt investment. A development related debt investment restructured under a TDR is considered impaired, until its extinguishment, but it does not need to be disclosed as such after the year it was restructured, if the restructuring agreement specifies an interest rate equal to or greater than the rate that IDB Invest was willing to accept at the time of the restructuring for a new investment with comparable risk, and the investment is not impaired based on the terms specified in the restructuring agreement. In light of the COVID-19 pandemic, IDB Invest implemented COVID-19 loan modification measures in response to requests received from borrowers for short-term modifications such as payment deferrals under existing loans that meets the Interagency Statement². Additional information is included in Note 4.

Development related debt investments are partially or fully written off when IDB Invest has exhausted all possible means of recovery through a legal agreement, final bankruptcy settlement or when IDB Invest has determined with a reasonable degree of certainty that the relevant amount will not be collected. IDB Invest reduces the investment and related allowance for credit losses. Such reductions in the allowance are partially offset by recoveries, if any, associated with previously written off development related debt investments.

² The Interagency Statement on Loan Modifications and Reporting for Financial Institutions Working with Customers Affected by the Coronavirus was issued jointly by the Board of Governors of the Federal Reserve System, the Federal Deposit Insurance Corporation, the National Credit Union Administration, the Office of the Comptroller of the Currency, and the Consumer Financial Protection Bureau.

Inter-American Investment Corporation

Notes to Financial Statements

Revenue recognition on development related debt investments – Interest on development related debt investments is included in Interest and other income from development related investments, net in the income statements. Accrued interest income receivable is presented separately from development related debt investments and is included in the balance sheets in Receivables and other assets. IDB Invest has elected the practical expedient permissible under CECL to not record an allowance for credit losses on accrued interest receivable as it has a substantive nonaccrual policy.

Development related debt investments are generally placed in nonaccrual status when collectability is in doubt or payments of interest or principal are past due more than 90 days. IDB Invest does not accrue income and ceases amortization of any premiums or discounts on development related debt investments in nonaccrual status. Any uncollected interest accrued on a development related debt investment placed in nonaccrual status is reversed out of income and is thereafter recognized as income in Interest and other income in the income statements when the payment is received. A development related debt investment is returned to accrual status once management has concluded that the borrower has demonstrated its ability to make periodic interest and principal payments.

Development related debt investment fees and costs, net, are deferred and amortized over the life of the asset on a straight-line basis. Amortization of the net deferred fees and costs is included in Interest and other income in the income statements thereby approximating how fees and costs would be reflected under the effective interest method. The net deferred amounts are included in Payables and other liabilities in the balance sheets.

Equity investments – Equity investments include certain ownership interests in limited partnerships and similar fund structures (LPs) and direct equity investments primarily in small and medium-sized enterprises and financial institutions.

Equity investments under ASC 321, *Investments–Equity Securities*, are accounted for at fair value through the income statements except for those investments without a readily determinable fair value that are accounted for under the cost-based measurement alternative.

IDB Invest utilizes the net asset value (NAV) reported by the fund managers as a practical expedient for the fair value measurement of interests in LPs. The NAVs that have been reported by the fund manager are derived from the fair values of the underlying investments.

Equity investments accounted for under the cost-based measurement alternative are recorded at cost less impairment plus or minus adjustments resulting from observable price changes in orderly transactions for the identical investment or a similar investment of the same issuer. Adjustments related to impairment and observable price changes, if any, are recorded in Unrealized gain/(loss) from changes in fair value and measurement adjustments, net in the income statements. IDB Invest reassesses periodically whether these equity investments continue to qualify for this cost-based measurement alternative. IDB Invest may subsequently elect to measure an equity investment at fair value; such election is irrevocable, and any resulting gains or losses would be recorded through income at the time of election and thereafter.

Equity investments accounted for under the cost-based measurement alternative are assessed for impairment periodically based on the latest financial information, operating performance and other relevant information including macroeconomic conditions, specific industry trends, the historical performance of the company, and IDB Invest's intent to hold the investment for an extended period. When impairment is identified, the investment is written down to its estimated fair value, which becomes the new carrying value for the investment.

Revenue recognition on equity investments – Dividends and profit participations received from equity investments are recorded as income and reported as Realized gain/(loss) from sales, dividends and other income, net in the income statements on a cash basis when the distributions are received. Gains or losses on the sale or redemption of equity investments accounted for under the cost-based measurement alternative are recorded, at disposition, as income/(loss) and reported in Realized gain/(loss) from sales, dividends, and other income, net in the income statements.

Inter-American Investment Corporation

Notes to Financial Statements

For equity investments accounted for at fair value, unrealized gains and losses are recorded as Unrealized gain/(loss) from changes in fair value and measurement adjustments, net in the income statements. Disbursements and distributions are recorded as changes to the outstanding balance of these equity investments and reflected as such in Equity investments in the balance sheets.

Variable interest entities – ASC 810, *Consolidation*, provide for consolidation when a reporting entity is the primary beneficiary of a variable interest entity (VIE), or if an entity does not meet the definitional elements of a VIE, consolidation is required if a reporting entity has a controlling financial interest or holds a majority voting interest in an entity. Additional information about VIEs is included in Note 4.

Revenue recognition for service fees – IDB Invest recognizes income for services provided to related parties. A series of service level agreements (SLAs) define the nature of the services and corresponding fees for services provided to the IDB. The most significant of these services relates to loan origination and servicing performed on the IDB's behalf. Revenue is recognized as IDB Invest fulfills its performance obligation over the annual service period. Similarly, IDB Invest receives project administration and general administrative fees for services provided to several special purpose trust funds affiliated with IDB Invest or the IDB. Additional information about related party transactions is included in Note 13.

Risk management and use of derivative instruments – IDB Invest uses derivative instruments primarily for market risk management purposes in connection with its principal business activities. IDB Invest enters into cross currency and interest rate swaps to manage foreign exchange and interest rate risks arising from mismatches between its development related debt investments and its borrowing liabilities. None are designated as hedging instruments as meant by ASC 815, *Derivatives*.

Derivatives are recognized in the balance sheet at their fair value and are classified as either Derivative assets or Derivative liabilities, depending on their net fair value amount. Changes in fair value of derivatives are recorded in Gain/(loss) from changes in fair value on non-trading portfolios and foreign exchange transactions, net in the income statements. Additional information about derivatives is included in Note 8.

Fixed and intangible assets – Fixed and intangible assets (software costs) are presented at cost less accumulated depreciation and amortization and are included in Receivables and other assets in the balance sheets. Depreciation and amortization are recognized using the straight-line method over the estimated useful lives of the assets that range from three to seven years.

Leases – In accordance with ASC 842, *Leases*, IDB Invest recognizes lease assets and lease liabilities in the balance sheets. IDB Invest follows lessee accounting related to its operating leases for office space with the IDB at headquarters and in its Regional Developing Member Countries.

IDB Invest recognizes a right-of-use asset and lease liability for its operating leases. The right-of-use assets are nonmonetary assets included in Receivable and other assets in the balance sheets and are amortized based on each period's discounted cash flows, and the lease liabilities are monetary liabilities included in Payables and other liabilities in the balance sheets and are reduced based on each period's discounted cash flows. IDB Invest remeasures its lease liabilities originating in currencies other than US\$ at the current market exchange rate in effect at each reporting date. Operating lease expense is recorded on a straight-line basis and included in Administrative expenses in the income statements. Additional information related to IDB Invest's leases is included in Notes 5, 6 and 12.

Borrowings – To ensure funds are available for its operational liquidity needs, IDB Invest accesses the international capital markets, offering its debt securities to investors. IDB Invest's borrowings are carried at amortized cost or fair value in the balance sheets.

For those borrowings carried at amortized cost, the amortization of premiums and accretion of discounts is calculated following a methodology that approximates the effective interest method and is included in Borrowings expense in the income statements. The unamortized balance of the borrowing issuance costs

Inter-American Investment Corporation

Notes to Financial Statements

related to a recognized debt liability is included as a direct deduction from the carrying amount of the Borrowings in the balance sheets. Interest expense on all borrowings is recognized on an accrual basis and is included in Borrowings expense in the income statements.

For those borrowings carried at fair value, fair value changes are reported in accordance with ASU 2016-01, *Financial Instruments*. Accordingly, the change in fair value resulting from changes in instrument-specific credit risk is reported in Net fair value adjustments on borrowings attributable to changes in instrument-specific credit risk in the statements of other comprehensive income, while the remaining change in fair value is reported in Gain/(loss) from changes in fair value on non-trading portfolios and foreign exchange transactions, net and Borrowings expense in the income statements. Additional information about borrowings is included in Note 7.

Non-trading portfolio – IDB Invest's non-trading portfolio includes development related debt investments composed of loans and debt securities, derivatives, and borrowings accounted for at fair value. The reported income volatility resulting from these non-trading financial instruments is not fully representative of the underlying economics of the transactions as IDB Invest does not intend to actively trade such instruments. Therefore, Gain/(loss) from changes in fair value on non-trading portfolios and foreign currency transactions, net, are reported separately from Income/(expense) from development related investments, liquid assets and other income, net of borrowing expenses in the income statements.

Remeasurements of foreign currency transactions – Monetary assets and liabilities denominated in currencies other than the US\$ are translated into US\$ at market exchange rates prevailing at the balance sheet dates. Income and expenses are translated at the market exchange rate in effect at the transaction date or at monthly average rates. Resulting gains and losses from remeasurements are generally included in Gain/(loss) from changes in fair value on non-trading portfolios and foreign exchange transactions, net in the income statements.

Fair value measurements – The Codification requires entities to disclose information about recurring and non-recurring fair value measurements, as well as the fair value of financial instruments.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transfer between market participants at the measurement date under current market conditions. Fair value measurement further assumes that a transaction to sell the asset or assume a liability takes place either in the principal market or, in the absence of a principal market, in the most advantageous market for the asset or liability.

In determining fair value, IDB Invest uses various valuation approaches, including market, income or cost approaches. The Codification establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of IDB Invest. Unobservable inputs are inputs that reflect the best information available about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The hierarchy is broken down into three levels based on the reliability of inputs as follows:

- Level 1—Unadjusted quoted prices for identical assets or liabilities in active markets.

Assets and liabilities utilizing Level 1 inputs include debt securities and equity investments that are actively traded and primarily include debt securities of the United States government and agencies.

- Level 2—Valuations based on quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities that are not actively traded; or pricing models for which all significant inputs are observable, directly or indirectly, for substantially the full term of the asset or liability.

Inter-American Investment Corporation

Notes to Financial Statements

Assets and liabilities utilizing Level 2 inputs include money market funds, investment securities that are not actively traded, and investments in obligations of banks, governments and agencies or instrumentalities other than the United States, sovereigns, local and regional governments, corporate bonds, and structured borrowings.

- Level 3—Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

Assets utilizing Level 3 inputs include loans, equity investments and development related debt securities and borrowings that are measured for impairment or disclosed at fair value.

The availability of observable inputs is affected by a wide variety of factors, including, for example, the type of product, and other characteristics particular to the transaction. To the extent fair value is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3.

Fair value for the majority of IDB Invest's financial instruments is derived using pricing models. Pricing models take into account the contract terms (including maturity) as well as multiple inputs, including, where applicable, interest rate yield curves, credit spreads, creditworthiness of the counterparty, option volatility, and currency rates. In accordance with ASC 820, *Fair Value Measurements* (ASC 820), the impact of IDB Invest's own credit spreads would also be considered when measuring the fair value of liabilities. Where appropriate, valuation adjustments are made to account for various factors, including bid-ask spreads, credit quality, and market liquidity. These adjustments are applied on a consistent basis and are based upon observable inputs, where available.

Fair value option – The Fair Value Option (FVO) under ASC 825 permits the measurement of eligible financial assets, financial liabilities and firm commitments at fair value on an instrument-by-instrument basis, that are not otherwise permitted or required to be accounted for at fair value under other accounting standards. IDB Invest has elected the FVO for the following classes of financial assets and liabilities: i) certain development related investments in debt securities that IDB Invest does not have the ability and intent to hold until maturity, ii) certain development related investments with special features, iii) investments that would otherwise be accounted for under the equity method, iv) certain development related investments in equity securities that do not have quoted market prices, v) certain hybrid instruments that would otherwise require bifurcation of the host and embedded derivative, and vi) borrowings that are economically hedged with derivative financial instruments.

Financial assets and borrowings elected under the FVO are measured at fair value on a recurring basis and changes in fair value of these financial instruments are included in Gain/(loss) from changes in fair value on non-trading portfolios and foreign exchange transactions, net in the income statements. Interest income on these financial instruments is recognized on an accrual basis, where applicable.

Loan participations and co-financing arrangements – IDB Invest mobilizes funds from commercial banks and other financial institutions (Participants) by facilitating loan participations, without recourse. These loan participations are administered and serviced by IDB Invest on behalf of the Participants in exchange for a fee. Such fees are recognized upon receipt and are reported as Mobilization fees and other income in the income statements. IDB Invest also services co-financing arrangements with IDB Group related parties in exchange for a fee recognized upon receipt and are reported as Services fees from related parties in the income statements. The disbursed and outstanding balances of loan participations and co-financing arrangements that meet the applicable accounting criteria for sales are not included in IDB Invest's balance sheets.

Pension and postretirement benefits – The IDB Group has three defined benefit pension plans: The Staff Retirement Plan (SRP), the Complementary Staff Retirement Plan (CSR), and the Local Retirement Plan (LRP) (the Pension Plans and LRP), covering staff of the IDB Group entities. Under the Pension Plans and LRP, benefits are based on years of service and level of compensation, and are funded by contributions from

Inter-American Investment Corporation

Notes to Financial Statements

employees, IDB Invest and the IDB, in accordance with the provisions of the Pension Plans and LRP. Any and all contributions to the Pension Plans and LRP are irrevocable and are held separately in retirement funds solely for the payment of benefits under the Pension Plans and LRP.

The IDB Group also provides certain health care, tax reimbursement and other benefits to retirees. Staff who retire, receive a monthly pension from the IDB or IDB Invest, and meet certain requirements, are eligible for postretirement benefits under the Postretirement Benefits Plan (PRBP). Retirees contribute toward the PRBP based on an established premium schedule. IDB Invest and the IDB contribute the remainder of the actuarially determined cost of future health care and other benefits. While all contributions and all other assets and income of the PRBP remain the property of IDB Invest and the IDB, they are held and administered separately and apart from the other property and assets of each employer solely for the purpose of payment of benefits under the PRBP.

Since both the IDB and IDB Invest are sponsors of the Pension Plans and the PRBP, each employer presents its respective share of these plans. The amounts presented reflect IDB Invest's proportionate share of costs, assets, and obligations of these Pension Plans and PRBP in accordance with ASC 715, *Compensation – Retirement Benefits*.

The service cost component of net periodic benefit costs allocated to IDB Invest is included in Administrative expenses and the other components are included in Other components of pension benefit costs, net in the income statements. The funded status of the Pension Plans and the PRBP is included in Receivables and other assets when the respective plan is in a funded status, and included in Payables and other liabilities when the respective plan is in an unfunded status in the balance sheets. Additional information about the Pension Plans and PRBP is included in Note 14.

Taxes – IDB Invest, its property, other assets, income, and the operations and transactions it carries out pursuant to the Agreement Establishing the Inter-American Investment Corporation are immune from all taxation and from all custom duties in its member countries. IDB Invest is also immune from any obligation relating to the payment, withholding or collection of any tax or duty in its member countries.

Accounting and financial reporting developments – On January 1, 2020, IDB Invest early adopted ASU 2016-13, *Financial Instruments – Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments* and other related ASUs, which replaces the incurred loss methodology with an expected loss methodology that is referred to as the current expected credit loss (CECL) methodology. The measurement of expected credit losses under the CECL methodology is applicable to financial assets measured at amortized cost, including loans and held-to-maturity debt securities, as well as off-balance sheet undisbursed loan commitments and financial guarantees. IDB Invest adopted ASC 326 using the modified retrospective method and recorded a net decrease to retained earnings of \$46.2 million as of January 1, 2020 for the cumulative effect of adopting CECL.

In August 2018, the FASB issued ASU 2018-13, *Fair Value Measurement – Changes to the disclosure requirements for fair value measurement*. The amendments in this Update impact disclosure requirements for all entities that are required, under existing US GAAP, to make disclosures about recurring or nonrecurring fair value measurements. This Update eliminates, modifies, and adds to the existing disclosures. For IDB Invest, this Update is effective on January 1, 2020. This Update did not have a material impact on IDB Invest's financial statements.

In August 2018, the FASB issued ASU 2018-14, *Compensation – Retirement Benefits - Defined Benefit Plans – Changes to the disclosure requirements for defined benefit plans*. The amendments in this Update impact disclosure requirements for all employers that sponsor defined benefit pension or other postretirement plans by eliminating existing disclosures that are no longer deemed to be relevant while at the same time adding new disclosures deemed to improve disclosures and clarifying existing disclosures. Among the new disclosures, the explanation of the reasons for significant gains and losses related to changes in the benefit obligation for the

Inter-American Investment Corporation

Notes to Financial Statements

period will be required. For IDB Invest, this Update is effective on January 1, 2020. This Update did not have a material impact on IDB Invest's financial statements.

In August 2018, the FASB issued ASU 2018-15, *Intangibles – Goodwill and other – Internal-use software – Customer's accounting for implementation costs incurred in a cloud computing arrangement that is a service contract*. The amendments in this Update result in consistent capitalization of implementation costs of a hosting arrangement that is a service contract and implementation costs incurred to develop or obtain internal-use software and hosting arrangements that include an internal-use software license. For IDB Invest, this Update is effective on January 1, 2020. This Update did not have a material impact on IDB Invest's financial statements.

In January 2020, the FASB issued ASU 2020-01, *Investments—Equity Securities (Topic 321), Investments—Equity Method and Joint Ventures (Topic 323), and Derivatives and Hedging (Topic 815) Investments*. The amendments in this Update clarify the interaction of the accounting for equity securities under Topic 321 and investments accounted for under the equity method of accounting in Topic 323 and the accounting for certain forward contracts and purchased options accounted for under Topic 815. For IDB Invest, this Update is effective on January 1, 2021 and is not expected to have a material impact on IDB Invest's financial statements.

In March 2020, the FASB issued ASU 2020-04, *Reference Rate Reform (Topic 848)*. This Update provides temporary optional expedients and exceptions to the US GAAP guidance on contract modifications and hedge accounting to ease the financial reporting burden of the expected marked transition from LIBOR and other interbank offered rates. To be eligible for the optional expedients, modifications of contractual terms that change (or have the potential to change) the amount or timing of contractual cash flows must be related to replacement of a reference rate. IDB Invest is exposed to LIBOR through its LIBOR-based development related debt investments, investment securities, borrowings and swaps. The amendments in this Update may be implemented any time before December 31, 2022. IDB Invest has elected to apply the optional expedients related to contract modifications effective December 31, 2020.

In April 2020, US federal banking regulators in consultation with the FASB issued the Interagency Statement that allows lenders to conclude that loan modifications related to COVID-19 meeting certain conditions are not TDRs. The guidance clarifies that it is not necessary to consider the impact of the COVID-19 pandemic on the financial condition of a borrower in connection with a short-term COVID-19 related modification, provided the borrower is current at the date the modification measures are implemented. COVID-19 related modifications that do not meet the provisions of the Interagency Statement will be assessed for TDR classification. IDB Invest elected to apply the guidance. The adoption of the guidance did not have a material impact on IDB Invest's financial statements.

In October 2020, the FASB issued ASU 2020-08, *Codification Improvements to Subtopic 310-20, Receivables - Nonrefundable Fees and Other Costs*. The amendments in this Update state that for callable bonds purchased at a premium, an entity must reevaluate to ensure that the premium is not amortized to the earliest call date. For IDB Invest, this Update is effective is on January 1, 2021 and is not expected to have a material impact on IDB Invest's financial statements.

Debt securities		
Corporate securities	967,805	677,372
Agency securities	309,103	136,336
Government securities	114,850	127,911
Supranational securities	70,225	23,223
Total debt securities	1,461,983	964,842
Total	\$ 2,120,628	\$ 1,360,413

⁽¹⁾ Includes restricted cash of \$22.6 million as of December 31, 2020 (\$523 thousand as of December 31, 2019).

The total income from Liquid assets is summarized below (US\$ thousands):

	Year ended December 31	
	2020	2019
Interests and dividends, net	\$ 15,928	\$ 27,092
Gain/(loss) from changes in fair value and gain/(loss) from foreign exchange transactions, net	6,382	10,828
Total	\$ 22,310	\$ 37,920

Net unrealized gains recognized in income for the year ended December 31, 2020 relating to trading securities still held as of December 31, 2020 were \$7.6 million (\$193 thousand net unrealized gains for the year ended December 31, 2019).

The maturity structure of debt securities included in Liquid assets is as follows (US\$ thousands):

	December 31, 2020	December 31, 2019
Less than one year	\$ 608,857	\$ 412,570
Between one and five years	853,126	552,272
Total	\$ 1,461,983	\$ 964,842

As of December 31, 2020, all investment securities are classified as trading due to the one-time reclassification explained in Note 2. The fair value of available-for-sale debt securities as of December 31, 2019 was as follows (US\$ thousands):

	December 31, 2019			
	Amortized cost	Gross unrealized		Fair value
		gains	losses	
Corporate securities	\$ 410,019	\$ 3,014	\$ (328)	\$ 412,705
Government securities	80,046	184	(6)	80,224
Agency securities	70,139	115	(11)	70,243
Supranational securities	23,042	183	(2)	23,223
Total	\$ 583,246	\$ 3,496	\$ (347)	\$ 586,395

Inter-American Investment Corporation

Notes to Financial Statements

The length of time that individual available-for-sale debt securities were in a continuous unrealized loss position as of December 31, 2019 was as follows (US\$ thousands):

	December 31, 2019					
	Less than 12 months		12 months or more		Total	
	Fair value	Unrealized loss	Fair value	Unrealized loss	Fair value	Unrealized loss
Corporate securities	\$ 34,975	\$ (51)	\$ 74,611	\$ (277)	\$ 109,586	\$ (328)
Government securities	6,981	(6)	—	—	6,981	(6)
Agency securities	—	—	52,416	(11)	52,416	(11)
Supranational securities	—	—	7,997	(2)	7,997	(2)
Total	\$ 41,956	\$ (57)	\$ 135,024	\$ (290)	\$ 176,980	\$ (347)

Changes in available-for-sale debt securities recognized in Other comprehensive income/(loss) are as follows (US\$ thousands):

	Year ended December 31	
	2020	2019
Unrealized gain/(loss) during the period	\$ —	\$ 10,759
Reclassification of (gain)/loss to net income/(loss)	(3,172)	(959)
Total recognized in other comprehensive income/(loss) related to available-for-sale investment securities	\$ (3,172)	\$ 9,800

Sales of available-for-sale debt securities amounted to \$293.2 million during the year ended December 31, 2019. Gross realized gains were \$884 thousand and there were \$4 thousand gross realized losses from the sale of available-for-sale debt securities during the year ended December 31, 2019.

During the year ended December 31, 2019, there were no other-than-temporary impairment losses on debt securities that IDB Invest would be more likely than not required to sell before recovery of the amortized cost.

4. Development Related Investments

IDB Invest has specific metrics for concentrations and it monitors the development related investments for credit performance, market risk and any potential related effects of geographic or sectorial concentrations. IDB Invest's development related investments are the result of lending and investing activities that include loans, debt securities, equity investments, and guarantees that promote the economic development of IDB Invest's Regional Developing Member Countries through the establishment, expansion and modernization of private enterprises. All development related investments are individually evaluated for purposes of monitoring and evaluating credit performance and market risk.

Inter-American Investment Corporation

Notes to Financial Statements

Variable rate loans generally reprice within one year. Base rates of variable rate loans reset at each repayment date at least annually or more frequently, but loan margins generally remain constant over the life of the variable rate loan.

Development related debt investments

An aging analysis, based on contractual terms, for development related debt investment at cost as of December 31, 2020 and December 31, 2019 is as follows (US\$ thousands):

	December 31, 2020				
	1-90 days past due	>90 days past due	Total past due	Total current	Total portfolio
Loans	\$ 8,049	\$ 17,774	\$ 25,823	\$ 3,785,223	\$ 3,811,046
Debt securities	—	—	—	417,226	417,226
Total	\$ 8,049	\$ 17,774	\$ 25,823	\$ 4,202,449	\$ 4,228,272

	December 31, 2019				
	1-90 days past due	>90 days past due	Total past due	Total current	Total portfolio
Loans	\$ 6,530	\$ 14,516	\$ 21,046	\$ 2,049,683	\$ 2,070,729
Debt securities	—	—	—	376,829	376,829
Total	\$ 6,530	\$ 14,516	\$ 21,046	\$ 2,426,512	\$ 2,447,558

The recorded investment in nonaccrual loans at amortized cost is summarized as of December 31, 2020 and December 31, 2019 as follows (US\$ thousands):

	December 31, 2020			Year ended December 31, 2020		
	Nonaccrual			> 90 days past due and accruing	Interest income recognized on nonaccrual status	Accrued interest income written off
	Past due	Current	Total			
Loans	\$ 21,185	\$ 11,192	\$ 32,377	\$ —	\$ 720	\$ 206
Total	\$ 21,185	\$ 11,192	\$ 32,377	\$ —	\$ 720	\$ 206

	December 31, 2019			Year ended December 31, 2019		
	Nonaccrual			> 90 days past due and accruing	Interest income recognized on nonaccrual status	
	Past due	Current	Total			
Loans	\$ 19,415	\$ 11,851	\$ 31,266	\$ 1,501	\$ 857	
Total	\$ 19,415	\$ 11,851	\$ 31,266	\$ 1,501	\$ 857	

There were no debt securities in nonaccrual status as of December 31, 2020 nor December 31, 2019.

A current nonaccrual development related debt investment is a financial instrument that was placed in nonaccrual status, where the borrower is now current on payments, but for which ongoing monitoring is necessary to determine whether the borrower has sufficiently demonstrated performance before returning the development related debt investment to accrual status. There were no development related debt investments at amortized cost classified as nonaccrual without a related allowance for credit losses as of December 31, 2020 (none as of December 31, 2019).

Inter-American Investment Corporation

Notes to Financial Statements

The investment in impaired loans was \$32.4 million as of December 31, 2020 (\$31.3 million as of December 31, 2019). The average investment in impaired loans was \$30.4 million for the year ended December 31, 2020 (\$30.3 million for the year ended December 31, 2019). The total allowance related to impaired loans was \$15.0 million as of December 31, 2020 (\$12.8 million as of December 31, 2019). As of the years ended December 31, 2020 and 2019, all loans classified as impaired were in nonaccrual status.

As of December 31, 2020, there was one operation in the portfolio considered a TDR with an outstanding balance of \$6.4 million and individually assessed allowance for credit losses of \$1.9 million (none as of December 31, 2019). IDB Invest does not have commitments to extend additional funds to borrowers whose terms have been modified in a TDR.

During 2020, IDB Invest implemented loan modification measures in response to requests received from borrowers for short-term modifications as a result of the COVID-19 pandemic. As of December 31, 2020, IDB Invest evaluated loans with a total outstanding balance of \$66 million under the Interagency Statement and determined that the modifications are not considered TDRs. These loans were fully performing at the time the measures were implemented. The reliefs provided are short-term arrangements of principal deferrals amounting to \$5 million. The loans continue to accrue interest during the deferral period and are not reported as past due nor in nonaccrual status. IDB Invest continues to estimate the allowance for expected credit losses for these loans under the CECL provision.

The allowance for credit losses considers credit risk assessments as of December 31, 2020. In light of the COVID-19 pandemic, several of the credit risk ratings of individual development related debt investments have deteriorated as of December 31, 2020 when compared to December 31, 2019, reflecting both general credit and specific COVID-19 related aspects. In evaluating the appropriateness of the allowance for credit losses on development related debt investments as of December 31, 2020, IDB Invest has considered this impact when assessing the credit worthiness and risk rating of its development related debt investments and increased its provisions for credit losses in the year ended December 31, 2020.

Inter-American Investment Corporation

Notes to Financial Statements

Ending balance	\$ (32,926)	\$ (64,688)	\$ (97,614)

⁽¹⁾ Does not include changes in (Provision)/release of provision for credit losses related to guarantees of \$(2.7) million that are recorded in the same line item in the income statements.

A description of credit quality indicators is presented in the table below:

Rating categories	Credit quality indicator	Internal credit risk classification range	Description
aa- and better	Very strong	aa- or higher	An obligor in these categories has a very strong capacity to meet its financial commitment.
a+ to a-	Strong	a+, a, a-	An obligor in these categories has a strong capacity to meet its financial commitment.
bbb+ to bbb-	Adequate	bbb+, bbb, bbb-	An obligor in these categories exhibits an adequate financial profile. However, adverse economic conditions or changing circumstances are more likely to lead to a weakening of the obligor's capacity to meet its financial obligations.
bb+ to bb-	Moderate	bb+, bb, bb-	An obligor in these categories can face major uncertainties or exposures to adverse business, financial, or economic conditions that could lead to its inadequate capacity to meet its financial obligations.
b+ to b-	Weak	b+, b, b-	An obligor in these categories is more vulnerable to nonpayment than obligations rated bb-, but the obligor currently has the capacity to meet its financial obligations. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial obligations.
ccc+ and lower	Very weak	ccc+ or lower	An obligor in these categories faces significant challenges, and default may also already be a virtual certainty. The obligor is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial obligations. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial obligations.

Inter-American Investment Corporation

Notes to Financial Statements

A summary of development related debt investments carried at amortized cost by credit quality indicator, class of financing receivable and major security type, and vintage as of December 31, 2020 are as follows (US\$ thousands):

	December 31, 2020					
	Amortized cost basis by origination year ⁽²⁾				Revolving loans amortized cost basis ⁽¹⁾	Total
	2020	2019	2018	Prior		
Loans						
Adequate	\$ 270,000	\$ 60,750	\$ —	\$ 29,404	\$ 331,111	\$ 691,265
Moderate	755,716	287,107	323,748	115,225	232,869	1,714,665

⁽¹⁾ Includes line-of-credit arrangements that may be converted to term loans in a separate column. As of December 31, 2020, line of credit arrangements converted to term loans amounted to \$1.2 million.

⁽²⁾ Includes short-term loans with maturities of less than one year.

A summary of loans carried at amortized cost by credit quality indicator and by investment type as of December 31, 2019 are as follows (US\$ thousands):

Internal credit quality indicator	December 31, 2019		
	Financial institutions	Corporates	Total
Adequate	\$ 132,500	\$ 141,348	\$ 273,848
Moderate	402,726	484,971	887,697
Weak	246,458	537,470	783,928
Very weak	1,000	95,824	96,824
Total loans at amortized cost	\$ 782,684	\$ 1,259,613	\$ 2,042,297

Inter-American Investment Corporation

Notes to Financial Statements

The fair value of development related debt securities carried at amortized cost and a comparison of the allowance for credit losses with the gross unrecognized holding gains/(losses) that would have been recorded instead of the allowance if the development related debt securities carried at amortized cost were recorded at fair value is as follows (US\$ thousands):

	December 31, 2020					
	Amortized cost	Allowance for credit losses	Net carrying amount	Gross unrecognized holding		Fair value
				gains	losses	
Debt securities	\$ 128,204	\$ (7,851)	\$ 120,353	\$ 17,574	\$ —	\$ 145,778
Total	\$ 128,204	\$ (7,851)	\$ 120,353	\$ 17,574	\$ —	\$ 145,778

As of December 31, 2019, IDB Invest's development related debt securities carried at amortized cost were \$133.6 million. There was no indication of other-than-temporary impairment losses on these debt securities for the year ended December 31, 2019.

Guarantees

Guarantees entered into by IDB Invest have maturities consistent with those of the guaranteed loan portfolio. No notices of default have been received since inception of IDB Invest's guarantee program.

IDB Invest's current outstanding exposure for guarantees was \$107.3 million as of December 31, 2020 (\$46.6 million as of December 31, 2019). The maximum potential exposure, which represents the amounts that could be lost under the guarantees in the event the full guaranteed loan disbursed and there were a total default by the guaranteed party without taking into consideration possible recoveries under recourse provisions or from collateral held or pledged, amounted to \$156.8 million as of December 31, 2020 (\$66.4 million as of December 31, 2019). The allowance for losses on guarantees is \$17.5 million as of December 31, 2020 and is recorded in Payables and other liabilities in the balance sheets (\$3.2 million as of December 31, 2019).

Loan participations and co-financing arrangements

As of December 31, 2020, IDB Invest serviced loan participations and co-financing arrangements outstanding of \$1.4 billion (\$1.8 billion as of December 31, 2019) and recognized servicing fees of \$751 thousand for the year ended December 31, 2020 (\$757 thousand for the year ended December 31, 2019) included in Mobilization fees and other income in the income statements.

In addition, IDB Invest serviced co-financing arrangements outstanding of \$2.9 billion with IDB Group related parties as of December 31, 2020 (\$2.4 billion as of December 31, 2019). As explained in Note 13, income from these arrangements are included in SLA revenue.

Variable interest entities

Some of IDB Invest's development related investments are made through VIEs. These VIEs are mainly special purpose vehicles or investment funds, where the sponsor, the general partner or fund manager does not have substantive equity at risk.

Inter-American Investment Corporation

Notes to Financial Statements

IDB Invest has made development related investments amounting to approximately \$6.4 million in loans for one VIE for which it is deemed to be the primary beneficiary as of December 31, 2020 (\$26.1 million in loans and \$3.0 million in debt securities as of December 31, 2019). IDB Invest's involvement with one VIE is limited to development related investments, which are reflected as such in IDB Invest's financial statements as of December 31, 2020 (three as of December 31, 2019). Based on the most recent available data, the size of these VIEs measured by total assets with a notional value of approximately \$6.5 million as of December 31, 2020 is considered immaterial compared to the carrying value of \$6.4 million, and thus not consolidated in IDB Invest's financial statements (\$31.5 million notional value and \$29.1 million carrying value at December 31, 2019).

IDB Invest does not have a significant variable interest in any other VIE, which would require disclosure. Similarly, IDB Invest does not hold a controlling financial interest or majority voting interest in any other entity, and it does not have significant influence over any entities.

5. Receivables and Other Assets

Receivables and other assets are summarized below (US\$ thousands):

	<u>December 31, 2020</u>	<u>December 31, 2019</u>

Interest rate swaps	Gain/(loss) from changes in fair value on non-trading portfolios and foreign exchange transactions, net	2,073	—
Total		\$ 5,805	\$ —

The income related to each derivative type includes realized and unrealized gains and losses.

As of December 31, 2020, the outstanding volume, measured by notional amount, of swap contracts was \$2.4 billion (none as of December 31, 2019).

Inter-American Investment Corporation

Notes to Financial Statements

IDB Invest does not present derivative assets and liabilities related to contracts entered into with the same counterparty under a legally enforceable netting agreement on a net basis in the balance sheets. The following tables provide the gross and net positions of IDB Invest's derivative contracts considering amounts and collateral held or pledged in accordance with enforceable counterparty credit support and netting agreements described below (US\$ thousands):

December 31, 2020				
	Gross amount of assets presented in the balance sheets	Gross amounts not offset in the balance sheets		Net amount
		Financial instruments	Collateral received ⁽¹⁾	
Derivative assets	\$ 5,461	\$ (1,834)	\$ (2,205)	\$ 1,422

December 31, 2020				
	Gross amount of liabilities presented in the balance sheets	Gross amounts not offset in the balance sheets		Net amount
		Financial instruments	Collateral pledged	
Derivative liabilities	\$ (1,834)	\$ 1,834	\$ —	\$ —

⁽¹⁾ Total cash collateral received was \$2.6 million as of December 31, 2020 (none as of December 31, 2019).

IDB Invest's derivative contracts with market counterparties are entered into under standardized master agreements published by the International Swaps and Derivatives Association ("ISDA" Agreements). ISDA Agreements provide for a single lump sum settlement amount upon the early termination of transactions following a default or termination event whereby amounts payable by the non-defaulting party to the other party may be applied to reduce any amounts that the other party owes the non-defaulting party. This setoff effectively reduces any amount payable by the non-defaulting party to the defaulting party.

IDB Invest's ISDA Agreements are appended by a Credit Support Annex ("CSA") that provides for the receipt and posting of collateral in the form of cash in US\$ or U.S. Treasury securities to reduce mark-to-market exposure among derivative market counterparties. IDB Invest recognizes cash collateral received and a corresponding liability in its balance sheets for the obligation to return it. As of December 31, 2020, IDB Invest had \$2.6 million of outstanding obligations to return cash collateral under CSAs (none as of December 31, 2019). IDB Invest recognizes a receivable in its balance sheets for its rights to cash collateral posted. As of December 31, 2020, no cash collateral was posted under CSAs (none as of December 31, 2019).

Securities received as collateral are not recognized in the balance sheets. In accordance with the CSAs, IDB Invest may rehypothecate securities received as collateral, subject to the obligation to return such collateral and any related distributions received. In the event of a counterparty default, IDB Invest may exercise certain rights and remedies, including the right to setoff any amounts payable by the counterparty against any collateral held by IDB Invest and the right to liquidate any collateral held.

Inter-American Investment Corporation

Notes to Financial Statements

9. Capital

IDB Invest's original authorized share capital was increased to \$705.9 million, equivalent to 70,590 shares, through a \$500.0 million general capital increase approved in 1999 (GCI-I), and several special increases. These increases allocated a total of \$505.9 million for subscriptions by new and existing member countries, with a par value and issuance price of \$10,000 per share.

On March 30, 2015, IDB Invest's Board of Governors authorized the Second General Capital Increase (GCI-II) for \$2.03 billion. The capital increase is comprised of: (i) \$1.305 billion in capital to be paid by IDB Invest shareholders during the 2016-2022 period; and (ii) annual transfers from the IDB, on behalf of its shareholders, to be paid to IDB Invest during the period 2018-2025, totaling \$725.0 million for the entire period, and conditional upon annual approval by the IDB Board of Governors. The GCI-II increases the authorized capital stock by 125,474 shares – 80,662 shares corresponding to capital contributions payable by the countries (Annex A Shares) and 44,812 shares corresponding to transfers from the IDB on behalf of its member countries (Annex B Shares) – with a share issuance price of \$16,178.60 per share. With this capital increase, total authorized shares amount to 196,064.

All Annex A Shares have been subscribed and are expected to be paid in over time. In the balance sheets, subscribed shares are recorded as Capital, par value, Additional paid-in capital and Receivable from members on the date of the subscription instrument at the share issuance price. Payments are due on October 31 of each year from 2016 to 2022, per a payment plan determined and communicated by management to each subscribing country. The Board of Executive Directors is authorized to extend payment deadlines. The price for Annex A Shares not paid within their corresponding annual installment is adjusted to reflect a 5.0% increase for each year of arrears; except that, shares corresponding to the first installment which were fully paid in by the end of the second installment were not subject to a price adjustment. The price adjustment for shares in arrears is recorded to Additional paid-in capital and to Receivable from members in the balance sheets.

Capital contributions of \$75.7 million were received during the year ended December 31, 2020 for a total of \$1.1 billion in contributions corresponding to Annex A Shares under GCI-II. In March 2020, the Board of Governors approved income distributions corresponding to Annex B Shares transfers from the IDB on behalf of its shareholders that are also member countries of IDB Invest. Following this approval, IDB Invest received \$109 million in income distributions (transfers) for a total of \$207.9 million contributions corresponding to Annex B Shares under GCI-II, which are included as part of Total paid-in capital in the balance sheets. Total capital contributions of \$1.3 billion have been received under GCI-II through December 31, 2020.

Under the Agreement Establishing the Inter-American Investment Corporation, any member may withdraw from IDB Invest, which shall become effective on the date specified in the notice but in no event prior to six months from the delivery date of such notice. Even after withdrawing, a member shall remain liable for all obligations to IDB Invest to which it was subject on the date of delivery of the withdrawal notice. In the event a member withdraws, IDB Invest and the member may agree to the repurchase of the shares of said member on terms appropriate under the circumstances. If such agreement is not reached within three months of the withdrawal notice, or within a term agreed upon between both parties, the repurchase price of the member's shares shall be equal to the book value on the date when the member ceases to belong to IDB Invest, such book value to be determined by the audited financial statements. Payment for shares shall be made in such installments, times, and currencies as IDB Invest shall determine, taking into account its financial position.

Inter-American Investment Corporation

Notes to Financial Statements

10. Fair Value Measurements

Certain of IDB Invest's financial instruments are not actively traded in any market. Determining future cash flows for fair value estimation is subjective, and minor changes in assumptions or methodologies may affect the estimated values. Also, there is a heightened degree of uncertainty and judgment in incorporating the impact of COVID-19. Therefore, while disclosure of estimated fair values of certain financial instruments is required, readers are cautioned about using these data for purposes of evaluating the financial condition of IDB Invest as of December 31, 2020.

The methodologies and key assumptions used to estimate the fair values of IDB Invest's financial instruments are summarized below:

Cash and cash equivalents – The carrying amount reported in the balance sheets approximates fair value.

Liquid assets – Fair values for money market funds and debt securities are based on either unadjusted quoted prices for identical assets or liabilities in active markets or quoted prices in active markets for identical assets or liabilities or prices derived from alternative pricing models when these prices are not available from pricing vendors. These methodologies apply to certain investments in non-U.S. government obligations, agencies, supnationals and corporate bonds. Also included are commercial paper (CP) and certificates of deposit (CD) issued under large U.S. based CP or CD programs. For investments for which prices and other relevant information, generated by market transactions involving identical or comparable assets, are not available, the income approach valuation has been employed, using yield curves, bond or credit default swap spreads, and recovery rates based on collateral values as key inputs.

Development related debt investments – For disclosure purposes, IDB Invest estimates the fair value of its development related debt investments. Loans and development related investments in debt securities for which a combination of observable and unobservable inputs is generally available, require the use of estimates and present value calculations of future cash flows. The fair values are estimated using recently executed transactions, market price quotations (where observable), and market observable credit default swap levels along with proprietary valuation models where such transactions and quotations are unobservable. The lack of objective pricing standards adds a greater degree of subjectivity and volatility to these derived or estimated fair values.

Any excess or deficit resulting from the difference between the carrying amounts of the development related debt investments carried at amortized cost and the fair value disclosed does not necessarily reflect the realizable values since IDB Invest generally holds investments to maturity with the aim of realizing their contractual cash flows.

Equity investments – Equity investments includes direct equity investments and LPs primarily in small and medium-sized enterprises and financial instruments. In most cases, market prices are not available, and alternate valuation techniques require a significant degree of judgment. IDB Invest intends to hold investments in LPs until the final liquidation of the underlying assets of the LPs in order to participate fully in the performance of the LP. IDB Invest does not have redemption rights in any of these investments. IDB Invest estimates that the underlying assets of the LPs generally may be liquidated over a period of 10 years.

Equity investments at fair value – Equity investments are recorded at fair value if publicly traded in certain markets, or IDB Invest elects the FVO. For investments in LPs, IDB Invest utilizes the NAVs reported by the fund managers as the basis of the fair value measurement. These NAVs are derived from the fair values of the underlying investments and adjusted further by IDB Invest, as needed.

Equity investments at cost-based measurement alternative – IDB Invest's methodology to measure equity investments using the cost-based measurement alternative requires the use of estimates and present value calculations of future cash flows for impairments or observable price change adjustments. IDB Invest relies on third-party valuation specialists when available, internal estimates, or a combination of both.

Inter-American Investment Corporation

Notes to Financial Statements

Derivative instruments – These include cross currency and interest rate swap contracts. Fair values are determined by obtaining the present value of estimated future cash flows using appropriate discount rates.

Borrowings – IDB Invest's borrowings are recorded at amortized cost or fair value. The fair value of IDB Invest's borrowings is estimated using traded prices, quoted market prices or discounted cash flow analyses based on IDB Invest's current borrowing rates for similar types of borrowing arrangements.

Other assets and liabilities – The carrying value of financial instruments included in Receivables and other assets, and Payables and other liabilities approximates fair value due to their liquid or short-term nature.

Inter-American Investment Corporation

Notes to Financial Statements

11. Gain/(loss) from changes in fair value on non-trading portfolios and foreign exchange transactions, net

Net gains and losses on non-trading portfolios are as follows (US\$ thousands):

	Year ended December 31	
	2020	2019
Gain/(loss) from changes in fair value, net		
Development related debt investments	\$ (937)	\$ (798)
Borrowings	3,997	—
Derivatives		
Realized gain/(loss) on swaps	2,178	—
Unrealized gain/(loss) on swaps	3,627	—
	8,865	(798)
Gain/(loss) from foreign exchange transactions, net	6,487	(3,559)
Gain/(loss) from changes in fair value and foreign exchange transactions, net	\$ 15,352	\$ (4,357)

IDB Invest's non-trading portfolio includes development related debt investments and borrowings accounted for at fair value under the Fair Value Option as well as derivative instruments at fair value. Changes in the fair value of borrowings resulting from changes in IDB Invest's own credit risk spread are recorded through Other comprehensive income whereas changes in fair value due to market risk, and all fair value changes on derivatives, are accounted for in the income statements.

Inter-American Investment Corporation

Notes to Financial Statements

12. Contingencies and Leases

In the ordinary course of business, IDB Invest is from time to time named as a defendant, co defendant or party in litigation matters inherent to and typical of the operations in which it is engaged. In the opinion of IDB Invest's management, the ultimate resolution of these legal proceedings would not have a material adverse effect on the financial position, results of operations, or cash flows.

The recent global outbreak of the COVID-19 pandemic has disrupted economic markets and created significant volatility. The operational and financial performance of the companies IDB Invest finances depends on future developments, including the duration and spread of the outbreak. Such uncertainty may impact the fair value of IDB Invest's development related investments and the credit worthiness of IDB Invest's borrowers. IDB Invest has capital buffers in place to absorb additional stress and credit rating downgrades.

Office Space Leases

IDB Invest has entered into office space leases with the IDB at headquarters and in its Regional Developing Member Countries that are accounted for as either short-term leases or operating leases. The current lease agreement with the IDB at headquarters expired in 2020 and was renewed for an additional ten year term that will expire in 2030. The remaining current lease agreements with the IDB in the Regional Developing Member Countries are renewed annually with the exception of the Argentina, Brazil and Colombia offices which extend between 2021 and 2023. The lease agreements in Argentina and Colombia include renewal options to extend the lease term, all of which IDB Invest is reasonably certain to exercise for the duration established in the contract.

Refer to Notes 5 and 6 for additional information related to IDB Invest's operating lease right-of-use assets and operating lease liabilities outstanding as of December 31, 2020.

The following table details the lease expenses and quantitative disclosure requirements (US\$ thousands):

	Year ended December 31	
	2020	2019
Operating leases		
Operating lease expense	\$ 6,110	\$ 6,109
Total lease expense	\$ 6,110	\$ 6,109
Supplemental disclosure:		
Weighted average of lease terms (years)	9.92	10.90
Weighted average discount rate	3.11 %	3.11 %

Discount rate is determined as IDB Invest's incremental borrowing rate under the IDB multi-currency facility.

Maturity analysis of operating lease liabilities with the IDB are as follows (US\$ thousands):

	December 31, 2020
Undiscounted cash flows in 2021	\$ 5,351
Undiscounted cash flows in 2022	5,315
Undiscounted cash flows in 2023	5,436
Undiscounted cash flows in 2024	5,503
Undiscounted cash flows in 2025 and thereafter	36,664
Total operating leases	\$ 58,269
Discount	(8,330)
Operating lease liability	\$ 49,939

Inter-American Investment Corporation

Notes to Financial Statements

13. Related Party Transactions

IDB Invest and the IDB entered into SLAs whereby IDB Invest provides certain services to the IDB and the IDB provides certain services to IDB Invest. These services are further described below. IDB Invest has also entered into office space leases with the IDB discussed in Note 12.

Service Level Agreements

The SLAs with the IDB outline the duration, scope of work, roles and responsibilities, remuneration, and performance metrics of each institution.

Co-financing Arrangements and SLA Revenue

Following the IDB Group private sector and non-sovereign guaranteed (NSG) reorganization, all new NSG activities are originated by IDB Invest and largely co-financed by IDB Invest and the IDB. IDB Invest and the IDB maintain separate legal and economic interests in their respective share of the loan principal balance for a co-financed loan. IDB Invest's portion is defined as a percentage of the overall transaction subject to certain minimum amounts as agreed between IDB Invest and the IDB.

IDB Invest earns revenue from an annual renewable SLA under which IDB Invest provides loan origination, credit risk evaluation and monitoring, and certain loan administration services for the IDB related to its private sector operations including operations that are co-financed by IDB Invest and IDB. IDB Invest also provides certain advisory services to the IDB Group. These amounts are included in Service fees from related parties in the income statements.

Management of External Funds

IDB Invest administers on behalf of other related party entities, which include donors and member countries, funds restricted for specific uses that include the co-financing of certain projects, technical studies for borrowers, project-related studies, and research and training programs. These funds are held in trust by IDB Invest and are not commingled with IDB Invest's funds, nor are they included in the assets of IDB Invest. IDB Invest receives a management fee that is generally a percentage of the funds received. These fees are included in Service fees from related parties in the income statements.

Access to IDB Administered Funds

In addition to the aforementioned funds, IDB Invest provides certain services for trust funds administered by the IDB on behalf of the trust fund donors (the Trust Funds). IDB Invest receives an allocation of the IDB's related Trust Fund fees. Such fees are intended to cover internal and external costs associated with administering the NSG activities for the Trust Funds and related operations over the expected lives of the Trust Funds and the underlying operations. Costs expected to be incurred approximate the allocable fee. The Trust Fund organizational documents provide for either the payment of a lump sum or scheduled payments. The timing of the payments may not correspond to the incurrence of the related costs. IDB Invest also provides certain technical assistance activities for private sector operations on behalf of donor trust funds that are directly funded by IDB Trust Funds. These arrangements are recognized on a cost reimbursement basis and presented gross in Service fees from related parties and Administrative expenses in the income statements.

For the year ended December 31, 2020, IDB Invest received \$4.3 million for these services (\$1.2 million for the year ended December 31, 2019). As of December 31, 2020, IDB Invest has recorded deferred revenue of \$15.0 million related to these services (\$12.5 million as of December 31, 2019), which will be recognized as revenue as services are provided. Deferred revenue is presented as a component of Payables and other liabilities in the balance sheets.

Inter-American Investment Corporation

Notes to Financial Statements

Revenue from related party transactions are as follows (US\$ thousands):

	Year ended December 31	
	2020	2019
SLA revenue	\$ 76,688	\$ 73,652
Management of external funds revenue	2,109	2,202
IDB administered funds revenue	7,079	1,566
Total	\$ 85,876	\$ 77,420

SLA Expenses

IDB Invest purchases various general and administrative services from the IDB under a series of annual renewable SLAs. IDB Invest incurred expenses of \$16.7 million for receiving these SLA services from the IDB for the year ended December 31, 2020 (\$14.6 million for the year ended December 31, 2019) that are included in Administrative expenses in the income statements. Payables related to these SLA expenses are included in the total Due to IDB, net of \$14.8 million as of December 31, 2020 (\$8.4 million as of December 31, 2019). Refer to Note 6 for additional details.

Other Transactions with Related Parties

IDB Invest has a renewable credit facility with the IDB amounting to \$300.0 million. On September 21, 2018, this renewable credit facility was modified from a United States dollar facility to a multicurrency facility and the original expiration date of November 2020 was modified and extended to December 2022. As of December 31, 2020, IDB Invest's total drawdowns from the IDB multi-currency credit facility were \$185.1 million and \$114.9 million remain available (\$150.8 million total drawdowns and \$149.2 million available as of December 31, 2019). Refer to Note 7 for additional details.

14. Pension and Postretirement Benefit Plans

Both the IDB and IDB Invest are sponsors of the Pension Plans and PRBP and each employer presents its respective share of these plans using a December 31 measurement date.

Inter-American Investment Corporation

Notes to Financial Statements

Obligations and funded status

IDB Invest uses a December 31 measurement date for the Pension Plans and the PRBP. The following table summarizes the change in benefit obligation, change in plan assets, funded status of the Pension Plans and the PRBP, and the amounts recognized in the balance sheets (US\$ thousands):

	Pension Plans		PRBP	
	2020	2019	2020	2019
Reconciliation of benefit obligation				
Obligation as of January 1	\$ (306,498)	\$ (224,152)	\$ (180,482)	\$ (136,934)
Service cost	(18,717)	(12,303)	(7,671)	(5,228)
Interest cost	(9,635)	(9,317)	(5,600)	(5,525)
Participants' contributions	(3,659)	(3,458)	—	—
Plan amendments	—	—	—	—
Net transfers between IDB and IIC	1,856	1,590	723	1,516
Actuarial gains/(losses)	(49,420)	(62,204)	(25,608)	(35,997)
Benefits paid	3,590	3,346	1,173	1,695
Retiree Part D subsidy	—	—	(20)	(9)
Obligation as of December 31	\$ (382,483)	\$ (306,498)	\$ (217,485)	\$ (180,482)

Reconciliation of fair value of plan assets

Fair value of plan assets as of January 1	228,578	184,260	162,684	132,799
Net transfers between IDB and IIC	(1,856)	(1,590)	(723)	(1,516)
Actual return on plan assets	25,086	38,699	16,967	28,399
Benefits paid	(3,590)	(3,346)	(1,173)	(1,695)
Participants' contributions	3,659	3,458	—	—
Employer contributions	7,501	7,097	5,036	4,697
Fair value of plan assets as of December 31	\$ 259,378	\$ 228,578	\$ 182,791	\$ 162,684

Funded status

Funded/(Underfunded) status as of December 31	(123,105)	(77,920)	(34,694)	(17,798)
Funded status as of December 31	\$ (123,105)	\$ (77,920)	\$ (34,694)	\$ (17,798)

Amounts recognized in Accumulated other comprehensive income/(loss) consist of:

Net actuarial (gain)/loss	83,744	52,011	45,582	31,574
Prior service (credit)/cost	—	—	(1,399)	(1,836)
Transition obligation/(asset)	—	—	—	—
Net amount recognized as of December 31	\$ 83,744	\$ 52,011	\$ 44,183	\$ 29,738

As of December 31, 2020 and 2019, the Pension Plans and PRBP were all underfunded. In 2020 and 2019, the aggregate fair value of the Pension Plans and PRBP's assets were \$442.2 million and \$391.3 million, respectively, and aggregate benefit obligations were \$600.0 million and \$487.0 million, respectively, contributing to the total Pension Plans and PRBP liability of \$157.8 million and \$95.7 million, respectively, as of December 31, 2020 and 2019.

Inter-American Investment Corporation

Notes to Financial Statements

The accumulated benefit obligation, in excess of the fair value of the Pension Plans' assets is as follows (US\$ thousands):

	Pension Plans			
	2020		2019	
Accumulated benefit obligation	\$	(312,419)	\$	(248,390)
Fair value of plan assets	\$	259,378	\$	228,578
Funded status	\$	(53,041)	\$	(19,812)

The accumulated benefit obligation attributable to IDB Invest for the Pension Plans, which excludes the effect of future salary increases was \$312.4 million and \$248.4 million as of December 31, 2020 and 2019, respectively.

Components of net periodic benefit cost

Pension Plans and PRBP net periodic benefit costs recognized in the income statements consists of the following components (US\$ thousands):

	Year ended December 31			
	Pension Plans		PRBP	
	2020	2019	2020	2019
Service cost ⁽¹⁾	\$ 18,717	\$ 12,303	\$ 7,671	\$ 5,228
Interest cost ⁽³⁾	9,635	9,317	5,600	5,525
Expected return on plan assets ⁽²⁾⁽³⁾	(11,590)	(10,946)	(7,781)	(7,815)
Amortization of: ⁽³⁾				
Net actuarial (gain)/loss	4,191	107	2,414	130
Prior service (credit)/cost	—	—	(437)	(437)
Net periodic benefit cost	\$ 20,953	\$ 10,781	\$ 7,467	\$ 2,631

⁽¹⁾ Included in Administrative expenses.

⁽²⁾ The expected long-term rate of return on plan assets is 5.75% in 2020 and 6.00% in 2019.

⁽³⁾ Included in Other components of pension benefit costs, net.

Other changes in plan assets and benefit obligations recognized in Other comprehensive income/(loss) (US\$ thousands):

	Year ended December 31			
	Pension Plans		PRBP	
	2020	2019	2020	2019
Current actuarial (gain)/loss, net	\$ 35,924	\$ 34,451	\$ 16,422	\$ 15,413
Amortization of:				
Net actuarial (gain)/loss	(4,191)	(107)	(2,414)	(130)
Prior service (credit)/cost	—	—	437	437
Total recognized in other comprehensive (income)/loss	\$ 31,733	\$ 34,344	\$ 14,445	\$ 15,720
Total recognized in Net periodic benefit cost and Other comprehensive (income)/loss	\$ 52,686	\$ 45,125	\$ 21,912	\$ 18,351

Inter-American Investment Corporation

Notes to Financial Statements

Actuarial assumptions

The actuarial assumptions used in the Pension Plans and PRBP valuations are based on financial market interest rates, past experience, and management's best estimate of future benefit changes and economic conditions. Changes in these assumptions will impact future benefit costs and obligations. Actuarial gains and losses occur when actual results are different from expected results. Actuarial gains and losses recognized in Accumulated other comprehensive income, which exceed 10% of the greater of the benefit obligation or market-related value of the plan assets at the beginning of the period, are amortized to income over the average remaining service period of active participants expected to receive benefits under the Pension Plans and PRBP, which is approximately 10.5 and 12.6 years, respectively.

Unrecognized prior service credit is amortized over a range of 2.4 years to 5.0 years for the PRBP.

The weighted-average assumptions used to determine the benefit obligation and the net periodic benefit cost were as follows:

	Pension Plans		PRBP	
	2020	2019	2020	2019
Weighted average assumptions used to determine benefit obligation as of December 31				
Discount rate	2.44 %	3.17 %	2.52 %	3.23 %
Inflation rate	2.12 %	2.20 %	2.12 %	2.20 %
Rate of compensation increase	4.26 %	4.34 %	n/a	n/a

	Pension Plans		PRBP	
	2020	2019	2020	2019
Weighted average assumptions used to determine net periodic benefit cost for years ended December 31				
Discount rate	3.17 %	4.17 %	3.23 %	4.22 %
Expected long-term rate of return on plan assets	5.75 %	6.00 %	5.50 %	6.00 %
Rate of compensation increase	4.34 %	4.27 %	n/a	n/a
Inflation rate	2.20 %	2.21 %	n/a	n/a

The expected long-term rate of return on the Pension Plans and PRBP's assets represents management's best estimate, after surveying external investment specialists, of the expected long-term (10 years or more) forward-looking rates of return of the asset categories employed by the Pension Plans and PRBP, weighted by the Pension Plans and PRBP's investment policy asset allocations. Accumulated and projected benefit obligations are measured as the present value of expected payments. The discount rate used is selected in reference to the year-end yield of AA corporate bonds within the approved Financial Times Stock Exchange Pension Liability Index, with maturities that correspond to the payment of benefits. For the assumed rate of inflation, the IDB has established a process by which a range of inputs is reviewed, including 10-year forward looking expert opinion forecasts, the average of the 10 year and 30 year U.S. Treasury Inflation Protected Securities (U.S. TIPS) breakeven inflation rate, and historical averages.

The decreases in the weighted-average discount rates for the Pension Plans and PRBP in 2020 and 2019 were the primary driver for the increases in the benefit obligations of approximately \$45.2 million and \$16.9 million, respectively, as of December 31, 2020 with respect to the precedent year (\$38.0 million and \$13.7 million, respectively, as of December 31, 2019).

Significant actuarial gains and losses related to changes in the Plans' benefit obligations for 2020 and 2019 primarily resulted from changes in the discount rate.

Inter-American Investment Corporation

Notes to Financial Statements

For participants assumed to retire in the United States, the accumulated postretirement benefit obligation was determined using the following health care cost trend rates at December 31:

	PRBP	
	2020	2019
Health care cost trend rates assumed for next year		
Medical, Non-Medicare	4.50 %	4.75 %
Medical, Medicare	2.50 %	2.75 %
Prescription drugs	6.00 %	6.50 %
Dental	4.50 %	4.50 %
Rate to which the cost trend rate is assumed to decline (the ultimate trend rate)		
Medical, Non-Medicare	4.50 %	4.50 %
Medical, Medicare	2.50 %	2.50 %
Prescription drugs	6.00 %	6.00 %
Dental	4.50 %	4.50 %
Year that the rate reaches the ultimate trend rate	2021	2021

For those participants assumed to retire outside of the United States, a 5.00% and 5.50% health care cost trend rate was used for 2020 and 2019, respectively with an ultimate trend rate of 4.50% in 2023.

Pension Plans and PRBP Assets

The assets of the Pension Plans and the PRBP are managed primarily by investment managers engaged by the IDB who are provided with investment guidelines that take into account the Pension Plans and PRBP investment policies. Investment policies with long-term strategic asset allocations have been developed so that there is an expectation of sufficient returns to meet long-term funding needs. The policies allocate 65% of the Pension Plans portfolio to growth-oriented assets (the Return Strategies), and 35% of assets to nominal and inflation-indexed U.S. fixed income (the Liabilities Hedging Strategies), to partially hedge the interest rate and inflation exposure in the Pension Plans and PRBP's liabilities, and to protect against disinflation.

The Pension and Managing Committees of the Pension Plans and PRBP approve Investment Policy Statements (IPS) and Strategic Asset Allocations (SAA), which comply with the IDB's Risk Appetite (RA) and Long-term Funding (LTF) policies.

Inter-American Investment Corporation

Notes to Financial Statements

The IPS SAA target allocations as of December 31, 2020, are as follows:

	Pension Plans	PRBP
U.S. equities	20 %	20 %
Non-U.S. equities	18 %	18 %
Emerging markets equities	4 %	4 %
Public real estate	3 %	3 %
Long duration diversified fixed income	27 %	27 %
Core fixed income	4 %	4 %
High yield fixed income	2 %	2 %
U.S. inflation-indexed fixed income	4 %	4 %
Emerging markets fixed income	3 %	3 %
Private real estate	5 %	5 %
Public Infrastructure	3 %	3 %
Private Infrastructure	2 %	2 %
Tactical Asset Allocation	5 %	5 %
Commodity index futures	0 %	0 %
Short-term fixed income funds	0 %	0 %
 Stabilization Reserve Fund:		
Core fixed income	50 %	50 %
U.S. inflation-indexed fixed income	0 %	0 %
Short-term fixed income funds	50 %	50 %

Investment and asset class risk is managed by the continuous monitoring of each asset category level and investment manager. Investments are rebalanced monthly within policy targets using cash flows and rebalancing exercises. Investment managers are generally not allowed to invest more than 5% of their respective portfolios in the securities of a single issuer other than the U.S. Government. The use of derivatives by an investment manager for the Pension Plans and PRBP is limited, and subject to specific approval by the Managing Committees of the Pension Plans and PRBP.

For the Pension Plans (SRP and CSRP) and PRBP, the included asset classes are described below:

- U.S. equities - For the Pension Plans and PRBP, commingled funds that invest, long-only, in U.S. common stocks. Management of the funds replicates or optimizes the all capitalization (cap) Russell 3000 Index. For the SRP and PRBP only, approximately 50% of U.S. equities assets are actively managed in separate accounts holding individual stocks.
- Non-U.S. equities - For the Pension Plans and PRBP, commingled funds that invest, long-only, in non-U.S. common stocks. Management of the funds replicates or optimizes the large/mid-cap MSCI WORLD EX-USA IMI Index and/or the large/mid-cap MSCI EAFE Index. For the SRP and PRBP only, approximately 60% of non-U.S. equities assets are actively-managed in separate accounts holding individual stocks.
- Emerging markets equities - For the Pension Plans and PRBP, actively managed commingled funds and/or mutual fund that invest, long-only, in emerging markets common stocks. Managements of the funds select securities, based upon fundamental characteristics, which are generally comprised within the large/mid-cap MSCI Emerging Markets Free Index.

Inter-American Investment Corporation

Notes to Financial Statements

- Public real estate equities - For the SRP and PRBP only, individual (separate) account which holds, long-only, real estate securities. The account is actively-managed based upon fundamental characteristics, investing in securities generally comprised within the MSCI U.S. REIT Index.
- Long duration diversified fixed income - For the SRP and PRBP only, long duration fixed income assets are actively managed in separate accounts holding individual bonds generally comprised within the Bloomberg Barclays U.S. Long Government/Credit Bond Index. For the CSRP, actively managed commingled fund and/or mutual fund that invest, long-only, in long duration government and credit securities. Managements of the funds select securities, based upon fundamental characteristics, which are generally comprised within the Bloomberg Barclays U.S. Long Government/Credit Bond Index, as well as opportunistic investments in non-index securities.
- Core fixed income - For the Pension Plans and PRBP, actively managed commingled funds that invest, long-only, in intermediate duration government and credit securities. Managements of the funds select securities, based upon fundamental characteristics, which are generally comprised within the Bloomberg Barclays U.S. Aggregate Bond Index, as well as opportunistic investments in non-index securities.
- High yield fixed income - For the SRP only, assets are actively managed in a separate account holding individual securities, and for the PRBP only, in an actively managed commingled fund. For both the SRP and PRBP, the investible universe is generally comprised of the securities within the Bloomberg Barclays High Yield 2% Constrained Index, as well as opportunistic investments in non-index securities. High yield securities are financial obligations of U.S. companies, rated below investment-grade by at least one of the nationally recognized statistical rating organizations.
- U.S. inflation-indexed fixed income - For the Pension Plans and PRBP, investment in individual U.S. Treasury Inflation Protected Securities in accounts managed internally. For the SRP and PRBP, replicate or optimize the Bloomberg Barclays U.S. Treasury Inflation Notes 10+ Years Index. For the SRP and PRBP Stabilization Reserve Funds, replicate or optimize the Bloomberg Barclays U.S. Treasury Inflation TIPS 0-5 Years Index. For the CSRP, replicates or optimizes the Bloomberg Barclays U.S. Treasury Inflation Notes 10+ Years Index.
- Emerging markets fixed income - For the Pension Plans and PRBP, actively managed commingled funds that invest, long-only, in emerging markets fixed income. The funds invest in sovereign and sub-sovereign United States dollar- and local-denominated debt. Managements of the funds invest in securities generally comprised within the J.P. Morgan EMBI Global Diversified Index, as well as opportunistic investments in non-index securities.
- Private real estate - For the Pension Plans and PRBP, an open-end commingled funds which invest, long-only, in U.S. real estate properties. The funds are actively-managed based upon fundamental characteristics of the properties.
- Public infrastructure - For the CSRP, an enhanced index exchange-traded fund that invests, long-only, in U.S. and developed markets common stocks within the infrastructure industries. Management of the fund selects securities, based upon fundamental characteristics, which are generally comprised within the MSCI World Infrastructure Index. For the SRP and PRBP only, assets are actively managed in a separate account holding individual stocks.
- Private infrastructure - For the SRP and PRBP only, an actively managed , open-end commingled fund which invests, long-only, in U.S. and developed markets private equity within the infrastructure sector. This new asset class is not implemented yet.

Inter-American Investment Corporation

Notes to Financial Statements

- Tactical asset allocation - For the SRP and PRBP only, actively managed commingled funds and mutual fund that invest in U.S. and developed markets equities, fixed income, commodities and currencies, investments could shift due to opportunistic behavior within these markets.
- Commodity index futures - For the CSRP, investment in a commingled fund that invests, long-only in commodity index futures. Management of the fund replicates or optimizes the Bloomberg Commodity Index.
- Short-term fixed income funds - Commingled funds that invest, long-only, in U.S. Government securities with maturities of less than 18 months. Managements of the funds invest in short-term government securities only, which are benchmarked against the Merrill Lynch 3-month Treasury Bill Index.

Effective December 2015, the IDB Board of Executive Directors (Board) approved the Long-Term Funding Policy (LTF) for the Pension Plans (SRP and CSRP) and the PRBP that established stable contribution rates of 20% (SRP), 0.71% (CSRP) and 12% (PRBP) of applicable salaries and established the Stabilization Reserve Funds (SRFs) for the SRP and PRBP for the IDB Invest and IDB. The LTF Policy had a five-year initial term. In July 2019, following a review of the LTF Policy components, the Board adopted and enhanced version of the LTF policy as part of the ongoing financial policies of the IDB. The enhanced version of the LTF policy removes its sunset period, continues to keep the IDB Invest and IDB contribution rates at a stable level, and establishes a rules based mechanism to guide management decision making to allocate IDB Invest and IDB contributions when the SRFs reaches its limits, as well as when the Pension Plans and PRBP reach their fully funded status. IDB Invest contributions made in excess (deficit) of the actuary's determined contribution rate are allocated (withdrawn) to (from) the SRFs. The approved Investment Policy Strategic Asset Allocation for the Stabilization Reserve Funds is 50% Short-term fixed income funds cash and 50% Core fixed income.

The following tables set forth the investments of the Pension Plans and PRBP as of December 31, 2020 and 2019, which are measured at fair value and presented together with their weighted average allocation, by level within the fair value hierarchy. As required by the fair value measurements accounting framework, these investments are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. Investments in funds that do not have a readily determinable fair value are measured at NAV as a practical expedient and are not classified within the fair value hierarchy (US\$ thousands).

Total			\$ 162,684	

⁽¹⁾ Includes receivables and payables carried at amounts that approximate fair value. Mainly payables for investments purchased.

Investment securities that are measured at fair value based on quoted market prices in active markets, a valuation technique consistent with the market approach, include U.S., non-U.S. infrastructure individual equity holdings, public infrastructure exchange trade funds, fixed income mutual funds, U.S. treasury and U.S. inflation-indexed fixed income. Such securities are classified within Level 1 of the fair value hierarchy.

Investment securities that are measured at fair value based on quoted market prices for similar assets in active markets, or quoted prices for identical or similar assets in markets that are not active, a valuation technique consistent with the market approach, include corporate, non-U.S. government, high yield and municipal fixed income, and commercial mortgage backed securities. Also included are proprietary investment managers' commingled funds investing in U.S. and global equities, emerging markets fixed income, fixed income funds, and/or short-term fixed income investments. These commingled funds are not publicly traded and are measured at fair value based on the net asset per share, which are determined and published and are the basis for current transactions. Such securities are classified within Level 2 of the fair value hierarchy.

Proprietary investment managers' funds investing in private real estate and tactical asset allocation do not have readily determinable fair values and are measured at the NAV as a practical expedient. Such investments are not classified within the fair value hierarchy.

Contributions

Contributions from IDB Invest to the Pension Plans and the PRBP during 2021 are expected to be approximately \$8.4 million and \$5.6 million, respectively. All contributions are made in cash.

Notes to Financial Statements

Estimated future benefit payments

The following table summarizes the benefit payments, which reflect expected future service, as appropriate, expected to be paid in each of the next five years and in the aggregate for the subsequent five years. These amounts are based on the same assumptions used to measure the benefit obligation as of December 31, 2020 (US\$ thousands).

	Pension Plans	PRBP
Estimated future benefit payments		
2021	\$ 4,788	\$ 1,567
2022	5,180	1,715
2023	5,649	1,874
2024	6,177	2,049
2025	6,761	2,288
2026 and thereafter	46,447	16,728

15. Subsequent Events

Management has evaluated subsequent events through March 3, 2021, which is the date the financial statements were issued. Management determined that there were no subsequent events that require disclosure under ASC Topic 855, *Subsequent Events*.
