Information Statement

Inter-American Investment Corporation

The Inter-American Investment Corporation (IDB Invest) intends from time to time to issue its debt securities with maturities and on terms based on market conditions at the time of sale. The debt securities may be sold to dealers or underwriters, who may resell them in public offerings or otherwise, or they may be sold by IDB Invest directly or through agents. The terms, conditions and other details of debt securities being offered at any particular time will be set forth in a prospectus and various incorporated or supplemental documents thereto. Unless otherwise stated, all information in this annual Information Statement is provided as of February 23, 2023, and all amounts are expressed in United States dollars.

AVAILABILITY OF INFORMATION

IDB Invest will provide, upon request, copies of this Information Statement without charge. Written or e-mail requests should be directed to the principal office of IDB Invest at 1350 New York Avenue, N.W., Washington, D.C. 20577, Attention: fnats-funding@idbinvest.org.

The Information Statement is also available on the IDB Invest's website at <https://www.idbinvest.org/en/investors>. Other documents and information on this website are not intended to be incorporated by reference in this Information Statement.

Recipients of this Information Statement should retain it for future reference, since it is intended that each prospectus and any supplemental Information Statement issued after the date hereof will refer to this Information Statement for a description of IDB Invest and its financial condition, until a subsequent Information Statement is issued.

February 23, 2023

I. Management Discussion & Analysis

Executive Summary

IDB Invest is an international organization established in 1986 pursuant to the Agreement Establishing the Inter-American Investment Corporation (the Establishing Agreement) and began operations in 1989. The headquarters of IDB Invest are located in Washington, DC, and it has operations in Latin America and the Caribbean (the Region). It is a legally separate and distinct member of the Inter-American Development Bank Group (the IDB Group or IDBG), which also includes the Inter-American Development Bank (the IDB) and the Multilateral Investment Fund (commercially known as IDB Lab). IDB Invest has a separate governance structure, including a separate Board of Governors, Board of Executive Directors¹, Management and staff. IDB Invest is owned by its member countries, which include 26 regional developing countries in Latin America and the Caribbean (the Regional Developing Member Countries) and 21 countries outside of Latin America and the Caribbean.

The purpose of IDB Invest is to promote the economic development of its Regional Developing Member Countries by encouraging the establishment, expansion and modernization of private sector projects in the Region that do not benefit from a sovereign guarantee and that aim to bolster competitiveness, inclusive economic growth and sustainable practices.

Since the Private Sector Reform in 2016², IDB Invest manages all private sector operational and administrative functions for the IDB Group to better serve and maximize development impact for clients and partners in the Region.

COVID-19 Pandemic

As the COVID-19 pandemic unfolded, the IDB Invest Board of Executive Directors approved Management's COVID-19 Operational Response in April 2020. The goal was to finance interventions that alleviate healthcare constraints, maintain jobs, restore supply chains, and sustain sources of income, especially for micro, small and medium enterprises (MSMEs). After a strong counter-cyclical response to the COVID-19 pandemic, IDB Invest continued to focus on offering clients and partners innovative financial and non-financial product offerings.

In 2022—as COVID-19 related restrictions have eased—IDB Invest has continued with the execution of its return to office framework in its headquarters in Washington, DC, and each of its country offices, based on local conditions.

Russian War on Ukraine

The Russian war on Ukraine, launched in February 2022, has exacerbated disruptions to supply chains—which were already strained during the COVID-19 pandemic—increased inflation and lowered growth expectations globally. As a result of the war, countries in the Region are facing a series of economic and geopolitical implications, although the severity of the effects has been heterogeneous across countries and sectors. Medium-term growth expectations are weaker than before the invasion, while governments are actively deploying policy responses to address inflationary pressures given the spike observed in international prices of commodities and related consequences, including rising food and energy insecurity, among others. IDB Invest is closely monitoring the impact of the conflict on the countries and industries where it operates.

Performance Summary

Basis of Preparation of IDB Invest's Financial Statements

IDB Invest's financial statements are prepared in accordance with generally accepted accounting principles in the United States of America (US GAAP). IDB Invest's accounting policies are discussed in more detail in Critical Accounting Estimates and in Note 2 to IDB Invest's financial statements.

¹ References to the Board of Executive Directors refers to the IDB Invest Board of Executive Directors unless otherwise explicitly mentioned.

² On March 30, 2015, the Boards of Governors of IDB Invest and the IDB approved the transfer to IDB Invest, effective on January 1, 2016, of all operational and administrative functions associated with the IDB private sector and non-sovereign guaranteed activities.

Financial Performance

For the year-ended December 31, 2022, IDB Invest's net income was \$104.6 million. Despite the impacts of global inflation, the rising interest rate environment and evolving uncertainties surrounding the Russian war on Ukraine, IDB Invest's financial results remain strong and consistent with the growth of the institution and the portfolio.

Development-Related Investments

IDB Invest's development-related investment portfolio is comprised of loans, guarantees, debt securities and equity investments and is diversified across countries and industries in the Region. As of December 31, 2022, gross development-related investments (excluding guarantees) amounted to \$6.5 billion, of which loans, debt securities and equity investments represented 81%, 14% and 5%, respectively. Refer to Table 2 for details related to IDB Invest's development-related investments by country and industry.

Liquid Assets Portfolio

IDB Invest's Liquidity Policy establishes the overall liquidity requirements measured using its Liquidity Coverage Ratio (LCR). These requirements consider stressed market conditions, liquidity haircuts and the Authorization to Invest Corporation Funds. Additional details are included in the Liquidity Risk section under Risk Management. As of December 31, 2022, the fair value of IDB Invest's liquid assets portfolio amounted to \$2.6 billion and is within policy limits.

Borrowings

IDB Invest raises funds primarily through the issuance of debt securities in the international capital markets and diversifies its funding sources by borrowing in different currencies, products and maturities, while maintaining a small borrowing facility with the IDB. As of December 31, 2022, IDB Invest's outstanding borrowings, including fair value adjustments, amounted to \$5.8 billion. IDB Invest also enters into interest rate and currency swaps to convert the proceeds of borrowing transactions mostly into USD floating rate obligations.

Total Capital

IDB Invest is in its seventh consecutive year with positive results, accumulating \$475.4 million in retained earnings since the Private Sector Reform. As of December 31, 2022, IDB Invest's total capital amounted to \$3.0 billion. As part of its Financial Risk Framework approved by the Board of Executive Directors, IDB Invest maintains a Capital Adequacy Policy to estimate capital needs to fulfill its mandate and determine overall lending capacity.

Risk Management

IDB Invest operates under a robust financial risk management framework and Environmental and Social Sustainability Policy designed to enable the prudent management of financial and non-financial risks and operational matters arising from its business activities. In executing its sustainable private sector development business, IDB Invest assumes various risks. Active management of these risks is critical to IDB Invest's ability to both maintain financial sustainability and achieve development impact.

International Credit Rating Agencies

In January 2023, Fitch Ratings affirmed IDB Invest's AAA credit rating and its stable outlook, reflecting expectations of moderate asset growth and continued shareholder support through capital transfers from IDB. In March 2022, Moody's affirmed IDB Invest's Aa1 credit rating and maintained its stable outlook, reflecting IDB Invest's robust capital adequacy and strong asset performance. In July 2022, Standard & Poor's affirmed IDB Invest's AA+ credit rating with a stable outlook, highlighting the fulfillment of its expanded private sector mandate and strengthening of its operational and risk capabilities.

The above information is qualified by the additional information and financial statements appearing elsewhere in this Information Statement. In addition, the Information Statement contains forward-looking information, which may be identified by such terms as "believes", "expects" and "intends," or words of similar meaning. Such statements involve a number of assumptions and estimates that are based on current expectations, which are subject to risks and uncertainties. Consequently, actual future results could differ materially from those currently anticipated. IDB Invest undertakes no obligation to update any forward-looking statements.

Unless otherwise indicated, all information provided in this Information Statement refers to IDB Invest amounts only.

Development Operations

Strategy

The first component of IDB Invest's strategic framework is the Renewed Vision, which underpins the IDB Group Private Sector Reform and reflects the Board of Governors' long-term mandate for IDB Invest to maximize development impact and provide access to financing, technical knowledge and sectoral expertise within a framework of financial sustainability to clients in the Region.

The second component of IDB Invest's strategic framework is the IDB Group's Institutional Strategy, which focuses IDB Invest's strategic priorities on areas where the private sector shows potential for significant contributions to the IDB Group's goals. These include the development challenges of productivity and innovation and economic integration; the cross-cutting issues of gender equality, inclusion and diversity; and the mitigation and adaptation strategies related to climate change and environmental sustainability. Technology and innovation and resource mobilization were added to IDB Invest's strategic priorities through the 2019 Update to the Institutional Strategy (UIS). The IDB Group's Institutional Strategy, together with its Country Strategies that articulate the work of the IDB Group in each of its borrowing member countries, further define the IDB Group's vision and guide its actions. The implementation of the IDB Group's Institutional Strategy is monitored through its Corporate Results Framework³ (CRF), which sets institutional targets that map directly to the UN Sustainable Development Goals⁴ (SDGs).

IDB Invest's strategic framework is implemented through its Business Plan. The Business Plan is updated on a triennial basis, which establishes the areas of focus and performance indicators in alignment with the Renewed Vision and the UIS. In December 2019, the Board of Executive Directors approved IDB Invest's 2020-2022 Business Plan, setting a clear strategic framework to guide its work throughout the following three years.

In addition to the Business Plan, IDB Invest prepares a Business Plan Update on an annual basis to validate institutional priorities, present financial projections and confirm the plan of operations, risk parameters and funding authorization for the coming year. Following past practice, in the fall of 2022, Management would have been developing and discussing with the Board of Executive Directors a new three-year Business Plan. Considering the Board of Governors' mandate to present a proposal for a New Vision and Business Model for IDB Invest, Management, in consultation with the Board of Executive Directors, opted to develop a business plan update for 2023. In December 2022, the IDB Invest Board of Executive Directors approved the 2023 Business Plan Update. Action plans and roadmaps, which serve to implement specific strategic objectives outlined in the Business Plan, are also part of the strategic framework.

In March 2021, the Boards of Governors of IDB and IDB Invest approved a resolution mandating an analysis of several subjects significant to the social and economic status of the regional developing member countries, their development challenges, and the strengths and comparative advantages of IDB and IDB Invest. In response to the analytic work, during the 2022 Annual Meetings, the Boards of Governors reaffirmed their commitment to the IDB Group and its continued critical role in promoting sustainable, social and economic development and reducing poverty and inequality throughout the Region. In addition, the Board of Governors of IDB Invest mandated the presentation of a proposal for a new vision and business model for IDB Invest, including an adequate identification of sectoral needs related to the heterogeneity of Latin America and the Caribbean, and the financial, resource, operational and institutional implications.

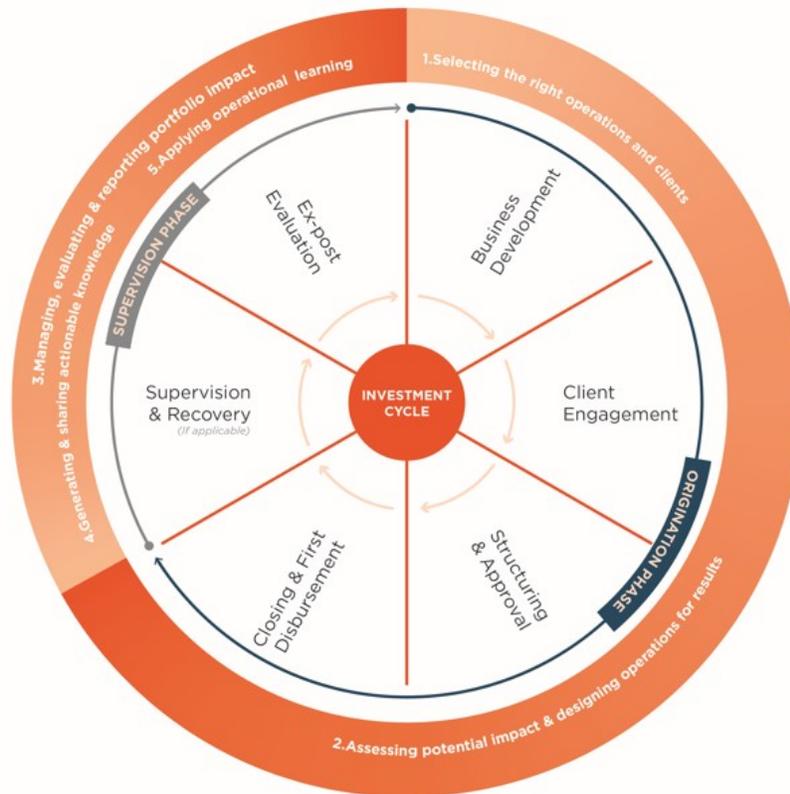

³ IDB Invest's Corporate Results Framework (CRF) is available at <https://crf.iadb.org/en>

⁴ UN Sustainable Development Goals (SDGs) are available at <https://crf.iadb.org/en/sdgs?institution=idbgroup>

Integrated Development-Related Investment Cycle

IDB Invest's development-related investment cycle consists of two phases: (i) the origination phase, which begins with business development and client engagement and proceeds through transaction approval, followed by closing, commitment and first disbursement, and (ii) the supervision phase, which entails client supervision and, if applicable, recovery, and concludes with an ex-post evaluation after financial maturity. IDB Invest's Impact Management Framework and environmental, social and corporate governance (ESG) requirements are integrated into the investment cycle.

Figure 1. IDB Invest Integrated Development-Related Investment Cycle.

Origination Phase

The origination phase includes business development, client engagement, approval and the closing/first disbursement stages. The business development and client engagement stages involve the identification of eligible clients and projects consistent with IDB Invest's Strategic Selectivity Scorecard, enabling IDB Invest to steer origination towards development priority areas identified through the country strategy process, as well as other corporate priorities.

In the path to approval, the investment team, which includes investment officers, credit analysts, development effectiveness experts, ESG experts and lawyers, performs due diligence. The due diligence phase includes structuring, conducting an ex-ante impact assessment using the Development Effectiveness Learning, Tracking, and Assessment (DELTA) Impact Rating System and analyzing risks in preparation for approval. The DELTA is part of the Impact Management Framework⁵ which allows IDB Invest to maximize development

⁵ IDB Invest's Impact Management Framework is fully aligned with leading global initiatives, such as the Operating Principles for Impact Management, of which IDB Invest is a signatory and a member of the Advisory Board, and the OECD-UNDP Impact Standards for Financing Sustainable Development, as well as the Impact Management Project's five dimensions of impact. For more information see www.idbinvest.org/impact.

impact and contribute to reaching the UN SDGs⁶ in the Region. The DELTA score is a key decision-making factor in IDB Invest's portfolio approach, together with the Financial Contribution Rating, which assesses each development-related investment's contribution to IDB Invest's long-term financial sustainability based on the risk-adjusted return on capital (RAROC). Proposed investments must meet certain impact and financial rating thresholds, with decreasing financial contribution requirements for highly impactful development-related investments. The Board of Executive Directors approves each development-related investment, with certain exceptions where this authority has been delegated to Management.

After approval, the investment team proceeds to the closing stage, at which the signing of the financial documents occurs. The origination phase ends with the development-related investment's first disbursement, which is subject to the fulfillment of conditions set forth in the financial documents.

Supervision Phase

The supervision phase includes the supervision and, if applicable, recovery stage, as well as the ex-post evaluation. During supervision, IDB Invest closely monitors projects to identify events and circumstances that could adversely affect performance and to take corrective action proactively. This includes tracking compliance with financial covenants and ESG requirements. The DELTA score is also used during the supervision phase to track and measure progress against the achievement of impact targets set at approval, including the investment's contribution to specific SDG targets, and to identify areas where clients may need additional support to reach development objectives. The DELTA score assigned at origination is updated annually based on the investment's ongoing performance.

A strong presence in the Region allows IDB Invest to closely supervise development-related investments through site visits. Quarterly portfolio reviews by the Portfolio Supervision Committee provide ongoing oversight of IDB Invest's portfolio and include in-depth discussions of country and industry sector exposures and developments, distressed assets and impact performance. Upon maturity or disposition of each development-related investment, IDB Invest conducts a final evaluation. This evaluation compares the expected and actual impact of each investment through a systematic assessment of its relevance, efficiency, effectiveness and sustainability, and also captures the main lessons learned, which are then fed back into the design of new development-related investments. The final performance rating of each evaluation is validated by the IDB Group's independent Office of Evaluation and Oversight, and aggregate performance results are published annually in the IDB Group's Development Effectiveness Overview (DEO)⁷.

Financial & Non-Financial Products

Through its development operations, IDB Invest provides financial and blended finance products in the form of loans, guarantees, debt securities and equity investments. To further amplify its impact, IDB Invest mobilizes financing from other investors through loan participations, loan syndications and other co-financing arrangements, unfunded participations, and guarantees of debt instruments. To complement and enhance the impact of its development operations, IDB Invest also provides non-financial products, including advisory services, capacity building and knowledge, along with leading environmental, social and corporate governance and risk management solutions to its clients. The objectives of all these products are to increase MSME access to finance, promote infrastructure for development, support innovation and technological development, enhance the provision of basic goods and services and foster green growth while supporting the transversal priorities of inclusion, climate change and digital transformation.

Financial Products

Loans

IDB Invest offers loans at market-based rates, in U.S. dollars or selected local currencies, with tenors in line with the client's objectives. The terms are flexible terms, and the conditions based on the client's needs and/or investment requirements.

⁶ The SDGs are utilized as a set of universal goals to combat the urgent environmental, social and economic challenges facing our world.

⁷ DEO 2022. <https://publications.iadb.org/en/development-effectiveness-overview-deo-2022>

Debt Securities

IDB Invest subscribes bonds, notes and other debt securities issued by clients. In recent years, IDB Invest has developed a strong market position supporting clients issuing thematic bonds (e.g., green, social and sustainable).

Guarantees

IDB Invest issues guarantees under different structures to enable its clients to finance projects, obtain access to trade finance or capital markets or enhance the working capital of their supply chains. IDB Invest also offers risk-sharing facilities or loss-sharing arrangements, which allow clients to reduce risks while expanding their products and services.

Equity and Mezzanine

IDB Invest provides equity and mezzanine investments to support companies in scaling up their operations. These investments may include loans with income participation or conversion features, subordinated loans, preferred and common equity, warrants and interests in limited partnerships or similar entities. In addition, through participation on the board of directors of certain investee companies and through advisory mandates, IDB Invest can add value to investee companies, most notably by strengthening environmental, social and governance standards and by crowding in additional investors.

Trade and Supply Chain Finance (TSCF)

IDB Invest's supply chain products address the needs of buyers and sellers in the Region by offering a set of efficient, reliable and comprehensive financial solutions for every stage of a client's value chain, supporting the client's local and international trade activities. The product offering includes accounts payable financing (reverse factoring), accounts receivable finance (factoring), pre-export finance, import and export finance, stand-by letters of credit (SBLC) and trade-related working capital liquidity lines.

Additionally, through its Trade Finance Facilitation Program (TFFP), IDB Invest promotes international trade with two main products: (i) credit guarantees issued in favor of confirming banks to cover the commercial and political risks they assume on accepting eligible trade instruments issued by issuing banks in the Region; and (ii) loans to borrowers in the Region to finance their international trade portfolio, for which IDB Invest may also mobilize third-party capital.

Blended Finance

Blended Finance refers to the use of concessional financing for high impact development-related investments where risks are too high for commercial finance alone. This product provides financial flexibility as it allows for multiple types of interventions, ranging from performance grants, equity, debt and risk mitigation instruments. IDB Invest also offers advice and investment management solutions to providers and recipients of concessional finance and is the main conduit of concessional resources in the Region.

Mobilization

IDB Invest has extensive experience connecting clients and investors to suit different time horizons, sector priorities, risk appetites and return expectations. IDB Invest works with a range of market players – international commercial banks, regional commercial banks, institutional investors, such as insurance companies and pension funds, impact investors and sovereign wealth funds – to mobilize financing in the form of loan participations, co-financing arrangements (parallel loans, equity investments and capital market issuances), unfunded participations (purchased credit insurance and unfunded risk participations) and guarantees of debt instruments. IDB Invest may also structure its transactions to include B Bonds to cater to institutional investors. Through its mobilization efforts, IDB Invest is able to provide clients access to larger financing packages.

Non-Financial Products

IDB Invest's value proposition is to offer clients a combination of financial and non-financial products. Non-financial products include advisory services, knowledge and capacity building based on the following topics:

Climate Change

IDB Invest's non-financial services works with clients to implement climate change mitigation strategies and to increase resiliency through adaptation measures. Working across sectors, IDB Invest supports clients to maximize new climate technology and identify present and future climate risks.

Gender, Diversity and Inclusion

IDB Invest works with clients to narrow gender, diversity and inclusion gaps and to find new business opportunities. IDB Invest supports clients in their human capital strategy to attract and retain the best talent and advises clients on their market strategy to identify potential opportunities and segments both within their client base and throughout their value chain. IDB Invest conducts specific risk assessments to prevent vulnerable or disadvantaged groups from being disproportionately affected by project-related adverse impacts or being at a disadvantage when accessing project benefits. IDB Invest guides clients to mitigate those risks and avoid discrimination in relation to local communities and among workers.

Digital Transformation

IDB Invest works with its clients to integrate digital solutions and services with cross-cutting themes that are scalable to improve private sector productivity and accelerate economic recovery.

Micro, Small and Medium-Sized Enterprises and Sustainable Business Practices

IDB Invest works with its clients to increase access to financing, products and services for underserved populations and to better integrate MSMEs across value chains in the Region supporting their growth and sustainability practices.

⁽¹⁾ Represents investments with operations in multiple countries.

Operational Highlights

IDB Invest originates new private sector investments and supervises the entire private sector investment portfolio and activities for the IDB and IDB Invest. Amounts presented in this section refer to the combined portfolio of IDB Invest and IDB private sector activities, where indicated.

Combined Commitments

A commitment generally occurs when the legal documentation has been signed by the client and IDB Invest and conditions for commitment, if any, have been met. The combined commitments in Table 3 presents commitments for the private sector investment portfolio and activities of IDB Invest and the IDB.

Table 3. Combined commitments (in US\$ million).

	<u>December 31, 2022</u>	<u>December 31, 2021</u>
Combined commitments		
Short-term ⁽¹⁾	\$ 3,911	\$ 3,216
Long-term	2,710	3,104
Total combined commitments ⁽²⁾	\$ 6,621	\$ 6,320

⁽¹⁾ Short-term relates to TSCF products with a tenor of less than one year.

⁽²⁾ Includes commitments related to revolving TSCF products based upon the usage of funds.

Mobilization

Unfunded participations ⁽¹⁾	526	478
Total long-term mobilization	2,232	2,800
Total mobilization ⁽²⁾	\$ 3,101	\$ 2,978

⁽¹⁾ As of December 31, 2022, A loan participations and unfunded participations covered \$155.0 million and \$1,262.1 million of Total combined commitments, respectively, (zero and \$529.4 million December 31, 2021) included in Table 3.

⁽²⁾ In 2022, IDB Invest refined its mobilization definition related to revolving TSCF products resulting in a slight change from the previously disclosed FY21 figure of \$2,972.4 million.

Assets under Management

Total assets under management comprises all private sector development-related investments and activities of the IDB Group including donor funds administered by IDB Invest and the IDB. Assets under management for the years ended December 31, 2022 and 2021 are presented in Table 5.

Table 5. Assets under Management (in US\$ million).

	Year ended December 31	
	2022	2021
IDB Invest's development-related portfolio ⁽¹⁾	\$ 6,729	\$ 5,712
IDB's private sector development-related portfolio ⁽¹⁾	4,981	5,143
IDBG private sector donor funds portfolio ⁽¹⁾	858	896
IDB Invest's managed participation arrangements ⁽²⁾	3,770	3,142
Total undisbursed commitments for IDB Invest and IDB private sector	2,312	2,584
Total assets under management	\$ 18,650	\$ 17,477

⁽¹⁾ Includes development-related loans, guarantees, debt securities and equity investments at cost. Guarantees provided by the IDBG managed donor funds may cover IDBG's own account exposure.

⁽²⁾ Includes A loans, B loans and B bonds.

Financial Highlights

Selected Financial Data

The following information is based upon and should be read in conjunction with the detailed information appearing in this Information Statement.

Table 6. Selected Financial Data (in US\$ thousands).

<i>Income Statement Data</i>	Years ended December 31				
	2018	2019	2020	2021	2022
Development related investments income	\$ 71,634	\$ 137,131	\$ 187,185	\$ 257,194	\$ 333,974
(Provision)/release of provision for credit losses	(18,313)	(36,697)	(111,756)	(5,707)	(64,413)
Total other income	86,749	84,709	94,929	92,199	97,484
Borrowings expense	(26,612)	(44,570)	(47,957)	(62,896)	(117,529)

Allowance for credit losses to development related debt investments ²	4.4 %	4.8 %	4.8 %	4.3 %	4.9 %

Notes:

¹On January 1, 2020, IDB Invest adopted the current expected credit loss (CECL) model. This concept applies to the development-related debt investments portfolio (which includes loans and debt securities). Prior to 2020, the allowance for credit losses applied to loans only.

²On January 1, 2020, IDB Invest adopted the current expected credit loss (CECL) model. This ratio is related to development-related assets only, and does not consider the liability for undisbursed commitments and financial guarantees. Prior to 2020, this ratio was defined as Allowance for loan losses as a percentage of Loan portfolio.

Definitions:

ROA: Net income annualized for the previous twelve months divided by the average of current and previous year's Total assets.

ROE: Net income annualized for the previous twelve months divided by the average of current and previous year's Total capital.

Leverage ratio: Borrowings plus Guarantees outstanding divided by Total capital (Expressed in units).

Equity to total assets: Total capital divided by Total assets.

Liquidity to total assets: Liquid assets divided by Total assets.

Allowance for credit losses to development-related investments: Allowance for credit losses divided by development-related loans and debt securities at amortized cost.

Financial Results

In 2022, IDB Invest marked its seventh consecutive year of profits since the IDB Group Private Sector Reform. Net income amounted to \$104.6 million in 2022, a decrease of \$26.3 million compared to \$130.9 million in 2021. Despite the impacts of global inflation, an environment of rising interest rates and evolving uncertainties surrounding the Russian war on Ukraine, financial results remain strong and consistent with the growth of the institution and the portfolio.

Development-Related Investments Income

Total income from development-related investments, net of provision for credit losses, amounted to \$269.6 million in 2022, an increase of \$18.1 million compared to \$251.5 million in 2021. This increase is mainly due to an increase of \$149.1 million in development-related investments interest and other income, partially offset by an increase in the provision for credit losses as a result of portfolio growth. The increase of \$149.1 million in development-related investments interest and other income is driven by an increase in development-related debt investments (includes loans and debt securities) interest and other income on a higher outstanding portfolio combined with an environment of rising global interest rates partially offset by an increase of \$72.3 million in Losses on equity investments on a higher outstanding portfolio driven by fair value changes. The increase of \$58.7 million in the provision for credit losses is mainly driven by a higher outstanding portfolio and a downward prediction in regional macroeconomic and credit conditions outlook compared to 2021.

Treasury Operations, Liquid Assets & Borrowings, and Other Income

Total income from development-related investments, liquid assets and other income, net of borrowings expense⁸, amounted to \$244.1 million in 2022, a decrease of \$44.9 million as compared to \$289.0 million in 2021. This decrease after the above mentioned Income from development-related investments, net, was mainly related to treasury operations driven by an increase of \$13.6 million in Loss from liquid assets, net, related to fair value changes and an increase of \$54.6 million in Borrowings expense driven by higher interest expenses on a 5.5% higher average borrowings outstanding portfolio to support growth in the Region as well as a rising global interest rate environment. Other income comprised of Service fees from related parties and Mobilization fees and other income amounted to \$97.5 million in 2022, an increase of \$5.3 million as compared to \$92.2 million in 2021. These factors explain the decrease of \$44.9 million in Total income/(expense) from development-related investments, liquid assets and other income, net of borrowings expense as compared to the prior year.

Other Expenses

Total other expenses amounted to \$180.9 million in 2022, an increase of \$8.4 million as compared to \$172.5 million in 2021. This increase was mainly due to higher workforce costs aligned with IDB Invest's focused priority areas presented to the Board of Executive Directors in the 2022 Business Plan and was partially offset by lower total pension expenses. IDB Invest continued to strengthen its operational capacity to execute operations in a more complex environment. It also promoted the optimization of organizational processes through innovative technologies and system improvements.

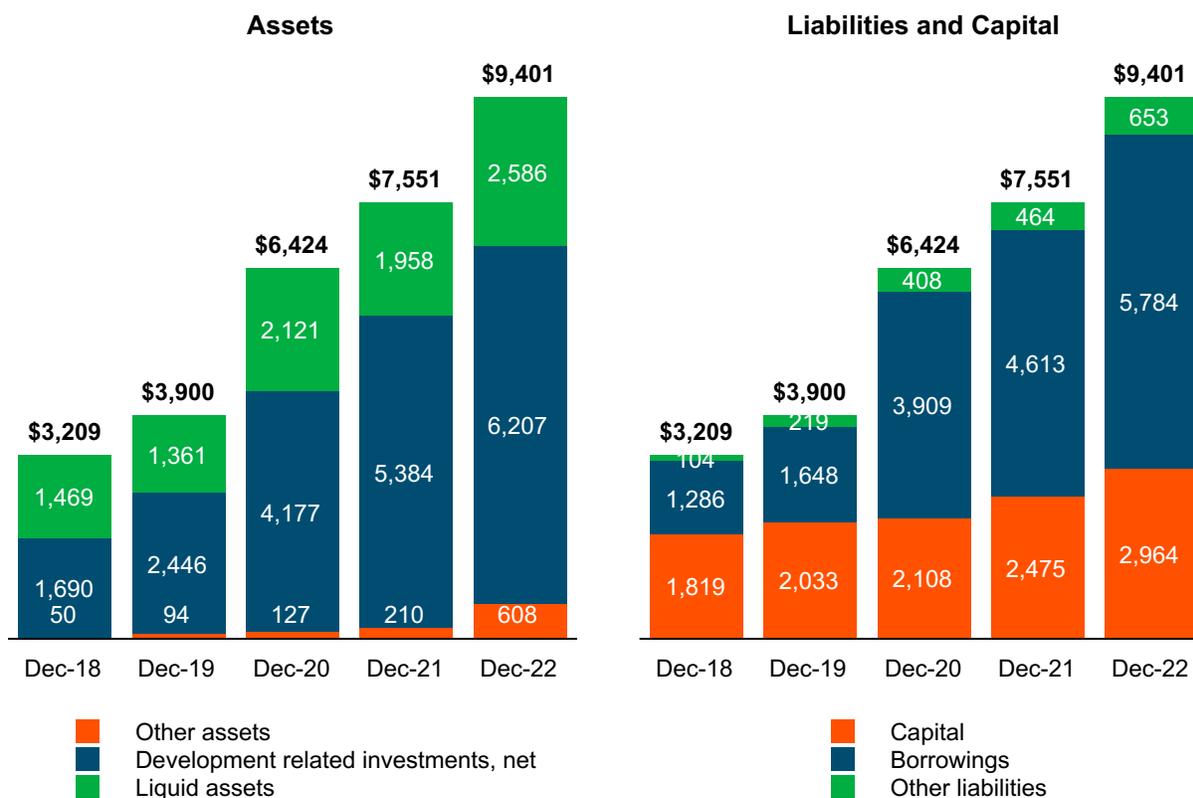

Non-trading Portfolio

Gains from changes in fair value on non-trading portfolios and foreign exchange transactions, net, amounted to \$41.3 million in 2022, an increase of \$26.9 million as compared to \$14.4 million in 2021. This increase was due to fair value gains of \$16.7 million and foreign exchange gains of \$24.6 million. Refer to Note 11 of the Financial Statements for additional information related to the non-trading portfolio.

Balance Sheet Highlights

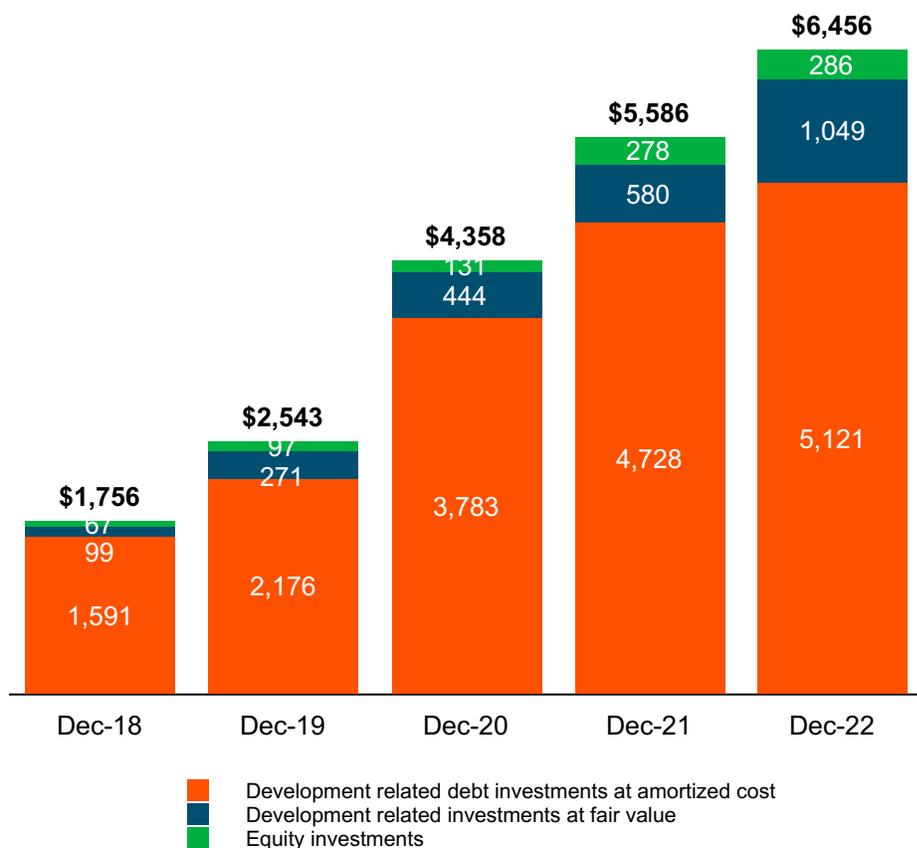

Figure 2. IDB Invest's Balance Sheets by Components (in US\$ million).

Development-Related Investments

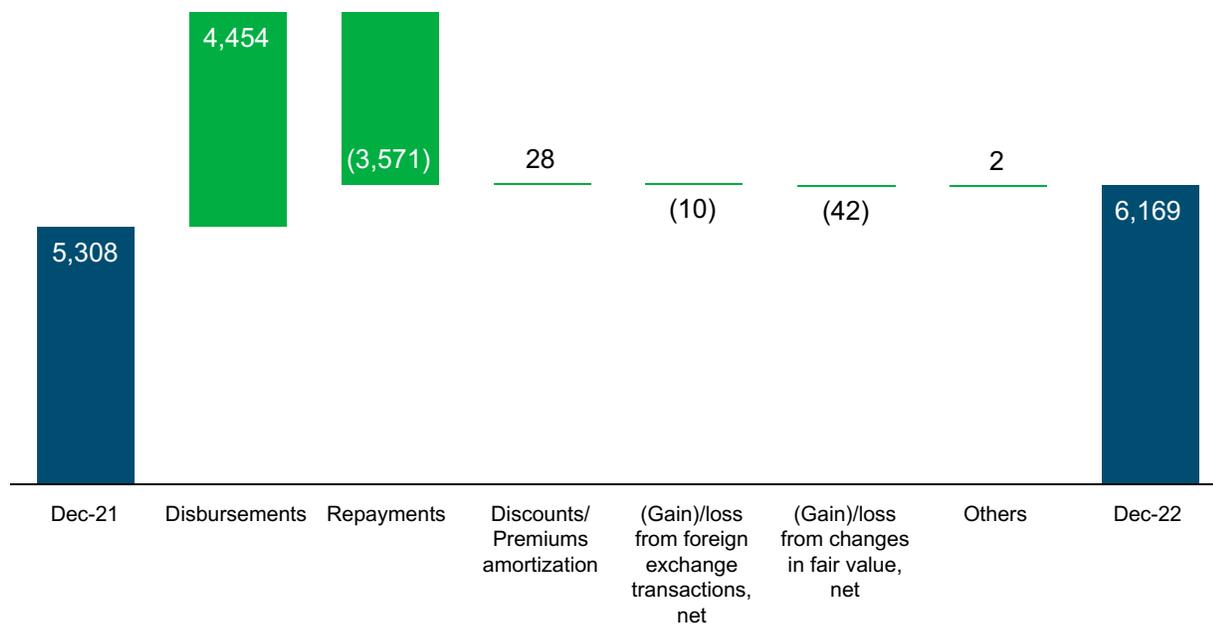

IDB Invest's gross development-related investments, comprised of loans, debt securities and equity investments (excluding guarantees), amounted to \$6.5 billion as of December 31, 2022, an increase of 16% from \$5.6 billion as of December 31, 2021. To complement the growth in the development-related debt investments portfolio, equity investments portfolio growth continued with 3.2% in 2022 along with 111.3% in 2021 to support the recovery in the Region. In addition, undisbursed commitments toward development-related investments remained strong and amounted to \$1.7 billion as of December 31, 2022, a mild decrease of \$0.3 billion from \$2.0 billion as of December 31, 2021.

Figure 3. IDB Invest's Gross Development-Related Investments Portfolio (in US\$ million).

IDB Invest's development-related debt investments, comprised of loans and debt securities, including fair value adjustments, amounted to \$6.2 billion as of December 31, 2022, an increase of \$0.9 billion from \$5.3 billion as of December 31, 2021. This increase is mainly due to disbursements in new development-related debt securities at fair value. Refer to Note 4 of the Financial Statements for additional information related to the development-related investments portfolio.

Figure 4. IDB Invest's Development-Related Debt Investments Portfolio (in US\$ million).

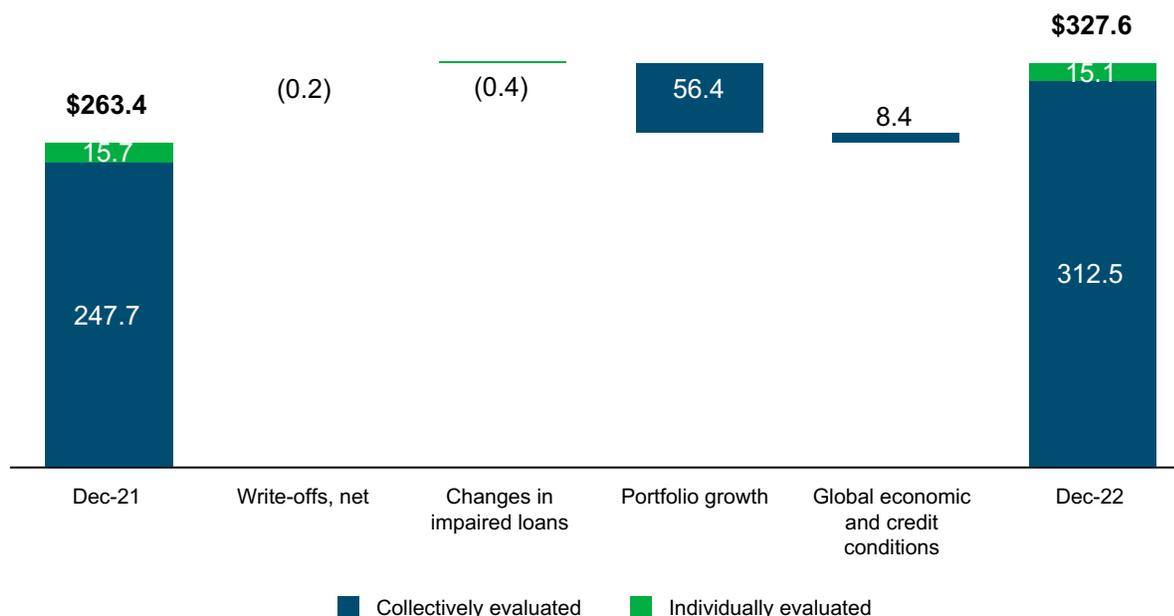

Allowance for Credit Losses

IDB Invest's gross development-related investments portfolio continued to grow in 2022 while maintaining a consistent level of portfolio credit quality relative to 2021. The allowance for credit losses as a percentage of development-related debt investments outstanding was 4.9% as of the end of 2022 compared to 4.3% as of the end of 2021.

The allowance for credit losses on development-related debt investments and on undisbursed commitments and guarantees increased 23.3% and increased 27.8%, respectively, as of the end of 2022 compared to the end of 2021. Refer to Note 4 of the Financial Statements for additional information related to the allowance for credit losses.

Figure 5. Allowance and provision/(release of provision) for credit losses (in US\$ million).

Liquid Assets Portfolio

IDB Invest's liquid assets portfolio is comprised of cash and investment securities. IDB Invest substantially invests its liquid assets portfolio in highly rated securities and bank deposits reflecting its objectives of principal protection, liquidity and yield. IDB Invest's strategy for its liquid assets portfolio is to provide sufficient liquidity and resources to finance development-related investments in compliance with its Liquidity Policy.

As of December 31, 2022, the liquid assets portfolio, including fair value adjustments, amounted to 2,586.2 million, an increase of \$628.2 million compared to 1,958.0 million as of December 31, 2021. This increase is consistent with its Liquidity Policy.

IDB Invest's liquid assets portfolio includes local currency liquid assets denominated in three currencies as of December 31, 2022. In 2022, IDB Invest expanded its local currency liquid assets to include Colombian pesos to complement its existing local currency liquid assets in United States dollars and Mexican pesos to support development-related investments in the Region. Refer to Notes 3 and 10 of the Financial Statements for additional information related to the liquid assets portfolio.

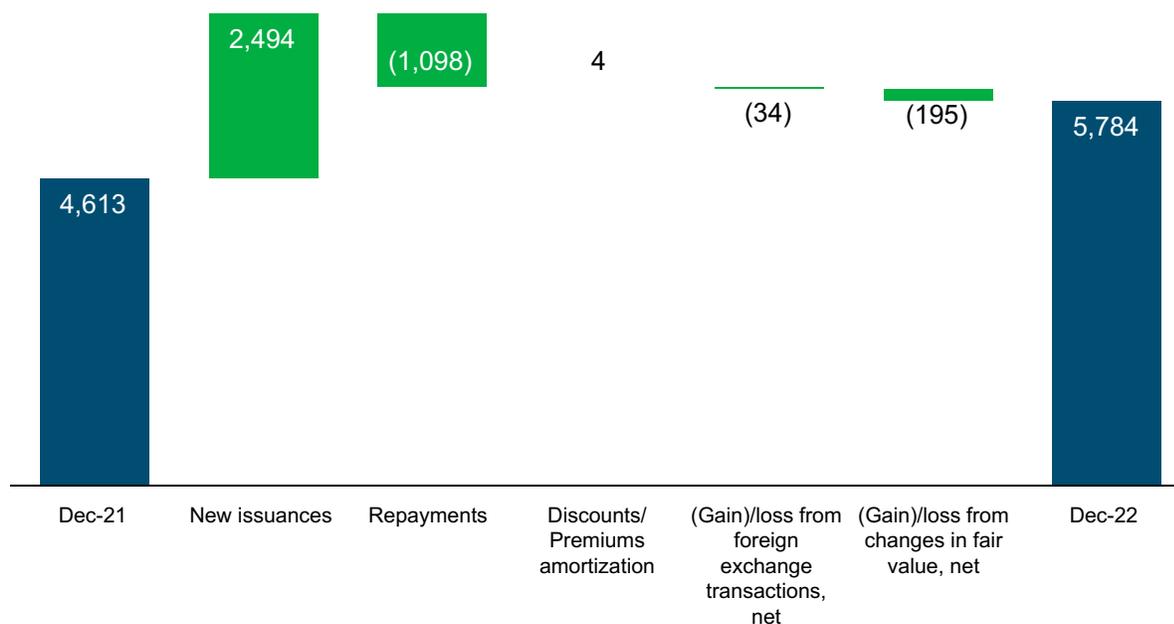

Derivatives

IDB Invest manages interest rate and currency risks primarily through derivatives. In 2022, the derivatives portfolio comprised of interest rate and currency swaps continued to grow consistent with development-related investments and funding activities. As of December 31, 2022, derivative assets and derivative liabilities, including fair value adjustments, amounted to \$169.1 million and \$362.9 million an increase of \$151.5 million and \$282.9 million compared to \$17.7 million and \$79.9 million, respectively, as of December 31, 2021, to support portfolio growth. Refer to Notes 7 and 11 of the Financial Statements for additional information related to the derivatives portfolio.

Borrowings

IDB Invest's outstanding borrowings, including fair value adjustments, amounted to \$5.8 billion as of December 31, 2022, an increase of \$1.2 billion from \$4.6 billion as of December 31, 2021. This is mainly due to significant issuances executed during 2022 to refinance maturities and support portfolio growth in combination with fair value and foreign exchange adjustments. Refer to Note 6 of the Financial Statements for additional information related to the borrowings portfolio.

Figure 6. IDB Invest's Borrowings Portfolio (in US\$ million).

Capital

IDB Invest's capital includes total paid-in capital from members, retained earnings and accumulated other comprehensive income/(loss). IDB Invest's total capital as of December 31, 2022, amounted to \$3.0 billion, an increase of 20% from \$2.5 billion as of December 31, 2021. This increase in 2022 was the result of \$195.4 million in capital contributions received, \$104.6 million of net income and other comprehensive income of 189.6 million, which was composed of unrealized gains on pension obligations due to an increase in discount rates and unrealized gains in the fair value of borrowings resulting from changes in IDB Invest's own credit risk spread.

Funding Sources

Capital

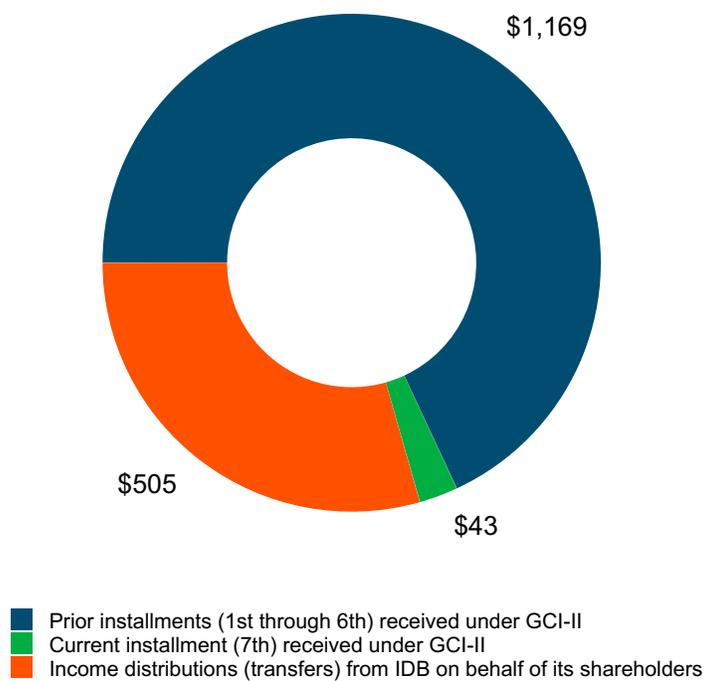

Since its inception, IDB Invest has received two general capital increases (GCI): GCI-I approved in 1999 and GCI-II approved in 2015. IDB Invest's capitalization plan includes capital to be contributed by IDB Invest shareholders as well as capital contributions to be funded through income distributions by IDB on behalf of its shareholders introduced under IDB Invest's GCI-II. These income transfers are intended to be achieved during the period 2018-2025 for a total amount of \$725 million. These transfers are conditional upon annual IDB Board of Governors approval, which considers the continued maintenance of the IDB's Triple A long-term foreign currency credit rating, among other financial policies of the IDB.

Under GCI-II, IDB Invest has received \$1.7 billion in total capital contributions as of December 31, 2022. IDB Invest shareholders have made capital payments of \$1.2 billion under GCI-II, with the timing of the remaining payments extended to January 31, 2023. In addition, IDB Invest has received income distributions totaling \$505.1 million, with the remaining capital installments expected to be completed by 2025.

Further, the IDB intends to send a proposal for a \$72 million distribution to the shareholders of the IDB for a concurrent contribution to IDB Invest on their behalf for approval at the Board of Governors' meeting to be held in March 2023. IDB Invest expects to receive approximately \$340.0 million under the remaining installments through 2025, demonstrating continued shareholder support. The consistency of shareholders' capital contributions is a clear signal of the strength of shareholder support to IDB Invest's mission and capacity to respond and deliver high impact results.

Figure 7. IDB Invest total GCI-II Capital Contributions as of December 31, 2022 (in US\$ million).

Total GCI-II capital contributions: \$1,717.7 million

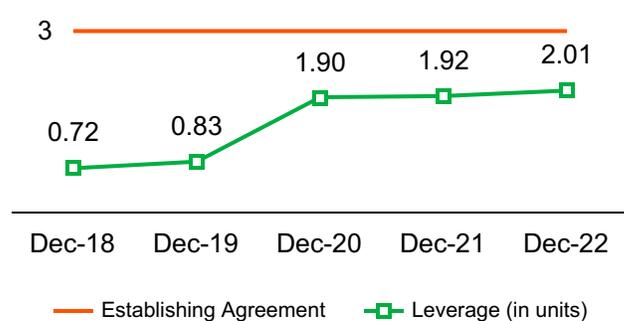

Borrowings

IDB Invest raises funds primarily through the issuance of debt securities in the international capital markets.

In addition, IDB Invest raises private placement funds in local currency to provide local currency financing to its clients and to promote the development of local capital markets. IDB Invest also maintains a borrowing facility with the IDB.

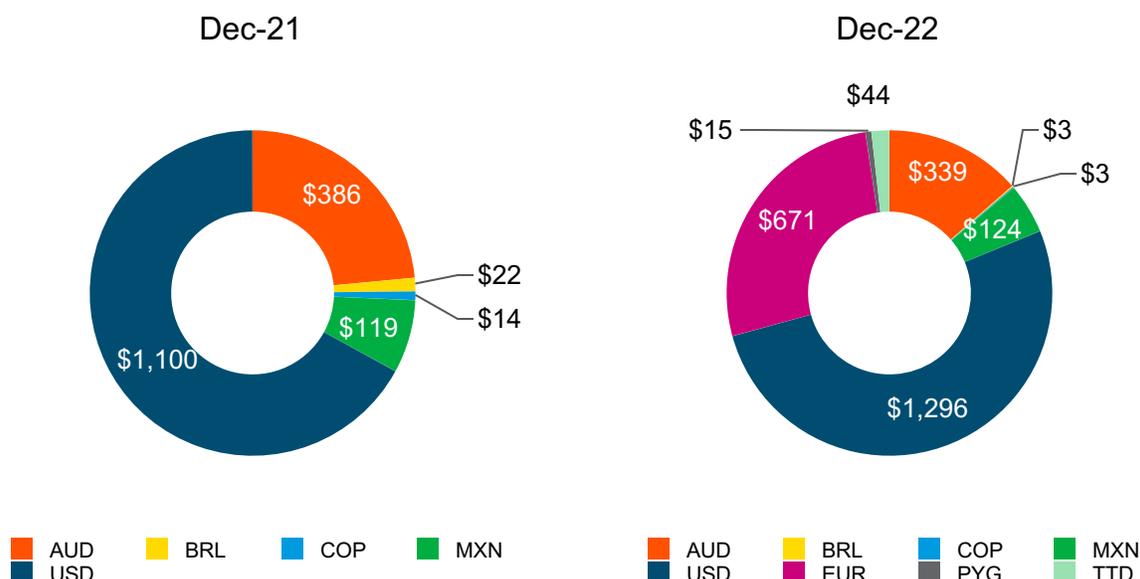

As of December 31, 2022, IDB Invest's leverage ratio was 2.01 (1.92 as of December 31, 2021) and remains below the maximum of 3.0x established under its Establishing Agreement.

Figure 8. IDB Invest's leverage ratio.

In 2022, IDB Invest's new borrowings were denominated in eight currencies. New borrowings related to international capital markets were denominated in AUD, EUR and USD. Additional five currencies were raised from the local capital markets, private placements and through its credit facilities including with the IDB. Refer to Note 6 of the Financial Statements for additional information related to the borrowings portfolio and credit facilities.

Figure 9 - IDB Invest's new borrowings by currency (in US\$ million).

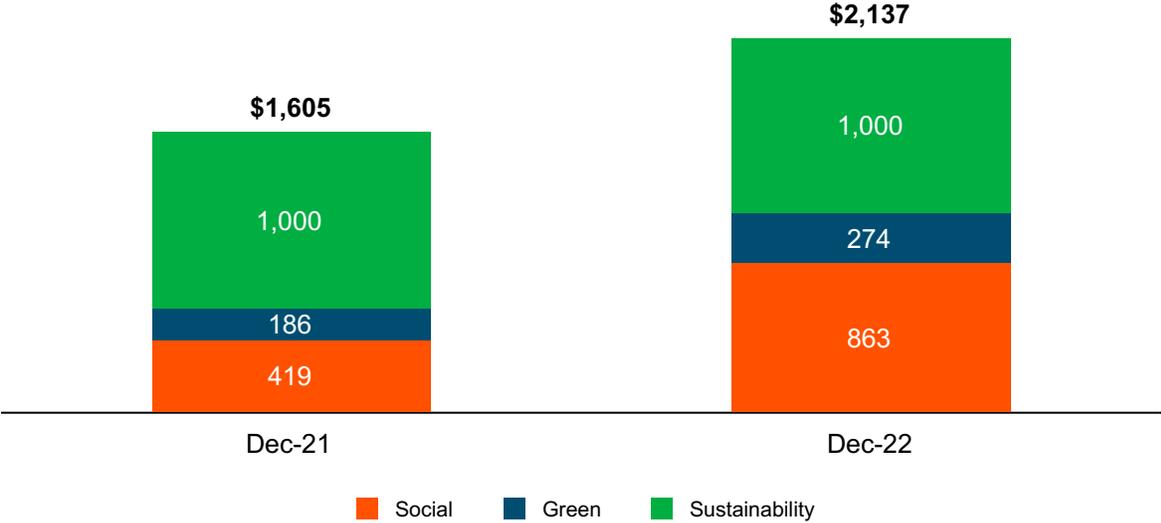

From time to time, IDB Invest enters into interest rate and currency swaps to convert the proceeds of borrowing transactions into USD floating rate obligations. As of December 31, 2022, IDB Invest had notional payables from borrowing-related interest swaps of \$2,900.0 million and gross payables from borrowing-related cross currency swaps of \$1,479.8 million (\$2,900.0 million and \$487.6 million, respectively as of December 31, 2021). Taking into consideration the effect of these borrowing-related swaps, 77% of IDB Invest's borrowings were USD denominated floating rate obligations as of December 31, 2022 (73% as of December 31, 2021). The remaining local currency fundings are deployed to support development-related investments.

Final contractual maturities on IDB Invest's borrowings range from 2 years to 20 years. Actual maturities may differ from contractual maturities as call and prepayment features may be embedded in certain of IDB Invest's borrowings.

IDB Invest issues green, social and sustainability bonds under its Sustainable Debt Framework⁹ aligned with the Green Bond Principles and Social Bond principles published by the International Capital Markets Association (ICMA). Vigeo Eiris, a company owned by Moody's ESG solutions, issued a Second Party Opinion confirming the framework's alignment with the Green Bond Principles and Social Bond Principles and awarding it the highest score for its contribution to sustainability. In 2022, IDB Invest published its first Sustainable Bond Allocation and Impact report for the sustainable bonds issued in 2021. Sustainalytics performed an external review of the report confirming the allocation of funds to eligible projects as defined in the Sustainable Debt Framework. Of IDB Invest's new borrowings detailed above, 85.4% were thematic bonds (97.8% in 2021). Refer to the following figure for additional details by thematic bond type.

⁹ More information about IDB Invest's Sustainable Debt Framework, including the Sustainable Bond Program Allocation and Impact Report 2021, is available at <https://idbinvest.org/en/investors/>

Figure 10 - IDB Invest's new borrowings by thematic bond type (in US\$ million).

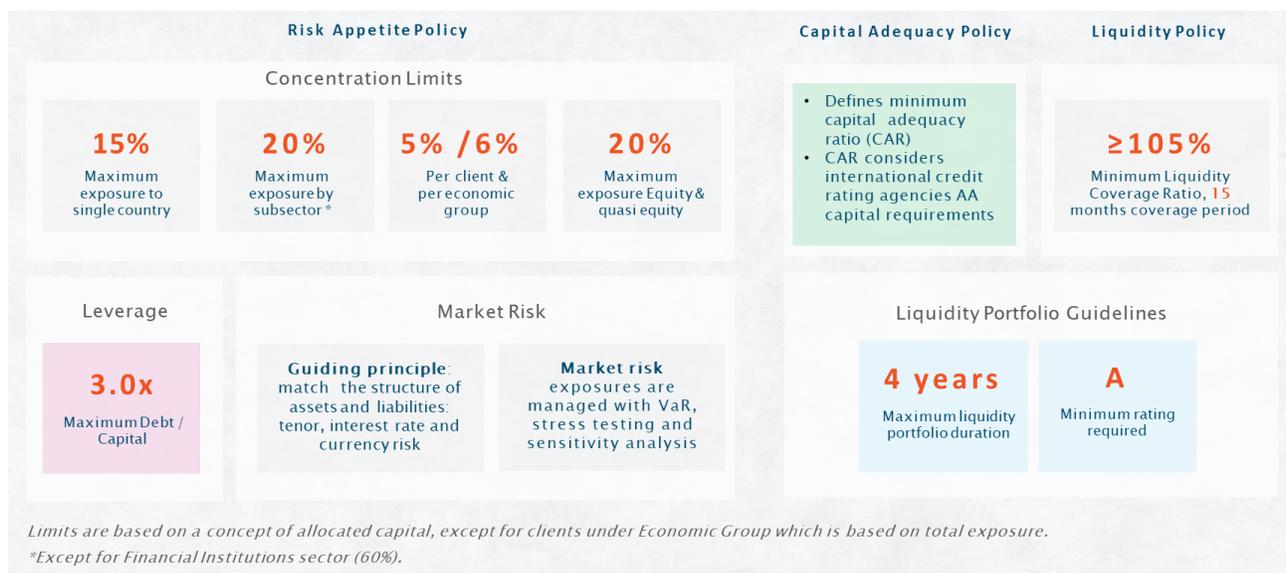

Risk Management

Risk Governance Structure

In its ordinary course of business, IDB Invest is exposed to an array of financial and non-financial risks that it must monitor and manage. The Establishing Agreement and subsequent resolutions approved by the Board of Governors and Board of Executive Directors govern IDB Invest's risk management policies.

IDB Invest's financial risk management policies are set forth in the Financial Risk Framework, which encompasses the Risk Appetite Policy, the Capital Adequacy Policy and the Liquidity Policy. The Financial Risk Framework is reviewed by the Board of Executive Directors on a triennial basis and was last updated as of March 3, 2021.

Figure 11. Summary Financial Risk Framework.

In addition to its financial risk management policies, IDB Invest's Environmental and Social Sustainability Policy¹⁰ (Sustainability Policy), approved by the Board of Executive Directors on April 10, 2020, and effective on December 15, 2020, details its commitment to sustainable development as the foundation of its approach to risk management, as well as its development mandate. This policy and its implementation manual include a detailed description to help clients, investors and development practitioners understand how to mainstream ESG practices and how the policy is applied during the development-related investment cycle.

IDB Invest's risk management operates under a three lines of defense model. The first line of defense resides with Management and the process owners that have primary responsibility for their respective day-to-day operational activities. The second line of defense includes the Risk Management Department, the Office of Institutional Integrity and the Office of Ethics. The third line of defense includes the Office of the Executive Auditor (AUG), the Office of Evaluation and Oversight (OVE) and the Independent Consultation and Investigation Mechanism (ICIM).

The Risk Management Department is organized in the following functional areas: Credit Risk Management; Environmental and Social Risk; Financial and Operational Risk; and Special Assets. These areas identify, measure and control existing and emerging risks related to certain financial, non-financial and operational matters providing compliance and oversight in the form of frameworks, policies, tools and techniques to support risk and compliance management.

¹⁰ More information about IDB Invest's Environmental and Social Sustainability Policy is available at: <https://www.idbinvest.org/en/sustainability>.

Risk Appetite

IDB Invest's Risk Appetite Policy provides qualitative and quantitative guidance for different risk types. These guidelines form the cornerstone of IDB Invest's risk appetite and underpin all risk management policies and guidelines.

IDB Invest's overall market risk appetite is limited, as the Risk Appetite Policy defines a limit based on Value-at-Risk (VaR) and provides that IDB Invest shall match the structure of its assets and liabilities considering interest rates, maturities and currency denomination.

Diversification is an important part of the Risk Appetite Policy, with concentration limits defined in terms of country, industry sector, economic groups and clients. IDB Invest intends not to be a sole source of funding for investments and limits its participation so that the risk is shared with other market participants.

The Risk Appetite Policy also stipulates that development-related investments must meet specified environmental and social sustainability criteria and mitigate corporate governance, integrity and reputational risks, consistent with IDB Invest's Environmental and Social Sustainability Policy and Integrity Framework. Development-related investments must also include adequate provisions to prevent, control and mitigate negative impacts on the environment and on communities, improve environmental quality and comply with local labor laws and regulations and IDB Invest's standards.

Other types of risks, such as operational risk, are also discussed in the Risk Appetite Policy. Refer to the Operational Risk section below for additional details.

Capital Adequacy

Regular capital adequacy assessments are a fundamental pillar of the management of any financial institution. Development banks, such as IDB Invest, although not regulated, by virtue of their mandates are generally required to hold more capital than their commercial counterparts. Within its Financial Risk Framework, IDB Invest estimates how much capital it needs to retain to fulfill its mandate, which also helps determine its overall lending capacity.

IDB Invest assesses capital adequacy via a Capital Adequacy Ratio (CAR) by dividing Available Capital (AC) by Required Capital (RC). AC is equal to IDB Invest's net worth, as stated in its most recent financial statements. RC is determined as the highest capital requirement from either IDB Invest's internally developed economic capital model or the estimated capital requirements under the international credit rating agencies methodologies that assess IDB Invest's capital adequacy in a quantitatively supported and replicable way. The Capital Adequacy Policy describes different possible levels of capitalization, requiring different levels of analysis and potential action plans. The policy also considers a buffer and requires compliance under forward looking stress scenarios. The CAR factors into IDB Invest's financial planning and includes regular stress testing and reporting.

IDB Invest's annual targets are based on quantitative metrics, including the CAR, that are approved by the Board of Executive Directors. In addition, IDB Invest aims to maintain at least an AA rating as determined by the Board of Governors.

Liquidity Risk

Liquidity risk is defined as the risk that IDB Invest would not be able to meet its financial obligations on a timely basis. IDB Invest's Liquidity Policy establishes the overall liquidity requirements measured using its Liquidity Coverage Ratio (LCR)¹¹ to determine its ability to fulfill liquidity needs under stressed market conditions for an extended period of time that allows it to deliver on its mandate while preserving its international credit ratings.

The target LCR and coverage period are approved by the Board of Executive Directors on an annual basis. For 2022, IDB Invest's target minimum LCR is 105% with a coverage period of 15 months of projected cash flows. As of December 31, 2022, IDB Invest's LCR was 117% above the minimum required level.

¹¹ LCR is the ratio of available liquidity at a point in time to the liquidity required to sustain cash payments during a pre-determined time period (Coverage Period) considering estimated sources and uses of liquidity under stressed market conditions.

Under the Liquidity Policy, stressed market conditions assume that:

- IDB Invest is unable to access additional sources of funding, such as issuing debt in the markets or obtaining funding through other means;
- IDB Invest's initial sources of liquidity, including marketable assets and inflows, are adjusted conservatively by applying proportional reductions in value, also referred to as haircuts; and
- IDB Invest continues to originate new operations for half of the coverage period in accordance with the annual Business Plan.

In addition to the Liquidity Policy, IDB Invest manages liquidity in accordance with (i) the Authorization to Invest Corporation Funds and (ii) the Risk Appetite Policy. The Authorization to Invest Corporation Funds is a resolution of the Board of Executive Directors authorizing IDB Invest to invest all or part of the assets held by IDB Invest that are not immediately required for use in its operations. The resolution gives Management flexibility to obtain diversification from IDB Invest's loan portfolio and optimize the risk and return through investment in instruments in a wide number of market segments.

IDB Invest's liquid assets portfolio guidelines require a minimum external credit rating of A for its fixed income securities and limit the portfolio duration to a maximum of four years. As such, IDB Invest expects to be able to realize these assets as needed to meet its cash requirements, even in a liquidity crisis.

Credit Risk

Credit risk refers to financial or economic loss that may result from time to time from counterparties that default on their obligations to IDB Invest or whose credit quality fluctuates adversely. IDB Invest is exposed to credit risk in its development-related debt investments portfolio and off-balance sheet exposures, as well as all investments in debt securities acquired for liquidity management purposes in its liquid assets portfolio.

Credit risk in development-related investments is actively managed through the credit risk management process. IDB Invest maintains a systematic approval process to analyze the credit risk, safety and yield of proposed investments and to monitor its committed portfolio. IDB Invest's Operating Policy defines the main guidelines for the supervision of the portfolio.

IDB Invest's development-related investment projects are actively supervised after commitment. The Portfolio Management function is responsible for regular monitoring and reporting on the performance of the overall development-related debt investments and equity portfolios to Management's Portfolio Supervision Committee. The portfolio is monitored by personnel in its headquarters in Washington D.C., and offices in the Region. Individual development-related investments are reviewed at least once a year, which may involve a field visit. Certain development-related investments facing critical risks are reviewed with greater frequency.

Among the main risk drivers affecting credit risk of IDB Invest's portfolio of counterparties are the following:

- lower demand that could lead to an excess of supply and lower prices impacting company revenues;
- higher costs of raw materials that could lead to lower margins;
- higher inflation rates;
- deterioration of the financial position of the end-users that purchase the goods and services from borrowers, which could lead to an increase in days of account receivables, putting pressure on working capital needs;
- liquidity constraints for counterparties in the country, which could lead to higher interest expense and lower credit supply by financial intermediaries;
- income volatility to the counterparty's exposure to exchange rate risk when their revenue is generated mainly by local currency sales, but their debt is in foreign currency;
- for some investments, risks are related to the implementation of expansion projects or start-up operations and risks may arise due to cost over-runs, delays or cost increases during the implementation process;
- the political and regulatory environment in which the counterparty operates compared to that affecting other competitors from foreign countries that sell their products in the same market;

- the demand for financial services, which could be hindered by lower growth expectations of the economy or higher burdens foreseen by the economic agents. Moreover, a decrease in the market interest rate could impact the income of IDB Invest clients in the financial sector; and
- any deterioration in the macroeconomic conditions and the competitiveness of borrowers could impact the credit quality of the portfolio of investments in financial intermediaries and have an impact on their earnings due to higher provisions.

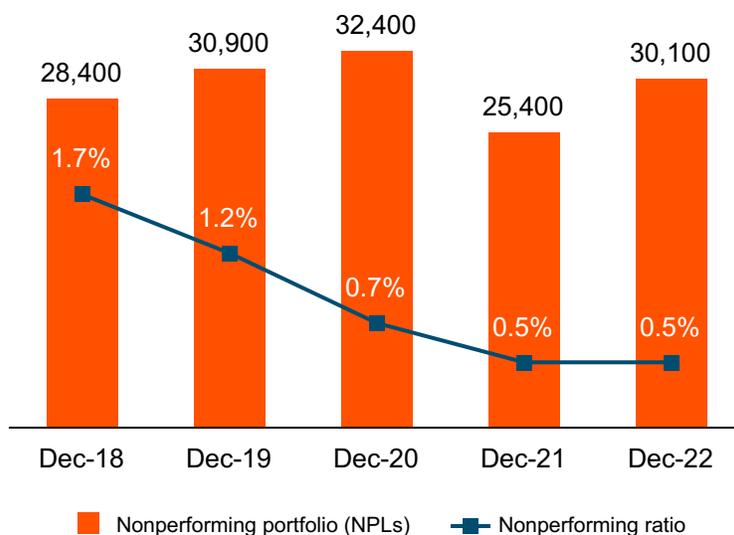

The credit risk of development-related debt investments is quantified in terms of the probability of default (PD), loss given default (LGD) and exposure at default (EAD). These risk parameters are used in different risk management applications that include the economic capital calculation, RAROC and current expected credit loss calculation.

Credit risk is also managed in terms of portfolio concentration. IDB Invest protects itself against portfolio concentration through diversification applying country, industry sector, economic groups and single borrower limits. There are also limits for equity investments.

Nonperforming Portfolio

An indicator of IDB Invest's credit risk exposure in its development-related debt investments portfolio is visible through its nonperforming loans (NPLs), which refers to development-related debt investments where collectability is in doubt or payments of interest or principal are past due more than 90 days. IDB Invest's NPLs increased marginally from \$25.4 million as of December 31, 2021 to \$30.1 million as of December 31, 2022. The NPL ratio remained constant at 0.5% in 2022 compared to the prior year, demonstrating the continued health and growth of the portfolio despite global inflation, the rising interest rate environment, effects of the still unwinding COVID-19 pandemic and the evolving uncertainties surrounding the Russian war on Ukraine.

Figure 12. Nonperforming portfolio, outstanding amounts and ratio⁽¹⁾ (in US\$ thousand).

⁽¹⁾ Nonperforming ratio is defined as the unpaid principal balance of NPLs, divided by the unpaid principal balance of development-related debt investments, plus notional guarantees outstanding.

Market Risk

Market risk refers to the potential impact on the economic value of IDB Invest's net worth due to changes in market prices, such as interest rates, foreign exchange rates, credit spreads and equity prices. IDB Invest's Risk Appetite Policy provides guidelines to minimize mismatches in market risk exposures by risk, instrument, and portfolio type and defines a Value at Risk (VaR) limit as a percentage of total equity. IDB Invest has a dedicated Market Risk team that is responsible for establishing limits and managing market risk exposures through various quantitative techniques, including VaR, stress testing and sensitivity analysis. Management provides additional oversight through the Asset and Liability Management Committee.

Within the liquid asset portfolio, investment is restricted to high quality USD securities and cash instruments. This portfolio is subject to a VaR limit, and market risk is monitored through interest rate and credit spread sensitivity analysis, as well as stress testing.

Within the development-related debt investment, borrowings and hedging instrument portfolios, market risk is managed with interest rate sensitivity limits for currencies for which there is a local currency treasury portfolio, which includes United States dollars, Mexico pesos and Colombian pesos. Instruments in other currencies are hedged through cross-currency swaps or matched back-to-back through a dedicated matched funding strategy. Fixed rate development-related debt investments are hedged through interest rate swaps. Counterparty risk arising from hedging activities for these portfolios is also measured and managed via exposure limits.

The development-related equity investment portfolio and residual cash balances in local markets remain unhedged, subject to reasonable limits.

Credit spread risk is managed through VaR and stress testing.

LIBOR Transition

In July 2017, the Financial Conduct Authority, the regulator of LIBOR, announced that it would no longer compel panel banks to submit rates required to calculate LIBOR after December 31, 2021. In March 2021, the discontinuation for the most liquid U.S. dollar LIBOR tenors was postponed to June 30, 2023. Therefore, market participants, including IDB Invest and its borrowers, would need to move to alternative reference rates by those dates.

IDB Invest Management established a LIBOR Transition Program to ensure timely and orderly transition to Secured Overnight Financing Rate (SOFR). The transition efforts are well underway and major milestones achieved during 2021 include adherence to the International Swaps and Derivatives Association (ISDA) protocol and achievement of operational readiness for SOFR loan origination. Starting January 2022, IDB Invest offers Term SOFR, Daily Compounded SOFR and Daily Simple SOFR loan products, and no longer issues new LIBOR based financial instruments. IDB Invest issued its first SOFR borrowing in March 2022. During 2022, IDB Invest transitioned the majority of its uncommitted loan products to SOFR and started its efforts of converting the committed loan portfolio from LIBOR to SOFR, based on early client interest. IDB Invest is currently expanding its client outreach and expects to transition the remaining LIBOR assets and liabilities during 2023, aligned with market deadlines.

Integrity Risk

Integrity risk is defined as the possibility that a person or entity engages in serious ethical or financial misconduct in connection with an IDB Invest development-related investment. When such misconduct occurs, it adversely affects the ability of IDB Invest to further its development purpose and safeguard its financial sustainability. IDB Invest expects its clients and its employees to abide by the highest standards of ethics, integrity, transparency, and accountability in relation to all IDB Invest development-related investments.

To manage integrity risk, IDB Invest conducts a risk based due diligence for all its lending and equity development-related investments regarding its counterparties and any other entity closely associated with the development investment, which is updated annually. The key elements of that integrity due diligence include: (i) general integrity review of all IDB Invest clients and relevant entities; (ii) an assessment of the Anti-Money Laundering/Combating the Financing of Terrorism (AML/CFT) systems of all financial institution clients; and (iii) an assessment of tax-related risks presented by cross-border corporate structures used by proposed IDB Invest clients.

The integrity due diligence process allows IDB Invest to identify risk indicators, including but not limited to: politically exposed persons, persons subject to economic or administrative sanctions, relevant litigation or enforcement activity involving the client, or use of cross-border structures that may be used for tax evasion. When the counterparty is a financial institution, IDB Invest also assesses the effectiveness of its AML/CFT controls.

The integrity due diligence process is overseen by the Office of Institutional Integrity, an oversight office of the IDB that provides services to IDB Invest.

Operational Risk

Operational risk is the risk resulting from inadequate or failed internal processes, people or systems or from external events that may result in financial losses and damage to IDB Invest's reputation.

IDB Invest's operational risk management activities are executed in alignment with the three lines of defense model, in which personnel have ownership, responsibility and accountability for identifying, evaluating, controlling and mitigating operational risks, as well as establishing and maintaining effective internal controls in their respective processes. In addition, risk and control matters are regularly assessed, monitored and reported to the Operational Risk Management Committee.

IDB Invest's operations rely on the secure processing, storage and transmission of confidential and other information in computer systems and networks. As is the case for financial institutions, generally, cybersecurity risk continues to be significant for IDB Invest due to the evolving sophistication and complexity of the cyber threat landscape. In managing emerging cyber threats, such as malware and phishing attacks, IDB Invest manages these risks through investments in security, remote access, end-point protection and cloud technologies as well as strengthened operational risk management controls. Management continues to invest in preventive and detective technologies as well as in employee awareness to ensure high standards for cybersecurity.

Environmental, Social and Corporate Governance

Prior to final approval, IDB Invest assesses the potential environmental, social and corporate governance risks and impacts of all development-related investments in which it considers investing and assesses such investments for compliance with host country laws and regulations and its Sustainability Policy and exclusion list. This assessment is based on the mitigation hierarchy approach whereby clients should avoid, minimize or manage environmental, social and health and safety risks and impacts. IDB Invest requires its clients to comply with its Sustainability Policy, which incorporates IFC standards and guidelines: the Performance Standards on Environmental and Social Sustainability of the International Finance Corporation (IFC) (the Performance Standards); and the World Bank/IFC Environmental Health and Safety (EHS) Guidelines (including both General EHS guidelines and Industry Sector EHS Guidelines) (the EHS Guidelines). Any subsequent revisions to the above-mentioned Performance Standards and EHS Guidelines will apply to the Sustainability Policy unless otherwise determined by IDB Invest's Board of Executive Directors.

IDB Invest finances development-related investments that are expected to meet the Sustainability Policy's environmental and social requirements within a reasonable time frame. IDB Invest's development-related investment agreements include obligations requiring clients to comply with applicable requirements of the Performance Standards and conditions included in action plans, as well as relevant provisions for environmental and social reporting, and supervision visits by IDB Invest staff or representatives, as appropriate.

A separate environmental and social risk function provides a second line of defense to strengthen social and environmental learning and compliance, with special attention for complex projects. This function leads institutional responses to grievance cases and accountability issues, while contributing to IDB Invest's non-financial risk assessment and credit considerations.

IDB Invest works with clients to assess their corporate governance practices and provide clients advice on how to improve them. This may include issues related to board effectiveness, representation of women and minority groups on company boards and in leadership positions, the control and accountability environment of a company or engagement with different business partners.

IDB Invest applies the Corporate Governance Development Framework (CGDF¹²), a common methodology among Development Finance Institutions for assessing corporate governance of investee companies. Under the CGDF, IDB Invest carries out the following activities: (i) integrates corporate governance in its investment operations, (ii) establishes an internal corporate governance function, (iii) provides training and capacity building, (iv) collaborates with other signatories, and (v) reports annually on implementation. Through its technical assistance activities, IDB Invest provides private sector companies in the Region with direct corporate governance support, capacity-building programs and other forms of assistance.

¹² For more information about the Corporate Governance Development Framework refer to: https://www.ifc.org/wps/wcm/connect/topics_ext_content/ifc_external_corporate_site/ifc+cg/cg+development+framework

IDB Invest monitors projects for compliance with its ESG standards throughout implementation and the repayment period. This approach aimed at identifying and managing ESG risks throughout the development-related investment lifecycle provides a comprehensive framework to promote effective sustainability gains to its portfolio.

IDB Invest helps clients incorporate ESG data-driven decision-making in their business strategies. IDB Invest further provides guidance and risk management tools to manage ESG risks and opportunities.

Finally, IDB Invest values engagement, transparency and accountability. The Management Grievance Mechanism (MGM) is a new channel for individuals or groups to submit complaints related to environmental, social or corporate governance issues of projects financed or being considered for financing by IDB Invest. The MGM aims to propose timely solutions that can be implemented with clients to address the concerns of stakeholders. At the same time, it represents an opportunity to flag unresolved ESG issues in projects, strengthen client sustainability and provide a channel for engagement with external communities. In addition, the MGM allows IDB Invest to extract institutional lessons to strengthen ESG risk management.

Data Privacy Risk

With the objective to uphold IDB Group's reputation as a trusted partner and meet expectations of its stakeholders, on February 24, 2021, the Boards of Executive Directors of IDB Invest and the IDB approved the IDB Group Personal Data Privacy Policy. This policy defines a set of principles aligned with international standards and best practices that will govern the processing of personal data by both IDB and IDB Invest, and is intended to develop consistent practices and procedures across the IDB Group. These guiding principles provide a framework for each IDB Group institution to establish their respective privacy programs, which will comprise administrative, technical and physical safeguards for personal data processing tailored to their unique mandate and business needs. The policy will become effective for IDB Invest and the IDB upon their respective adoption of implementing guidelines, procedures, technology solutions and other measures, in a period not to exceed three years after its approval. The achievement of this important milestone is reflective of the IDB Group's firm commitment to protect personal data in line with global data privacy standards and is aligned with the approach taken by other multilateral development banks.

Access to Information Policy

IDB Invest is accountable for the use and management of its resources. As such, IDB Invest produces information regarding its activities and operations to enable its member countries, clients, third parties and the public to learn about and stay up to date with IDB Invest's activities.

IDB Invest is responsible for disclosing information in accordance with its Access to Information Policy. In addition, in accordance with the Policy, IDB Invest's business approach requires that, as part of the process of managing the risks and impacts of the investment projects, IDB Invest's clients engage with communities affected by their projects, including through the disclosure of information, in a manner that aligns with IDB Invest's Environmental and Social Sustainability Policy.

Other Developments

Pension Plans and Postretirement Benefits Plan

The volatility in the equity and credit markets, as well as changes in interest and inflation rates, affect the funded status of the Pension Plans and Postretirement Benefits Plan (PRBP). IDB Invest's Pension Plans were 87.9% funded and the PRBP was 127.4% funded as of December 31, 2022. The changes to the funded status of the Pension Plans and PRBP were positively impacted by an increase in the discount rates of 222 bps and 218 bps, respectively, partially offset by the decrease in asset values and increase in long-term inflation rate estimates. Overall, the Pension Plans and PRBP benefited from an improvement to recent historically low discount rates driven by Central Banks tightening of monetary policies in response to global inflationary pressures. IDB Invest, in coordination with the IDB, actively monitors Management strategies to address the short-term and long-term performance of the Pension Plans and PRBP. Refer to Note 14 of the Financial Statements for additional information related to the Pension and Postretirement Benefit Plans.

External Auditors

The external auditors of IDB Invest are appointed by the Board of Governors. In 2021, the Board of Governors appointed Ernst & Young, LLP as the external auditors of IDB Invest to succeed KPMG for the five-year period 2022-2026, following a competitive bidding process pursuant to IDB Invest's policy limiting the external auditor's contract to a maximum term of ten consecutive years.

Contracted fees for audit services provided to IDB Invest by EY in connection with the 2022 financial statement audit amounted to \$499.9 thousand. EY also provided audit services to donor funds administered by IDB Invest, for which contracted fees related to the 2022 audits amounted to \$70.0 thousand.

Internal Controls over Financial Reporting

Management of IDB Invest is responsible for establishing and maintaining adequate internal controls over financial reporting (ICFR). While IDB Invest's ICFR framework is not externally evaluated with an independent auditor's opinion issued as part of an integrated audit, IDB Invest continues to internally assess, monitor and report the risks of internal controls over financial reporting. Nevertheless, because of its inherent limitations, internal control over financial reporting may not prevent or detect all misstatements, deficiencies or lapses in internal controls that may occur from time to time. Based on Management's annual assessment, there was no change in IDB Invest's internal control over financial reporting during the year ended December 31, 2022, that has materially affected, or is reasonably likely to materially affect, IDB Invest's internal control over financial reporting.

Critical Accounting Policies and Estimates

IDB Invest's financial statements are prepared in accordance with generally accepted accounting principles of the United States of America (GAAP). The preparation of such financial statements requires Management to make estimates and assumptions that affect the reported results. Refer to Note 2 – Summary of Significant Accounting Policies in the Financial Statements for a summary of the significant accounting policies, including a discussion of accounting estimates that involve a significant degree of judgment and complexity and have had or are reasonably likely to have a material impact on IDB Invest's financial condition or results of operations. These critical accounting estimates include the: (i) evaluation and measurement of the allowance for credit losses, (ii) measurement of the fair value of investment securities, development-related investments, derivative instruments and borrowings, and (iii) measurement of projected benefit obligations and fair value of plan assets of the Pension Plans and Postretirement Benefits Plan and the associated net periodic benefit costs of each plan.

Administration and Corporate Governance

IDB Invest has a Board of Governors, a Board of Executive Directors, a Chairperson of the Board of Executive Directors, and a Chief Executive Officer (CEO) (also referred to as General Manager). The CEO, in consultation with the Board of Executive Directors and the Chairperson of the Board of Executive Directors, is responsible for the organization, appointment and dismissal of the officers and staff.

Board of Governors

All the powers of IDB Invest are vested in its Board of Governors, which consists of one Governor and one Alternate Governor appointed by each member country. The Board of Governors has delegated to the Board of Executive Directors all its powers except certain powers reserved to the Governors under the Establishing Agreement.

The Governor or Alternate Governor from each member country exercises the voting power to which its member country is entitled, each member country having one vote for each fully paid share held by it. A list of the member countries, showing the voting power and the number of shares subscribed by each member country as of December 31, 2022, is set forth in Note 9 – Capital to the Financial Statements. The quorum for any meeting of the Board of Governors is a majority of the Governors representing at least two-thirds of the votes of the member countries. Matters before the Board of Governors are decided by a majority of the votes of the members except as specifically detailed in the Establishing Agreement or other regulations. Governors and Alternate Governors serve without compensation from IDB Invest.

The Board of Governors holds regular meetings, at least annually.

Board of Executive Directors

Function

The Board of Executive Directors is responsible for the conduct of the operations of IDB Invest. To this end, the Board of Executive Directors exercises all the powers granted to it under the Establishing Agreement and those delegated to it by the Board of Governors. The Board of Executive Directors establishes the basic organizational structure of IDB Invest, including the number and general responsibilities of its main administrative and professional positions. The Board of Executive Directors is also responsible for adopting IDB Invest's annual budget.

Membership

The Board of Executive Directors is composed as follows: (i) one Executive Director appointed by the member country having the largest number of shares in IDB Invest (as of the date of this Information Statement, this is the United States); (ii) nine Executive Directors elected by the Governors for the Regional Developing Member Countries; and (iii) three Executive Directors elected by the Governors for the remaining member countries. Executive Directors are persons of recognized competence and wide experience in economic and financial matters. Each Executive Director appoints an Alternate Executive Director who has full power to act for the Executive Director when he or she is not present. Executive Directors generally serve for three years. The president of the IDB is the ex-officio Chairperson of the Board of Executive Directors of IDB Invest and presides over meetings of the Board of Executive Directors but does not have the right to vote except in the case of a tie. The Chairperson of the Board of Executive Directors may participate in, but may not vote at, meetings of the Board of Governors. Executive Directors are neither officers nor staff of IDB Invest.

The table below shows a list of Executive Directors and Alternate Executive Directors as of the date of this Information Statement.

Table 7. IDB Invest's list of Executive Directors and Alternate Executive Directors.

Country	Executive Director or Alternate Executive Director
Argentina and Haiti	Guillermo Alberto Francos (Argentina) Marcelo Daniel Brag (Argentina)
Austria, Belgium, Germany, Italy, the Netherlands, and the People's Republic of China	Ralf Ernst Schroeder (Germany) Huafeng Liao (China)
Bahamas, Barbados, Guyana, Jamaica, and Trinidad and Tobago	Robert Lennard Le Hunte (Trinidad and Tobago) Navita Anganu (Guyana)
Belize, Costa Rica, El Salvador, Guatemala, Honduras, and Nicaragua	Thelmo Vargas Madrigal (Costa Rica) Diego Aycinena Abascal (Guatemala)
Bolivarian Republic of Venezuela and Panama	Gustavo Tarre Briceno (Venezuela) Carlos Alberto Vallarino Rangel (Panama)
Brazil and Suriname	Martha Seillier (Brazil) Anita Fiori de Abreu (Brazil)
Canada, Denmark, Finland, France, Norway, Sweden and Switzerland	Caroline Leclerc (Canada) Renaud Lassus (France)
Chile and Colombia	Carlos Eduardo Alvarez Voullieme (Chile) Roy Alejandro Barreras Cortes (Colombia)
Croatia, Israel, Japan, Portugal, Republic of Korea, Slovenia and Spain	Alberto Nadal (Spain) Deok Young Jeong (Korea)
Dominican Republic and Mexico	Mario Alejandro Gaytan Gonzalez (Mexico) Ernesto Alejandro Selman Mejia (Dominican Republic)
Ecuador and Peru	Michel Rodolfo Canta Terreros (Peru) Jorge Emilio Gallardo Zavala (Ecuador)
Paraguay, Plurinational State of Bolivia, and Uruguay	Germán Hugo Rojas Irigoyen (Paraguay) Santiago Cat Ruprecht (Uruguay)
United States of America	Vacant Maria Fabiana Jorge (United States of America)

Operation

The Board of Executive Directors functions in continuous session at the principal offices of IDB Invest in Washington D.C., or exceptionally at such other locations as shall be designated by the Board of Executive Directors, and meets as often as business requires.

Agendas, minutes and resolutions of the meetings of the Board of Executive Directors are made available to the public at the end of the corresponding deliberative process.

Each Executive Director is entitled to cast the number of votes which the member or member countries of IDB Invest whose votes counted towards his or her nomination or election are entitled to cast. All the votes that an Executive Director is entitled to cast are cast as a unit. The quorum for any meeting of the Board of Executive Directors is the majority of the Executive Directors representing not less than two-thirds of the votes of the member countries.

Unless an Executive Director requires formal voting on any matter in the Board, the Chairperson of the Board of Executive Directors may declare any matter approved based on verbal affirmations. In the event that a formal voting is called, unless otherwise provided, all matters are decided by a majority of the votes of the member countries.

Key Governing Committees

The Board of Executive Directors has the following committees: the Executive Committee, the Audit and Risk Oversight Committee, the Committee of the Board of Executive Directors and the Special Ad Hoc Committee for Problem Projects. In addition, there are two joint committees of the IDB Invest Board of Executive Directors and the IDB Board of Executive Directors: the Steering Committee and the Conduct Committee. The role of each committee is determined pursuant to its terms of reference.

Executive Committee of the Board of Executive Directors

The Executive Committee of the Board of Executive Directors is composed of: (i) the Director or Alternate appointed by the member country having the largest number of shares in IDB Invest (as of the date of this Information Statement, this is the United States); (ii) two Directors representing the Regional Developing Member Countries; and (iii) one Director representing the other member countries. Rotating agreements among the Directors result in a change in the composition every quarter.

The Executive Committee considers all loans and investments in Regional Developing Member Countries. To be approved, a loan, investment or financing program requires the vote of a majority of the Executive Committee. A quorum for any meeting of the Executive Committee is three members. A report with respect to each operation approved by the Executive Committee is then submitted to the Board of Executive Directors. If requested by any Executive Director, such approved operation will be presented to the Board of Executive Directors for a vote. An operation approved by the Executive Committee shall be deemed approved by the Board of Executive Directors in the absence of such request within the period specified by the Board of Executive Directors.

Audit and Risk Oversight Committee of the Board of Executive Directors

The purpose of the Audit and Risk Oversight Committee is to assist the Board of Executive Directors in its oversight of (i) IDB Invest's accounting and financial reporting processes, and internal controls over financial reporting, (ii) the management of financial and non-financial risks in relation to the risk policies established by the Board of Executive Directors, (iii) the qualifications, independence, reports and written communications of IDB Invest's External Auditor, and (iv) the performance, work program and reports of IDB Invest's internal audit function, which is carried out by AUG.

Committee of the Board of Executive Directors

The purpose of this Committee of the Board of Executive Directors is to consider and review matters related to budget, organization, policies, and evaluation, as well as such other matters as the Board may decide to entrust to it.

Special Ad Hoc Committee for Problem Projects of the Board of Executive Directors

The purpose of the Special Ad Hoc Committee for Problem Projects is to support the timely, accurate and complete communication regarding impaired projects to and from the members of the Board on matters of which the Board should be informed, requiring the approval of the Board, or as otherwise deemed necessary by the Board.

Steering Committee

The purpose of the Steering Committee is to serve as the advisory body to the Boards of Executive Directors of the IDB and IDB Invest. Its functions include to review and confer with management on all matters related to the preparation and follow-up on the Boards' work programs and other relevant matters.

Conduct Committee

The Conduct Committee addresses all matters arising from the application of the Code of Conduct and the Operating Guidelines for the Conduct Committee, and as may be otherwise determined by the Boards of Executive Directors of IDB Invest and the IDB.

Key Executives and Personnel

The Board of Executive Directors appoints the General Manager of IDB Invest by a four-fifths majority of the total voting power of the member countries, on the recommendation of the Chairperson of the Board of Executive Directors and for such term as she or he shall indicate.

The General Manager is responsible for the ordinary business of IDB Invest under the direction of the Board of Executive Directors and the general supervision of the Chairperson of the Board of Executive Directors. The General Manager is responsible for the organization, appointment, and dismissal of IDB Invest officers and staff in consultation with the Board of Executive Directors and the Chairperson of the Board of Executive Directors. The General Manager may participate in meetings of the Board of Executive Directors but does not have the right to vote at these meetings. The departments that provide support for project and program activities include Investment Operations; Strategy and Development; Legal; Risk Management; and Finance and Administration. As of December 31, 2022, IDB Invest has 391 staff and 56 consultants on-board.

Table 8. List of key IDB Invest Executives as of the date of this Information Statement.

IDB Invest's Executives

Name	Position
James P. Scriven	Chief Executive Officer
H. Rosemary Jeronimides	General Counsel
Gema Sacristán Postigo	Chief Investment Officer
Orlando Ferreira Caballero	Chief Finance and Administration Officer
Rachel Robboy	Chief Risk Officer
Alexandre Meira da Rosa	Chief Strategy Officer

Management & Organizational Changes

On September 26, 2022, the Board of Governors of the IDB resolved that Mr. Mauricio Claver-Carone would cease to hold the office of President of the Bank, effective on that day. In accordance with the IDB's Charter, the Executive Vice President, Reina Irene Mejía Chacón, served as President a.i. until a new President was elected. On November 20, 2022, Mr. Ilan Goldfajn was elected president of the IDB. Mr. Ilan Goldfajn took office on December 19, 2022, for a five-year term. The President of the Bank is ex officio Chairperson of the IDB Invest Board of Executive Directors.

Ethics Matters

IDB Invest fosters an ethical work environment for its staff and consultants, and is committed to safeguard the activities financed by IDB Invest from fraud and corruption.

Code of Ethics

IDB Invest requires employees to maintain the highest standards of professional and ethical conduct. To assist in preserving such institutional standards, IDB Invest has in place a Code of Ethics and Professional Conduct¹³ that applies to all employees. This Code contains guidelines concerning conflicts of interest and use of IDB Invest information, among other matters.

¹³ IDB Invest Code of Ethics and Professional Conduct is available at: <https://www.idbinvest.org/en/how-we-work/institutional-information>

Oversight Offices

The following offices provide oversight services to IDB Invest.

Office of Institutional Integrity

The Office of Institutional Integrity (OII),¹⁴ an oversight office of the IDB established to promote institutional integrity, provides services to IDB Invest and reports its ongoing activities and significant findings to its Board of Executive Directors and Management. The OII complies with its mandate through the detection and investigation of fraud, corruption and other prohibited practices, and the support of initiatives for their prevention. Allegations of corrupt or fraudulent activities involving IDB Invest-financed activities may be reported to the OII in person, by telephone, e-mail, facsimile, regular mail, or through the allegation forms available on the website. Such allegations may be made confidentially or anonymously.

Office of the Executive Auditor

The Office of the Executive Auditor provides assurance and consulting services guided by international professional standards, and reports functionally to the IDB and IDB Invest Boards of Executive Directors through the equivalent Audit and Risk Oversight Committee of each entity. The Office of the Executive Auditor provides assurance and advisory services designed to add value and continuously improve the IDB Group's operations, bringing a systematic, disciplined approach to assess and improve the effectiveness of governance, risk management, and control processes.

Office of Evaluation and Oversight

The Office of Evaluation and Oversight, which reports directly to the Board of Executive Directors, undertakes independent and systematic evaluations of IDB Invest's strategies, policies, programs, activities, delivery support functions and systems and disseminates the findings of such evaluations so that recommendations for improvement can be used in new operations. The Office of Evaluation and Oversight also provides oversight and support for the enhancement of the effectiveness of IDB Invest's evaluation system.

Independent Investigation and Consultation Mechanism

The Independent Consultation and Investigation Mechanism (the ICIM) is an investigation mechanism that is independent from the management structure at IDB Invest and reports directly to the Board of Executive Directors. The ICIM's objectives are as follows: (i) provide a mechanism and process independent of Management in order to investigate allegations by requesters of damages produced by IDB Invest's failure to comply with its relevant operational policies in IDB Invest financed operations; (ii) provide information to the Board of Executive Directors regarding such investigations; and (iii) be a last-resort mechanism for addressing the concerns of requesters, after reasonable attempts to bring such allegations to the attention of Management have been made.

The Agreement Establishing the Inter-American Investment Corporation

The Establishing Agreement¹⁵ sets forth IDB Invest's purpose and functions, capital structure and organization. It also outlines the operations in which IDB Invest may participate, prescribes limits and directives, establishes IDB Invest's status, legal capacity, immunities and privileges, and regulates membership and the termination of IDB Invest's operations.

The Establishing Agreement may be amended only by decision of IDB Invest's Board of Governors by a majority representing at least four-fifths of the votes of the members and two-thirds of the number of Governors. The unanimous agreement of the Board of Governors is required for the approval of any amendment modifying the right to withdraw from IDB Invest; the right to purchase shares in IDB Invest; or any changes to the limitation of liability of its member countries. Refer to Note 9 in the Financial Statements for additional information related to IDB Invest's member capital.

¹⁴ More information about the Office of Institutional Integrity is available at <https://www.iadb.org/en/about-us/departments/oii>

¹⁵ IDB Invest's Establishing Agreement is available within the Institutional Information section of the website in IDB Invest's four official languages, at <https://idbinvest.org/en/how-we-work/institutional-information>

Legal Status, Immunities and Privileges

The following is a summary of the principal provisions of the Establishing Agreement relating to the legal status, immunities and privileges of IDB Invest in the territories of its members.

IDB Invest possesses legal personality and has full capacity to contract, acquire and dispose of immovable and movable property, and to institute legal and administrative proceedings.

Actions may be brought against IDB Invest only in a court of competent jurisdiction in the territories of a member country in which IDB Invest has an office; has appointed an agent for the purpose of accepting service or notice of process; or has issued or guaranteed securities. No action shall be brought against IDB Invest by member countries or persons acting for or deriving claims from member countries. However, such countries or persons may have recourse to such special procedures to settle controversies between IDB Invest and its member countries as prescribed in the Establishing Agreement.

The property and assets of IDB Invest are immune from all forms of seizure, attachment or execution before the delivery of final judgment against IDB Invest. Immunity for IDB Invest's property and assets also applies against searches, requisitions, confiscation, expropriation and any other form of taking or foreclosure by executive or legislative action. The archives of IDB Invest are also inviolable.

IDB Invest, its property, other assets, income and the operations and transactions it carries out are immune from all taxation and from all customs duties in its member countries.

IDB Invest is also immune from any obligation relating to the payment, withholding or collection of any tax or duty. No tax is levied on or in respect of salaries and emoluments paid by IDB Invest to officials or employees of IDB Invest who are not local citizens or other local nationals. No tax of any kind is levied on any obligation or security issued by IDB Invest, including any dividend or interest thereon, by whosoever held:

- which discriminates against such obligation or security solely because it is issued by IDB Invest; or
- if the sole jurisdictional basis for such taxation is the place or currency in which it is issued, made payable or paid, or the location of any office or place of business maintained by IDB Invest.

The IDB Group

Inter-American Development Bank (IDB)

The IDB is an international organization, with a separate governance structure, including its own Board of Governors and Board of Executive Directors, capital structure and balance sheet. The IDB's objective is to achieve economic and social development in a sustainable, climate-friendly way.

Multilateral Investment Fund (MIF)

The Multilateral Investment Fund (now commercially known as IDB Lab), a trust fund administered by IDB, is the innovation laboratory of the IDB Group. IDB Lab has a separate governance structure from IDB, including its own Donors Committee, capital structure and balance sheet. The purpose of IDB Lab is to drive innovation for inclusion in the Region, mobilizing financing, knowledge and connections to co-create solutions capable of transforming the lives of vulnerable populations due to economic, social or environmental conditions. IDB Lab offers a range of financing products, such as grants for technical assistance, loans and equity investments, as well as a combination of these tools to better support clients.

**Building a better
working world**

Report of Independent Auditors

To the Board of Governors of the Inter-American Investment Corporation:

Opinion

We have audited the financial statements of Inter-American Investment Corporation (the Corporation), which comprise the balance sheet as of December 31, 2022, and the related income statement and statement of comprehensive income/(loss), change in capital and cash flows for the year then ended, and the related notes (collectively referred to as the “financial statements”).

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Corporation at December 31, 2022, and the results of its operations and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor’s Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Corporation and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Corporation’s ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Auditor’s Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free of material misstatement, whether due to fraud or error, and to issue an auditor’s report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

**Building a better
working world**

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Corporation's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Corporation's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Report of Other Auditors on 2021 Financial Statements

The financial statements of the Corporation for the year ended December 31, 2021 were audited by another auditor who expressed an unmodified opinion on those financial statements on March 1, 2022.

Other Information

Management is responsible for the other information. The other information comprises the information included in the Information Statement of the Inter-American Investment Corporation as of December 31, 2022, but does not include the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Inter-American Investment Corporation

Notes to Financial Statements

1. Purpose

The Inter-American Investment Corporation (IDB Invest) is an international organization established in 1986 and a separate legal entity within the Inter-American Development Bank Group (the IDB Group), which also includes the Inter-American Development Bank (IDB) and the Multilateral Investment Fund (commercially known as IDB Lab). IDB Invest began operations in 1989, and is owned by its member countries, which include 26 regional developing member countries, located in Latin America and the Caribbean (the Regional Developing Member Countries), and 21 countries outside of Latin America and the Caribbean. The purpose of IDB Invest is to promote the economic development of its Regional Developing Member Countries by encouraging the establishment, expansion, and modernization of private enterprises in such a way as to supplement the activities of the IDB. IDB Invest provides financing through its development related investments, which include loans, guarantees, investments in debt securities, and equity investments where sufficient capital is not otherwise available on adequate terms in the market. IDB Invest also arranges financing from other investors through loan participations, co-financing arrangements, and unfunded participations. In addition, IDB Invest provides financial and technical advisory services to clients.

2. Summary of Significant Accounting Policies

Basis of presentation – These financial statements are prepared in accordance with generally accepted accounting principles in the United States of America (US GAAP). References to US GAAP issued by the Financial Accounting Standards Board (FASB) in these notes are to the FASB Accounting Standards Codification (ASC or Codification) or Accounting Standards Update (ASU).

All amounts presented in the accompanying financial statements and notes are expressed in United States dollars (USD, US\$ or \$), which is IDB Invest's functional and reporting currency.

Use of estimates – The preparation of the financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Actual results could differ from those estimates. A significant degree of judgment has been used in the evaluation and measurement of: the allowance for credit losses; the fair value of investment securities, development related investments (loans, debt securities and equity investments), derivative instruments and borrowings; and the projected benefit obligations and fair value of plan assets of the Pension Plans and Postretirement Benefits Plan and associated net periodic benefit cost of each plan.

Cash – Cash¹ includes those amounts held on deposit with banks and cash restricted for development related investment activities. IDB Invest may hold cash deposits in excess of Federal Deposit Insurance Corporation (FDIC) insured limits.

Investment securities – Investment securities include fixed and floating rate bonds, notes, bills issued by corporations, governments, supranationals or agencies, and certificates of deposit, commercial paper and mutual funds, including money market funds. IDB Invest's strategy for its Cash¹ and Investment securities (collectively, Liquid Assets) is to provide sufficient liquidity and resources to finance development related investments.

Investment securities are classified as trading and are recorded at fair value with gains and losses reported in income from Gain/(loss) from liquid assets, net. Purchases and sales of securities are recorded on a trade date basis. The first-in, first-out method is used to determine the cost basis of securities sold.

¹ References to captions in the condensed interim financial statements are identified by the name of the caption beginning with a capital letter every time they appear in the notes to the condensed interim financial statements.

Inter-American Investment Corporation

Notes to Financial Statements

Development related loans and debt securities (Development related debt investments) – Development related loans and debt securities are recognized upon disbursement and measured at amortized cost or at fair value through income, depending on the nature and terms of each instrument. An allowance for credit losses is recognized against development related debt investments measured at amortized cost. IDB Invest utilizes the net asset value (NAV) reported by the fund managers as a practical expedient for the fair value measurement for certain development related debt securities. Refer to Note 4 for additional information.

For credit monitoring and portfolio management purposes, development related loans are classified into three portfolio segments – corporates, financial institutions and project finance – and development related debt securities are classified as corporate securities.

Development related loans may be secured by cash, receivables, inventory, equipment, property, mortgages, third-party guarantees or other forms of collateral security or may be unsecured. IDB Invest enters into standalone insurance contracts, which are generally not transferable, to cover the credit risk of particular development related debt investments. IDB Invest recognizes the recovery assets associated with these third-party credit enhancements in Receivables and other assets in the balance sheets and any associated gains or losses from such assets as Interest and other income, net in the income statements.

Guarantees – IDB Invest issues guarantees covering, on a risk-sharing basis, third party obligations or securities issuances in Regional Developing Member Countries. IDB Invest's policy with respect to collateral security for these guarantees is generally the same as for its development related loans. Guarantees are regarded as issued when IDB Invest executes the guarantee agreement, outstanding when the underlying obligation of the third party is incurred and called when IDB Invest's obligation under the guarantee has been invoked. There are two obligations associated with guarantees: (1) a stand-ready obligation to perform; and (2) a contingent obligation to make future payments. The stand-ready obligation to perform is recognized at fair value at the issuance date, typically in an amount equal to the present value of any premiums received or receivable. For financial guarantees not accounted for as derivatives, the contingent liability is measured based on the current expected credit losses (CECL) on the guarantee. For guarantees accounted for as derivatives, the contingent liability is measured at fair value through income from the issuance date.

The stand-ready and contingent liabilities associated with the guarantees issued by IDB Invest are included in Payables and other liabilities in the balance sheets. Changes in contingent liabilities measured under the CECL methodology are recorded in (Provision)/release of provision for credit losses on development related investments in the income statements, while changes in contingent liabilities measured at fair value through income are recorded through Gain/(loss) from changes in fair value on non-trading portfolios and foreign exchange transactions, net in the income statements. Guarantee fee income is recognized as IDB Invest is released from its stand-ready obligation to perform and recorded in Interest and other income, net in the income statements. In the event a guarantee is called and IDB Invest is assigned the guaranteed obligation or the obligor otherwise has a direct contractual obligation to reimburse IDB Invest, the amount disbursed is recorded as a development related loan and an allowance is established against the loan based on the CECL methodology.

Undisbursed commitments – IDB Invest estimates expected credit losses over the contractual period in which it is exposed to credit risk through a contractual obligation to extend credit unless IDB Invest has the discretion to cancel the commitment at any time (unconditionally cancellable). The estimate considers the likelihood that funding will occur and the expected credit losses on estimated funded commitments over their estimated lives. A contingent liability for off-balance sheet credit losses is recorded in Payables and other liabilities in the balance sheets. The expense related to the contingent liability is recorded in (Provision)/release of provision for credit losses on development related investments in the income statements.

Allowance for credit losses – The allowance for credit losses represents management's estimates of current expected credit losses over the remaining expected lives of development related debt investments measured at amortized cost. The allowance for credit losses and the contingent liability for off-balance sheet credit exposures consider historical credit loss information as adjusted for current conditions and reasonable and supportable (R&S) forecasts of future economic conditions in the related portfolio. Changes in the allowance for

Inter-American Investment Corporation

Notes to Financial Statements

credit losses are recorded through the (Provision)/release of provision for credit losses in the income statements. IDB Invest does not record an allowance for credit losses on accrued interest receivable as it has a substantive nonaccrual policy.

Expected prepayments are factored into the estimate of expected credit losses on development related debt investments. Projected disbursements are factored into the estimate of expected credit losses on off-balance sheet credit exposures, considering historical experience and contractual amortization schedules. Prepayment assumptions are based on historical data from IDB Group's private sector portfolio given the common portfolio characteristics, which include the borrower's country, risk rating and industry sectors. The contractual term excludes expected extensions, renewals, and modifications unless either of the following applies: (i) management has a reasonable expectation at the reporting date that a troubled debt restructuring (TDR) will be executed with an individual borrower or (ii) the extension or renewal options are included in the original or modified contract at the reporting date and are not controlled by IDB Invest (not unconditionally cancellable by IDB Invest).

The collective assessment of current expected credit losses is based on exposure at default (EAD), term structures of probability of default (PD) that combine point-in-time (PIT) and through-the-cycle (TTC) PDs, and loss given default (LGD). In addition, the CECL estimate incorporates forward looking conditioning, which takes into consideration current market conditions, macroeconomic forecasts and their corresponding impact to the PIT PDs and LGDs. The macroeconomic forecasts in the CECL model include various scenarios, where each scenario represents a different state of the economy in the R&S period. The macroeconomic variables considered in these scenarios depend on the country of the exposure and generally include the gross domestic product (GDP), equity indices, and oil prices. Management currently considers the R&S period to be three years, after which the model reverts to historical averages for long-term values over a two year period using a linear method for PD mean-reversion. For each scenario, a lifetime loss rate for each instrument is calculated using the appropriate PD and LGD for each quarter of the instrument's remaining life. The results are then multiplied by the instrument's amortized cost. If multiple scenarios are considered, then results are weighted.

IDB Invest assigns a risk rating to each borrower and each development related debt investment based on a periodic risk assessment. The risk ratings assigned to the borrower and the investment correspond to specific PDs and LGDs and are determined based on a series of sector specific scorecards, which are aligned to IDB Invest's portfolio segments — corporates, financial institutions and project finance. IDB Invest maps internal ratings to long-term PDs published annually by an international rating agency. For LGDs, IDB Invest uses a decision-tree scorecard model developed by an international rating agency to capture exposure specific information, such as seniority, guarantees, collateral, industry, and jurisdiction at the facility level, which vary across different exposures of the same borrower.

The major credit risk factors considered for a project finance development related debt investment may be grouped into the following categories: political risk, commercial or project risk, technical and construction risk, and financial risk. Political risks can be defined as the risks to a project's financing emanating from governmental sources, either from a legal or regulatory perspective. Commercial or project risks are related to the construction or completion risks, economic or financial viability of a project and operational risks. Financial risks consider the project's exposures to cash flow generation, interest rate and foreign currency volatility, inflation risk, liquidity risk, and funding risk.

The major credit risk factors considered for a development related debt investment to a financial institution are country-related risk including regulatory, competition, government support and macro-economic risks, which act as an anchor for the risk assessment as a whole. Additionally, the rating scorecard assesses the following institution-specific factors: capital adequacy, asset quality, operating policies and procedures and risk management framework; quality of management and decision making; earnings and market position, liquidity and sensitivity to market risk; quality of regulations and regulatory agencies; and potential government or shareholder support.

Inter-American Investment Corporation

Notes to Financial Statements

The major credit risk factors considered for corporate development related debt investments are country and industry risks, business and market risks, an assessment of the borrower's management, and financial risks, including a qualitative assessment of financial risks and a quantitative assessment of financial ratios. After consideration of these borrower specific characteristics, extraordinary support from shareholders or from the government may be considered if applicable.

To augment the quantitative process described above, qualitative adjustments arising from information lags implicit in the quantitative loss estimation models, known model or data limitations, significant changes in portfolio composition or lending operations and uncertainty associated with economic and business conditions are applied as necessary based on management's judgment.

The impacts of the COVID-19 pandemic and the Russian war on Ukraine have had a direct effect on economies within IDB Invest's Regional Developing Member Countries. These developments affect risk parameters of the portfolio used in the CECL methodology, such as internal risk ratings for specific industries and countries. These parameters also consider developments in the macroeconomic forecasts during the R&S period and a mean reversion period to historical losses.

IDB Invest individually assesses the current expected credit losses on development related debt investments that have been or are reasonably expected to be restructured through a TDR. The determination of the allowance for credit losses for these investments reflects management's best judgment of the creditworthiness of the borrower and is established based upon the periodic review of individual development related debt investments. This estimate considers all available evidence including, as appropriate, the present value of expected future cash flows, the fair value of collateral less disposal costs, and other market data. Due to the nature of the development related debt investments, secondary market values are usually not available. For these investments, IDB Invest also considers the effects of the modification in its determination of the allowance for credit losses.

A modification of a development related debt investment is considered a TDR when the borrower is experiencing financial difficulty and IDB Invest has granted a concession to the borrower that it otherwise would not grant in order to maximize recoveries. IDB Invest monitors its development related debt investments for signs that the borrower may be facing financial difficulty. Information and events considered in determining whether a TDR is reasonably expected include the borrower's financial situation and competitive position in the marketplace, the risk associated with the underlying collateral, the willingness and capacity of the sponsor who organized the project to support the investment, the borrower's management team, and geopolitical and macroeconomic factors.

In light of the COVID-19 pandemic, IDB Invest has implemented loan modifications for loans that were otherwise performing in response to requests from borrowers for short-term relief. Modifications that meet the conditions set forth in the Interagency Statement² are not accounted for as TDRs. Additional information is included in Note 4.

Development related debt investments are partially or fully written off when IDB Invest has exhausted all possible means of recovery through a legal agreement, final bankruptcy settlement or when IDB Invest has determined with a reasonable degree of certainty that the relevant amount will not be collected. IDB Invest reduces the investment and related allowance for credit losses. Recoveries, if any, of previously written off amounts are recorded through the allowance.

Revenue recognition on development related debt investments – Interest income on development related debt investments is recorded on an accrual basis to the extent that such amounts are expected to be collected and is included in Interest and other income, net in the income statements. Accrued interest income receivable

² The Interagency Statement on Loan Modifications and Reporting for Financial Institutions Working with Customers Affected by the Coronavirus was issued jointly by the Board of Governors of the Federal Reserve System, the Federal Deposit Insurance Corporation, the National Credit Union Administration, the Office of the Comptroller of the Currency, and the Consumer Financial Protection Bureau.

Inter-American Investment Corporation

Notes to Financial Statements

is presented separately from development related debt investments and is included in Receivables and other assets in the balance sheets.

Development related debt investments are generally placed in nonaccrual status when collectability is in doubt or payments of interest or principal are past due more than 90 days. IDB Invest does not accrue income and ceases amortization of any premiums or discounts on development related debt investments in nonaccrual status. Any uncollected interest accrued on a development related debt investment placed in nonaccrual status is reversed out of income and is thereafter recognized as Interest and other income, net in the income statements when the payment is received. A development related debt investment is returned to accrual status once management has concluded that the borrower has demonstrated its ability to make periodic interest and principal payments.

Fees and costs for development related debt investment measured at amortized cost are deferred and amortized over the life of the asset on a straight-line basis. Amortization of the net deferred fees and costs is included in Interest and other income, net, in the income statements thereby approximating how fees and costs would be reflected under the effective interest method. The net deferred amounts are included in Payables and other liabilities in the balance sheets. Fees and costs for development related debt investment measured at fair value are recognized as incurred and included in Interest and other income, net, in the income statements.

Equity investments – Equity investments include certain ownership interests in limited partnerships and similar fund structures (LPs) and direct equity investments primarily in small and medium-sized enterprises and financial institutions.

IDB Invest accounts for its equity investments at fair value through income. For investments in entities over which IDB Invest has significant influence, IDB Invest elects the fair value option in lieu of applying the equity method of accounting.

IDB Invest utilizes the NAV reported by the fund managers as a practical expedient for the fair value measurement of interests in LPs. The NAVs that have been reported by the fund manager are derived from the fair values of the underlying investments.

Revenue recognition on equity investments – Dividends and profit participations received from equity investments are recorded as income and reported in Realized gain/(loss) from sales, dividends and other income, net in the income statements.

Unrealized gains and losses related to fair value adjustments are recorded in Unrealized gain/(loss) from changes in fair value, net in the income statements. Disbursements and distributions that represent return of capital are recorded as increases and decreases, respectively, in the outstanding balance of these equity investments and recorded in Equity investments in the balance sheets.

Consolidation, non-controlling interests, variable interest entities – IDB Invest evaluates its variable interests in legal entities upon commitment, at the time of modification, if applicable, and on an annual basis to determine whether it must consolidate any entity. Pursuant to ASC 810, *Consolidation*, IDB Invest is required to consolidate an entity if (a) the entity is a variable interest entity (VIE) for which IDB Invest is the primary beneficiary or (b) the entity is not a VIE and IDB Invest has a controlling financial interest.

A variable interest is a contractual, ownership or other pecuniary interest in a VIE whose value changes as the fair value of the VIE's net assets change. A legal entity is a VIE if (i) it lacks sufficient equity to permit the entity to finance its activities without additional subordinated financial support or (ii) the equity investors, as a group, lack (a) the power, through voting or similar rights, to direct the activities of the entity that most significantly impact the entity's economic performance; (b) substantive voting rights; (c) the obligation to absorb the expected losses of the entity; or (d) the right to receive the expected residual returns of the entity.

Inter-American Investment Corporation

Notes to Financial Statements

The primary beneficiary is the party with the power to direct the activities that most significantly impact the VIE's economic performance and the obligation to absorb losses of the entity or the right to receive benefits of the VIE that could potentially be significant to the entity. Additional information about VIEs is included in Note 4.

Revenue recognition for service fees – IDB Invest recognizes revenue in connection with services it provides to the IDB and trust funds administered by the IDB or IDB Invest. A series of service level agreements (SLAs) define the nature of the services and corresponding fees for services provided to the IDB. The most significant of these services relates to loan origination and servicing performed on the IDB's behalf. IDB Invest recognizes revenue for these services as it fulfills its performance obligation over the annual service period. Similarly, IDB Invest receives project administration and general administrative fees for services provided to several special purpose trust funds administered by IDB Invest or the IDB. Additional information about related party transactions is included in Note 13.

Risk management and use of derivative instruments – IDB Invest uses derivative instruments primarily for market risk management purposes in connection with its principal business activities. IDB Invest enters into cross currency and interest rate swaps to manage foreign exchange and interest rate risks arising from mismatches between its development related debt investments and its borrowing liabilities. None are designated as hedging instruments under ASC 815, *Derivatives*.

Derivatives are recognized in the balance sheets at their fair value and are classified as either Derivative assets or Derivative liabilities. Changes in fair value of derivatives are recorded in Gain/(loss) from changes in fair value on non-trading portfolios and foreign exchange transactions, net, in the income statements. Additional information about derivatives is included in Note 7.

Fixed and intangible assets – Fixed assets consist of office equipment and furniture and intangible assets consist of internally-developed software. Fixed and intangible assets are presented at cost less accumulated depreciation and amortization and are included in Receivables and other assets in the balance sheets. Depreciation and amortization are recognized using the straight-line method over the estimated useful lives of the assets that range from three to seven years.

Leases – IDB Invest leases office space from the IDB at its headquarters and in its Regional Developing Member Countries. IDB Invest recognizes these leases as operating leases under ASC 842, *Leases*.

IDB Invest recognizes a right-of-use asset and lease liability in the balance sheets for each operating lease based on the present value of the future minimum lease payments over the lease term. The right-of-use assets are nonmonetary assets included in Receivable and other assets in the balance sheets and are amortized based on each period's discounted cash flows. Lease liabilities are monetary liabilities included in Payables and other liabilities in the balance sheets and are reduced based on each period's discounted cash flows. IDB Invest remeasures its lease liabilities originating in currencies other than US\$ at the exchange rate in effect at each reporting date. Operating lease expense is recorded on a straight-line basis and included in Administrative expenses in the income statements. Additional information related to IDB Invest's leases is included in Notes 5, 8, and 12.

Borrowings – To ensure funds are available for its operational liquidity needs, IDB Invest offers its debt securities to investors in international capital markets. IDB Invest's borrowings are carried at amortized cost or fair value in the balance sheets.

For those borrowings carried at amortized cost, the amortization of premiums and accretion of discounts is calculated following a methodology that approximates the effective interest method and is included in Borrowings expense in the income statements. The unamortized balance of the borrowing issuance costs related to a recognized debt liability is included as a direct deduction from the carrying amount of the Borrowings in the balance sheets. Interest expense on all borrowings is recognized on an accrual basis and is included in Borrowings expense in the income statements.

Inter-American Investment Corporation

Notes to Financial Statements

For those borrowings carried at fair value, fair value changes are reported in accordance with ASC 825, *Financial Instruments*. Accordingly, the change in fair value due to market risk is reported in Gain/(loss) from changes in fair value on non-trading portfolios and foreign exchange transactions, net, in the income statements. The remaining change in fair value resulting from changes in IDB Invest's own credit risk is reported in Unrealized gains/(losses) arising during the period related to fair value adjustments on borrowings attributable to changes in instrument-specific credit risk, net, in the statements of other comprehensive income, and is measured by using IDB Invest's own credit spread against a reference rate. Additional information about borrowings is included in Note 6.

Non-trading portfolio – IDB Invest's non-trading portfolio includes development related debt investments, derivatives, and borrowings accounted for at fair value. The reported income volatility resulting from these non-trading financial instruments is not fully representative of the underlying economics of the transactions as IDB Invest does not intend to actively trade such instruments. Therefore, Gain/(loss) from changes in fair value on non-trading portfolios and foreign currency transactions, net, are reported separately from Income/(expense) from development related investments, liquid assets and other income, net of borrowing expenses in the income statements. Additional information about the non-trading portfolio is included in Note 11.

Remeasurements of foreign currency transactions – Monetary assets and liabilities denominated in currencies other than the US\$ are translated into US\$ at market exchange rates prevailing at the balance sheet dates. Income and expenses are translated at the market exchange rate in effect at the transaction date. Resulting gains and losses from remeasurements are generally included in Gain/(loss) from changes in fair value on non-trading portfolios and foreign exchange transactions, net in the income statements.

Fair value measurements – ASC 820, *Fair Value Measurements*, requires entities to disclose information about recurring and non-recurring fair value measurements, as well as the fair value of financial instruments.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transfer between market participants at the measurement date under current market conditions. Fair value measurement further assumes that a transaction to sell the asset or assume a liability takes place either in the principal market or, in the absence of a principal market, in the most advantageous market for the asset or liability.

In determining fair value, IDB Invest uses various valuation approaches, including market, income, or cost approaches. The Codification establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the observable inputs be used when available. Observable inputs are inputs developed based on market data obtained from sources independent of IDB Invest that reflect assumptions market participants would use in pricing the asset or liability. Unobservable inputs are inputs for which market data is not available and are developed using the best information available about the assumptions market participants would use in pricing the asset or liability. The hierarchy is broken down into three levels based on the reliability of inputs as follows:

- Level 1—Inputs are based on unadjusted quoted prices for identical assets or liabilities in active markets.

Assets and liabilities utilizing Level 1 inputs include debt securities and equity investments that are actively traded and primarily include debt securities of the United States government and agencies.
- Level 2—Inputs are based on quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities that are not actively traded; or pricing models for which all significant inputs are observable, directly or indirectly, for substantially the full term of the asset or liability.

Assets and liabilities utilizing Level 2 inputs include money market funds, investment securities, and investments in obligations of banks, governments and agencies or instrumentalities other than the United States, sovereigns, local and regional governments, corporate bonds, borrowings, and derivative instruments that are not actively traded.

Inter-American Investment Corporation

Notes to Financial Statements

- Level 3—Inputs are unobservable and significant to the overall fair value measurement.

Assets utilizing Level 3 inputs include loans, development related debt securities, equity investments, and borrowings that are measured for which observable inputs are not available.

The availability of observable inputs is affected by a wide variety of factors, including, for example, the type of product, and other characteristics particular to the transaction. To the extent fair value is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3.

Fair value for the majority of IDB Invest's financial instruments is derived using pricing models. Pricing models consider the contract terms, including amortization schedule and maturity, where applicable, and other inputs, including, where applicable, interest rate yield curves, credit spreads, creditworthiness of the counterparty, option volatility, and currency rates. In accordance with ASC 820, the impact of IDB Invest's own credit spreads would also be considered when measuring the fair value of liabilities. Where appropriate, valuation adjustments are made to account for various factors, including bid-ask spreads, credit quality, and market liquidity. These adjustments are applied on a consistent basis and are based upon observable inputs, where available. Additional information about fair value measurements is included in Note 10.

Fair value option – The Fair Value Option (FVO) under ASC 825, *Financial Instruments*, permits the measurement of eligible financial assets, financial liabilities and firm commitments at fair value on an instrument-by-instrument basis, that are not otherwise permitted or required to be accounted for at fair value under other accounting standards. IDB Invest has elected the FVO for the following classes of financial assets and liabilities: i) certain investments in development related debt securities that IDB Invest does not have the ability and intent to hold until maturity, ii) certain hybrid development related debt investments, iii) investments that would otherwise be accounted for under the equity method, iv) certain development related investments in equity securities for which a measurement alternative is no longer applied, and v) certain borrowings that are economically hedged with derivative financial instruments.

Financial assets and borrowings elected under the FVO are measured at fair value on a recurring basis and changes in fair value of these financial instruments are included in Gain/(loss) from changes in fair value on non-trading portfolios and foreign exchange transactions, net, in the income statements. Interest income on these financial instruments is recognized on an accrual basis, where applicable.

Loan participations – IDB Invest mobilizes funds from commercial banks and other financial institutions (Participants) by facilitating loan participations, without recourse. These loan participations are administered and serviced by IDB Invest on behalf of the Participants in exchange for a fee. Such fees are recognized upon receipt and are reported in Mobilization fees and other income in the income statements. The disbursed and outstanding balances of loan participations that meet the requirements to be accounted for as sales are not included in IDB Invest's balance sheets.

Pension and postretirement benefits – IDB Invest is a sponsor of the Staff Retirement Plan (SRP) and the Complementary Staff Retirement Plan (CSR) (the Pension Plans), which are defined benefit pension plans jointly managed with the IDB. Under the Pension Plans, benefits are based on years of service and level of compensation, and plan assets include contributions by employees and by IDB Invest and the IDB for their respective employees. Any and all contributions to the Pension Plans are irrevocable and are held separately in retirement funds solely for the payment of benefits under the Pension Plans.

IDB Invest also provides certain health care, tax reimbursement and other postretirement benefits to eligible retirees under its Postretirement Benefits Plan (PRBP), which is also jointly managed by the IDB. Retirees contribute toward the PRBP based on an established premium schedule. IDB Invest and the IDB funds the remainder of the actuarially determined cost of future health care and other benefits for their respective employees. All contributions and other assets and income of the PRBP remain the property of IDB Invest and

Inter-American Investment Corporation

Notes to Financial Statements

the IDB, but are held and administered separately and apart from the other property and assets of each employer solely for the purpose of payment of benefits under the PRBP.

Since both the IDB and IDB Invest are sponsors of the Pension Plans and the PRBP, each employer presents its respective share of these plans. The amounts presented reflect IDB Invest's proportionate share of costs, assets, and obligations of the Pension Plans and PRBP in accordance with ASC 715, *Compensation – Retirement Benefits*.

The service cost component of net periodic benefit costs allocated to IDB Invest is included in Administrative expenses and the other components are included in Other components of pension benefit costs, net, in the income statements. The separate funded statuses of the Pension Plans and the PRBP are included in Receivables and other assets when the respective Pension Plans or the PRBP is in a funded status, and included in Payables and other liabilities when the respective Pension Plans or the PRBP is in an underfunded status in the balance sheets. Additional information about the Pension Plans and PRBP is included in Note 14.

Taxes – IDB Invest, its property, other assets, income, and the operations and transactions it carries out pursuant to the Agreement Establishing the Inter-American Investment Corporation, are immune from all taxation and from all custom duties in its member countries. IDB Invest is also immune from any obligation relating to the payment, withholding or collection of any tax or duty in its member countries.

Accounting and financial reporting developments – In March 2022, the FASB issued ASU 2022-02, Financial Instruments—Credit Losses (Topic 326): Troubled Debt Restructurings and Vintage Disclosures. The amendments in this ASU eliminate the TDR recognition and measurement guidance and enhance existing disclosure requirements for modifications of receivables made to borrowers experiencing financial difficulty. They also require disclosure of current-period gross write-offs by year of origination for financing receivables within the scope of Subtopic 326-20. Early adoption of the amendments is permitted. For IDB Invest, this ASU is effective on January 1, 2023, and is not expected to have a material impact on IDB Invest's financial statements.

In June 2022, the FASB issued ASU 2022-03, Fair Value Measurement (Topic 820): Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions. The amendments in this ASU clarify that a contractual restriction on the sale of an equity security is not considered part of the unit of account of the equity security and, therefore, is not considered in measuring fair value. The amendments also clarify that an entity cannot, as a separate unit of account, recognize and measure a contractual sale restriction. Additionally, certain disclosures for equity securities subject to contractual sale restrictions are required. For IDB Invest, this ASU is effective on January 1, 2024, and is not expected to have a material impact on IDB Invest's financial statements.

In December 2022, the FASB issued ASU 2022-06, *Reference Rate Reform (ASC 848): Deferral of the Sunset Date of Topic 848*. The amendments in this ASU defer the sunset date of the guidance in Topic 848 to December 31, 2024, and are effective immediately for all entities. This ASU is not expected to have a material impact on IDB Invest's financial statements or its reference rate reform transition plan as described in its Management's Discussion and Analysis.

Inter-American Investment Corporation

Notes to Financial Statements

3. Liquid Assets

Liquid assets consists of the following (US\$ thousands):

	December 31, 2022	December 31, 2021
Cash ⁽¹⁾	\$ 57,886	\$ 54,409
Investment securities		
Money market funds	927,710	275,145
Debt securities		
Corporate securities	926,282	876,384
Agency securities	366,825	464,378
Supranational securities	169,878	121,349
Government securities	137,578	166,295
Total debt securities	\$ 1,600,563	\$ 1,628,406
Total investment securities	2,528,273	1,903,551
Total liquid assets	\$ 2,586,159	\$ 1,957,960

⁽¹⁾ Includes restricted cash of \$18.9 million as of December 31, 2022 (\$23.9 million as of December 31, 2021).

The total income from Liquid assets is summarized below (US\$ thousands):

	Year ended December 31	
	2022	2021
Interests and dividends, net	\$ 27,330	\$ 9,853
Gain/(loss) from changes in fair value and gain/(loss) from foreign exchange transactions, net	(32,714)	(1,657)
Total	\$ (5,384)	\$ 8,196

Net unrealized losses recognized in income for the year ended December 31, 2022 relating to trading securities still held as of December 31, 2022 were \$22.1 million (\$7.7 million net unrealized losses for the year ended December 31, 2021).

The maturity structure of debt securities included in Liquid assets is as follows (US\$ thousands):

	December 31, 2022	December 31, 2021
Less than one year	\$ 1,241,710	\$ 952,394
Between one and five years	358,853	676,012
Total	\$ 1,600,563	\$ 1,628,406

4. Development Related Investments

IDB Invest's development related investments include loans, guarantees, debt securities, and equity investments, which are the result of financing activities that are designed to promote the economic development of IDB Invest's Regional Developing Member Countries through the establishment, expansion, and modernization of private enterprises.

Notes to Financial Statements

IDB Invest monitors for development related debt investments measured at amortized cost and fair value in nonaccrual status and past due. Development related debt investments in nonaccrual status are summarized as of December 31, 2022 and December 31, 2021 as follows (US\$ thousands):

	December 31, 2022		Year ended December 31, 2022	
	Total nonaccrual	> 90 days past due and accruing	Interest income recognized on nonaccrual status	Accrued interest income written off
Loans	\$ 30,125	\$ —	\$ 1,163	\$ 98
Debt securities	—	—	—	—
Total development related debt investments, principal amount outstanding	30,125	—	1,163	98
Unamortized discounts	—	—		
Total development related debt investments at cost	30,125	—	1,163	98
Fair value adjustments for debt investments ⁽¹⁾	(3,180)	—		
Total development related debt investments at carrying amount	\$ 26,945	\$ —	\$ 1,163	\$ 98

⁽¹⁾ As of December 31, 2022, one loan measured at fair value with a principal amount outstanding of \$3.2 million and net carrying amount of zero was placed in nonaccrual status and current. There were no debt securities measured at fair value in nonaccrual status nor past due as of December 31, 2022.

	December 31, 2021		Year ended December 31, 2021	
	Total nonaccrual	> 90 days past due and accruing	Interest income recognized on nonaccrual status	Accrued interest income written off
Loans ⁽¹⁾	\$ 25,431	\$ —	\$ 593	\$ —
Debt securities ⁽¹⁾	—	—	—	—
Total development related debt investments, principal amount outstanding	25,431	—	593	—
Unamortized discounts	—	—		
Total development related debt investments at cost	25,431	—	593	—
Fair value adjustments for debt investments	—	—	—	—
Total development related debt investments at carrying amount	\$ 25,431	\$ —	\$ 593	\$ —

⁽¹⁾ There were no development related debt investments measured at fair value placed in nonaccrual status nor past due as of December 31, 2021.

There were no development related debt investments at amortized cost classified as nonaccrual without a related allowance for credit losses as of December 31, 2022 (none as of December 31, 2021).

Inter-American Investment Corporation

Notes to Financial Statements

During 2022, there were no TDRs related to the development related debt investments portfolio. During 2021, there were three TDRs related to financial institutions and corporate loans included in development related debt investments, which had an outstanding balance of \$6.8 million prior to the modifications. These loans had an outstanding balance of \$7.4 million and individually assessed allowance for credit losses of \$2.3 million as of December 31, 2021. IDB Invest does not have commitments to extend additional funds to borrowers whose terms have been modified in a TDR. There were no payment defaults on loans modified in a TDR within the previous twelve months.

Since the beginning of the COVID-19 pandemic, IDB Invest has evaluated loans modifications under the guidance set forth in the Interagency Statement and determined that these modifications were not considered TDRs. During the year ended December 31, 2022, IDB Invest evaluated two loans modification with a total outstanding balance of \$50.8 million and the relief provided included short-term deferrals of principal amounting to \$2.6 million as of December 31, 2022. During 2021, IDB Invest evaluated loan modifications with a total outstanding balance of \$2.1 million and the relief provided included short-term deferrals of principal amounting to \$165 thousand as of December 31, 2021. The loans continue to accrue interest during the deferral period and are not reported as past due nor in nonaccrual status. IDB Invest continues to estimate the allowance for credit losses for these loans through the collective assessment under the CECL methodology.

Inter-American Investment Corporation

Notes to Financial Statements

Changes in the allowance for credit losses by portfolio segment are presented below (US\$ thousands):

	Year ended December 31, 2022			
	Financial institutions	Corporates	Project finance	Total

Notes to Financial Statements

A description of credit quality indicators is presented in the table below:

Rating categories	Credit quality indicator	Internal credit risk classification range	Description
aa- and better	Very strong	aa- or higher	An obligor in these categories has a very strong capacity to meet its financial commitment.
a+ to a-	Strong	a+, a, a-	An obligor in these categories has a strong capacity to meet its financial commitment.
bbb+ to bbb-	Adequate	bbb+, bbb, bbb-	An obligor in these categories exhibits an adequate financial profile. However, adverse economic conditions or changing circumstances are more likely to lead to a weakening of the obligor's capacity to meet its financial obligations.
bb+ to bb-	Moderate	bb+, bb, bb-	An obligor in these categories can face major uncertainties or exposures to adverse business, financial, or economic conditions that could lead to its inadequate capacity to meet its financial obligations.
b+ to b-	Weak	b+, b, b-	An obligor in these categories is more vulnerable to nonpayment than obligations rated bb-, but the obligor currently has the capacity to meet its financial obligations. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial obligations.
ccc+ and lower	Very weak	ccc+ or lower	An obligor in these categories faces significant challenges, and default may also already be a virtual certainty. The obligor is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial obligations. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial obligations.

Inter-American Investment Corporation

Notes to Financial Statements

A summary of development related debt investments carried at amortized cost by credit quality indicator, class of financing receivable and major security type, and vintage as of December 31, 2022 and December 31, 2021 are as follows (US\$ thousands):

	December 31, 2022							Revolving loans amortized cost basis	Total

Notes to Financial Statements

Guarantees

Guarantees issued by IDB Invest have maturities consistent with those of the guaranteed loan portfolio. No guarantees issued by IDB Invest have been called since the inception of the guarantee program.

The outstanding exposure for guarantees by IDB Invest was \$177.3 million as of December 31, 2022 (\$134.6 million as of December 31, 2021). The maximum potential amount of future payments under the guarantees, without taking into consideration possible recoveries under recourse provisions or from collateral held or pledged, amounted to \$196.5 million as of December 31, 2022 (\$146.7 million as of December 31, 2021).

The contingent liabilities associated with the guarantees issued by IDB Invest are measured either under the CECL methodology or at fair value through income. For guarantees measured under the CECL methodology, IDB Invest recorded a contingent liability for off-balance sheet credit exposures of \$298 thousand as of December 31, 2022 (\$41 thousand as of December 31, 2021) in the balance sheets and a provision for credit losses of \$257 thousand for the year ended December 31, 2022 (release of provision for credit losses of \$17.4 million for the year ended December 31, 2021) in the income statements. In connection with guarantees measured at fair value, IDB Invest recorded a reduction in the contingent liability of \$459 thousand as of December 31, 2022 in the balance sheets (reduction in the contingent liability of \$1.2 million as of December 31, 2021) and recognized \$692 thousand net unrealized losses for the year ended December 31, 2022 (net unrealized gains of \$1.2 million for the year ended December 31, 2021) in the income statements. Refer to Note 10 for additional information related to guarantees measured at fair value.

Loan participations

As of December 31, 2022, IDB Invest serviced loan participations outstanding of \$3.1 billion (\$2.2 billion as of December 31, 2021) and recognized servicing fees of \$935 thousand for the year ended December 31, 2022 (\$1.2 million for the year ended December 31, 2021) included in Mobilization fees and other income in the income statements.

Variable interest entities

IDB Invest is the primary beneficiary of one VIE as of December 31, 2022. IDB Invest's involvement with this VIE is limited to a loan, which amounted to \$1.2 million as of December 31, 2022 (\$7.0 million as of December 31, 2021) and is recorded as Development related investments in the balance sheets. There were no undisbursed commitments as of December 31, 2022 (none as of December 31, 2021). Based on the most recent available data, total VIE assets are approximately equal to the carrying value of the Development related investment recognized in the balance sheets as of December 31, 2022. This VIE has no other creditors.

IDB Invest also holds variable interests in the form of development related investments in VIEs in which it is not the primary beneficiary as of December 31, 2022. These VIEs are mainly special purpose vehicles or investment funds, where the sponsor, the general partner or fund manager does not have substantive equity at risk or the equity investors, as a group, lack substantive voting rights or the power, through voting or similar rights, to direct the activities of the entity that most significantly impact the entity's economic performance. In 2022, special purpose vehicles related to securitization structures and other trust arrangements in which IDB Invest has a variable interest in the form of a loan or other debt instrument were incorporated into the following table. IDB Invest's interests in these VIEs are recorded as Development related investments in the balance sheets.

Inter-American Investment Corporation

Notes to Financial Statements

IDB Invest's maximum exposure to loss as a result of its involvement in such VIEs as of December 31, 2022 and December 31, 2021 is in the table below (US\$ thousands). IDB Invest does not have any liabilities with respect to these VIEs.

	December 31, 2022	December 31, 2021
Carrying value	\$ 499,125	\$ 162,336
Undisbursed commitments	238,282	103,457
Maximum exposure to VIEs	\$ 737,407	\$ 265,793

Notes to Financial Statements

7. Derivative Instruments

IDB Invest enters into contracts for derivative instruments primarily for market risk management purposes in connection with its principal business activities. None of these derivative instruments are designated as hedging instruments under ASC 815, *Derivatives*.

The location presented as assets/(liabilities) in the balance sheets and the fair value of derivative instruments by purpose and type are summarized below (US\$ thousands):

Derivative purpose	Derivative type	December 31, 2022		December 31, 2021	
		Derivative assets	Derivative liabilities	Derivative assets	Derivative liabilities
Development related debt investments	Cross currency swaps	\$ 2,884	\$ (4,731)	\$ 5,302	\$ (1,311)
	Interest rate swaps	131,305	(932)	11,106	(2,849)
Borrowings	Cross currency swaps	34,957	(154,844)	—	(39,023)

Total		\$ 169,146	\$ (362,865)	\$ 17,689	\$ (79,941)

The effect of derivative instruments in the income statements are summarized below (US\$ thousands):

Derivative type and purpose	Income statement location	Year ended December 31	
		2022	2021
Development related debt investments	Gain/(loss) from changes in fair value on non-trading portfolios and foreign exchange transactions, net	\$ (9,749)	\$ 3,446
		135,797	8,818
Borrowings	Gain/(loss) from changes in fair value on non-trading portfolios and foreign exchange transactions, net	(81,466)	(40,269)
		(158,423)	(31,084)
Total		\$ (113,841)	\$ (59,089)

The income related to each derivative type includes realized and unrealized gains and losses.

As of December 31, 2022, the outstanding volume, measured by notional amount, of swap contracts was \$6.1 billion (\$4.6 billion as of December 31, 2021).

Inter-American Investment Corporation

Notes to Financial Statements

IDB Invest does not present derivative assets and liabilities related to contracts entered into with the same counterparty under a legally enforceable netting agreement on a net basis in the balance sheets. The following tables provide the gross and net positions of IDB Invest's derivative contracts considering amounts and collateral held or pledged in accordance with enforceable counterparty credit support and netting agreements described below (US\$ thousands):

December 31, 2022				
	Gross amount of assets presented in the balance sheets	Gross amounts not offset in the balance sheets		
		Financial instruments	Collateral received ⁽¹⁾	Net amount
Derivative assets	\$ 169,146	\$ (153,796)	\$ (13,650)	\$ 1,700

December 31, 2022				
	Gross amount of liabilities presented in the balance sheets	Gross amounts not offset in the balance sheets		
		Financial instruments	Collateral pledged ⁽¹⁾	Net amount
Derivative liabilities	\$ (362,865)	\$ 153,796	\$ 204,018	\$ (5,051)

⁽¹⁾ Collateral received of \$13.7 million and collateral pledged of \$204.0 million reflect the offsetting threshold limits, which cannot exceed the fair value of the derivative assets and derivative liabilities. Total cash collateral pledged was \$214.5 million and total cash collateral received was \$13.7 million as of December 31, 2022. Refer to Notes 5 and 8 for additional details related to Receivables for cash collateral pledged and Payables for cash collateral received, respectively.

December 31, 2021				
	Gross amount of assets presented in the balance sheets	Gross amounts not offset in the balance sheets		
		Financial instruments	Collateral received ⁽¹⁾	Net amount
Derivative assets	\$ 17,689	\$ (12,372)	\$ (5,317)	\$ —

December 31, 2021				
	Gross amount of liabilities presented in the balance sheets	Gross amounts not offset in the balance sheets		
		Financial instruments	Collateral pledged	Net amount
Derivative liabilities	\$ (79,941)	\$ 12,372	\$ 65,800	\$ (1,769)

⁽¹⁾ Collateral received of \$5.3 million reflects the offsetting threshold limit, which cannot exceed the fair value of the derivative assets. Total cash collateral received was \$5.7 million as of December 31, 2021. Refer to Note 8 for additional details related to Payables for cash collateral received.

IDB Invest's derivative contracts with market counterparties are entered into under standardized master agreements published by the International Swaps and Derivatives Association ("ISDA" Agreements). ISDA Agreements provide for a single lump sum settlement amount upon the early termination of transactions following a default or termination event whereby amounts payable by the non-defaulting party to the other party may be applied to reduce any amounts that the other party owes the non-defaulting party. This setoff effectively reduces any amount payable by the non-defaulting party to the defaulting party.

IDB Invest's ISDA Agreements are appended by a Credit Support Annex ("CSA") that provides for the receipt and posting of collateral in the form of cash in US\$ or U.S. Treasury securities to reduce mark-to-market exposure among derivative market counterparties. IDB Invest recognizes cash collateral received and a corresponding liability in its balance sheets for the obligation to return it. As of December 31, 2022, IDB Invest had \$13.7 million of outstanding obligations to return cash collateral under CSAs (\$5.7 million as of December 31, 2021). IDB Invest recognizes a receivable in its balance sheets for its rights to cash collateral posted. As of December 31, 2022, \$214.5 million of cash collateral was posted under CSAs (\$65.8 million as of December 31,

Inter-American Investment Corporation

Notes to Financial Statements

2021). No securities collateral was received or pledged as of December 31, 2022 nor December 31, 2021. Securities received as collateral are not recognized in the balance sheets. In accordance with the CSAs, IDB Invest may rehypothecate securities received as collateral, subject to the obligation to return such collateral and any related distributions received. In the event of a counterparty default, IDB Invest may exercise certain rights and remedies, including the right to setoff any amounts payable by the counterparty against any collateral held by IDB Invest and the right to liquidate any collateral held.

8. Payables and Other Liabilities

Payables and other liabilities are summarized below (US\$ thousands):

	Notes	December 31, 2022	December 31, 2021
Liability for off-balance sheet credit losses	4	\$ 78,717	\$ 61,560
Operating lease liability	12	37,115	41,593
Pension and Postretirement Benefit Plans			
Pension Plans, net liability	14	35,375	126,178
Postretirement Benefit Plan, net liability	14	—	18,453
Other liabilities		27,874	28,241
Borrowings related Interest and commitment fees payable		25,911	18,215
Loan origination fees and costs, net	4	24,656	34,793
Employment benefits payable		18,257	16,635
Deferred revenue		17,948	16,092
Payables for cash collateral received	7	13,650	5,700
Due to IDB, net	13	10,191	16,620
Total payables and other liabilities		\$ 289,694	\$ 384,080

Deferred revenue includes service fees collected from related parties. Additional information about IDB Invest's related party transactions is included in Note 13.

Notes to Financial Statements

9. Capital

IDB Invest's authorized share capital is owned by its member countries. IDB Invest's original authorized share capital was increased from \$200.0 million to \$705.9 million, equivalent to 70,590 shares, through its First General Capital Increase (GCI-I), which was approved in 1999, and several subsequent special increases. These increases allocated a total of \$505.9 million for subscriptions by new and existing member countries, with a par value and issuance price of \$10,000 per share.

On March 30, 2015, IDB Invest's Board of Governors authorized the issuance of 125,474 shares for a total of \$2.03 billion (\$16,178.60 per share) through the Second General Capital Increase (GCI-II), which increased the total authorized shares amount to 196,064. GCI-II is comprised as follows:

(i) 80,662 shares corresponding to \$1.305 billion in capital subscribed by IDB Invest shareholders during the 2016-2022 period (Annex A Shares). Subscribed shares are presented in Capital, par value, and Additional paid-in capital, and any subscription amount due from a member is presented in Receivable from members in the balance sheets. Payments are due from shareholders on October 31 of each year from 2016 to 2022 according to a payment plan determined and communicated by management to each subscribing country. As of December 31, 2022, the timing of remaining payments has been extended to January 31, 2023. IDB Invest recognizes the issuance of Annex A Shares at the subscription price on the subscription date and recognizes a receivable due from shareholders for subscription payments expected to be received in the future. The Board of Executive Directors is authorized to extend payment deadlines. The price for Annex A Shares not paid within their corresponding annual installment is adjusted to reflect a 5.0% increase for each year of arrears, except for those shares corresponding to the first installment which were fully paid in by the end of the second installment and not subject to a price adjustment. The price adjustment for shares in arrears is recorded to Additional paid-in capital and to Receivable from members in the balance sheets.

(ii) 44,812 shares corresponding to \$725.0 million in transfers from the IDB on behalf of its shareholders (Annex B Shares) paid to IDB Invest during the period 2018-2025 upon annual approval by the IDB Board of Governors.

Capital contributions of \$46.8 million were received during the year ended December 31, 2022 for a total of \$1.2 billion in contributions corresponding to Annex A Shares under GCI-II. In March 2022, the Board of Governors approved income distributions corresponding to Annex B Shares transfers from the IDB on behalf of its shareholders that are also member countries of IDB Invest. Following this approval, IDB Invest received \$148.6 million in income distributions (transfers) for a total of \$505.1 million contributions corresponding to Annex B Shares under GCI-II, which are included as part of Total paid-in capital in the balance sheets. Total capital contributions of \$1.7 billion have been received under GCI-II through December 31, 2022.

Under the Agreement Establishing the Inter-American Investment Corporation, any member may withdraw from IDB Invest, which shall become effective on the date specified in the notice but in no event prior to six months from the delivery date of such notice. Even after withdrawing, a member shall remain liable for all obligations to IDB Invest to which it was subject on the date of delivery of the withdrawal notice. In the event a member withdraws, IDB Invest and the member may agree to the repurchase of the shares of said member on terms appropriate under the circumstances. If such agreement is not reached within three months of the withdrawal notice, or within a term agreed upon between both parties, the repurchase price of the member's shares shall be equal to the book value on the date when the member ceases to belong to IDB Invest, such book value to be determined by the audited financial statements. Payment for shares shall be made in such installments, times, and currencies as IDB Invest shall determine, taking into account its financial position.

Notes to Financial Statements

10. Fair Value Measurements

IDB Invest carries a portion of its financial instruments at fair value on a recurring basis and discloses fair value of financial instruments not carried at fair value in accordance with US GAAP. The methodologies and key assumptions IDB Invest uses to estimate the fair values of its financial instruments are summarized below.

Projections of future cash flows and other assumptions and methodologies used in the determination of fair value are subjective, particularly when the measurement relies on unobservable market inputs. Minor changes in assumptions or methodologies may affect the fair value measurements.

Cash – The carrying amount reported in the balance sheets approximates fair value.

Investment securities – Fair values for money market funds and debt securities are based on either unadjusted quoted prices for identical assets or liabilities in active markets or quoted prices in active markets for identical assets or liabilities or prices derived from alternative pricing models when these prices are not available from pricing vendors. These methodologies apply to certain investments in non-U.S. government obligations, agencies, supnationals and corporate bonds. Also included are commercial paper (CP) and certificates of deposit (CD) issued under large U.S. based CP or CD programs. For investments for which prices and other relevant information, generated by market transactions involving identical or comparable assets, are not available, the income approach is used, based on yield curves, bond or credit default swap spreads, and recovery rates based on collateral values as key inputs.

Development related debt investments – Loans and development related investments in debt securities for which a combination of observable and unobservable inputs is generally available, require the use of estimates and present value calculations of future cash flows. Fair values are estimated using recently executed transactions, market price quotations (where observable), and market observable credit default swap levels along with proprietary valuation models where such transactions and quotations are unobservable. The lack of objective pricing standards adds a greater degree of subjectivity and volatility to these derived or estimated fair values.

Any excess or deficit resulting from the difference between the carrying amounts of the development related debt investments carried at amortized cost and the fair value disclosed does not necessarily reflect the realizable values since IDB Invest generally holds investments to maturity with the aim of realizing their contractual cash flows.

Equity investments – In most cases, market prices are not available for equity investments, and alternate valuation techniques require a significant degree of judgment. IDB Invest intends to hold investments in LPs until the final liquidation of the underlying assets of the LPs in order to participate fully in the performance of the LP. IDB Invest does not have redemption rights in any of these investments. IDB Invest estimates that the underlying assets of the LPs generally may be liquidated over a period of ten years.

Equity investments are carried at fair value on a recurring basis if publicly traded in active markets, or if IDB Invest elects the FVO. For investments in LPs, IDB Invest utilizes the NAVs reported by the fund managers as the basis of the fair value measurement. These NAVs are derived from the fair values of the underlying investments and adjusted further by IDB Invest, as needed.

Derivative instruments – These include cross currency and interest rate swap contracts. Fair values are determined by obtaining the present value of estimated future cash flows using appropriate discount rates.

Borrowings – IDB Invest's borrowings are recorded at amortized cost or fair value. The fair value of IDB Invest's borrowings is estimated using traded prices, quoted market prices or discounted cash flow analyses based on IDB Invest's current borrowing rates for similar types of borrowing arrangements.

Inter-American Investment Corporation

Notes to Financial Statements

Other assets and liabilities – The carrying value of financial instruments included in Receivables and other assets, and Payables and other liabilities approximates fair value due to their liquid or short-term nature. Payables and other liabilities includes guarantees issued and measured at fair value.

Fair value of financial instruments

The following table presents the carrying values and estimated fair values of IDB Invest's financial instrument assets/(liabilities) and their classification within the fair value hierarchy in accordance with ASC 820.

Notes to Financial Statements

11. Non-trading portfolios

IDB Invest's non-trading portfolio includes development related debt investments and borrowings measured at fair value under the FVO as well as the related derivative instruments at fair value. Net gains and losses from changes in fair value on the non-trading portfolios and foreign exchange transactions are as follows (US\$ thousands):

	Year ended December 31	
	2022	2021
Changes in fair value		
Development related debt investments	\$ (44,511)	\$ (422)
Borrowings	175,093	69,030
Derivatives		
Realized gain/(loss) on swaps ⁽¹⁾	17,626	6,790
Unrealized gain/(loss) on swaps ⁽¹⁾	(131,467)	(65,879)
Gain/(loss) from changes in fair value, net	16,741	9,519
Foreign exchange transactions		
Development related debt investments	(9,408)	(43,020)
Borrowings	33,572	46,959
Other assets/liabilities	421	936
Gain/(loss) from foreign exchange transactions, net	24,585	4,875
Gain/(loss) from changes in fair value and foreign exchange transactions, net	\$ 41,326	\$ 14,394

⁽¹⁾ Includes foreign exchange gain/(loss) on cross currency swaps.

Changes in fair value due to market risk, and all fair value changes on derivatives, are reported in the income statements whereas changes in the fair value of borrowings resulting from changes in IDB Invest's own credit risk spread are recorded through Other comprehensive income.

Inter-American Investment Corporation

Notes to Financial Statements

12. Contingencies and Leases

In the normal course of business, IDB Invest is from time to time named as a defendant or codefendant in legal actions in different jurisdictions. Although there can be no assurances, based on the information available, IDB Invest's management does not believe the outcome of any of the existing legal actions will have a material adverse effect on IDB Invest's financial position, results of operations, or cash flows.

The impacts of the COVID-19 pandemic and the Russian war on Ukraine have disrupted economic markets and created significant volatility. The operational and financial performance of the companies IDB Invest finances depends on future developments, including the length and severity of the pandemic and the Russian war on Ukraine, that cannot be reasonably estimated at this point in time and continue to evolve. IDB Invest has capital buffers in place to absorb additional stress and credit rating downgrades. Management continues to monitor the developments and to actively manage risks associated with its various portfolios within existing financial policies and limits.

Office Space Leases

IDB Invest has entered into office space leases with the IDB at its headquarters and in its Regional Developing Member Countries that are accounted for as either short-term leases or operating leases. The current lease agreement with the IDB at headquarters expires in 2030. The remaining current lease agreements with the IDB in the Regional Developing Member Countries are generally renewed annually. The lease agreements in Argentina, Colombia and Panama include renewal options which extend the lease term between 2023 and 2029, all of which IDB Invest is reasonably certain to exercise for the duration established in the contract.

Refer to Notes 5 and 8 for additional information related to IDB Invest's operating lease right-of-use assets and operating lease liabilities outstanding as of December 31, 2022 and 2021.

The following table details the lease expenses and quantitative disclosure requirements (US\$ thousands):

	Year ended December 31	
	2022	2021
Operating leases		
Operating lease expense	\$ 5,447	\$ 5,239
Total lease expense	\$ 5,447	\$ 5,239
Supplemental disclosure:		
Weighted average of lease terms (years)	7.9	8.9
Weighted average discount rate	1.8 %	1.8 %

Discount rate is determined as IDB Invest's incremental borrowing rate under the IDB multi-currency facility.

Maturity analysis of operating lease liabilities with the IDB are as follows (US\$ thousands):

Estimated undiscounted cash flows	December 31, 2022	
2023	\$	5,167
2024		5,079
2025		4,990
2026		4,985
2027 - 2030		19,790
Total operating leases	\$	40,011
Discount		(2,896)
Operating lease liability	\$	37,115

Inter-American Investment Corporation

Notes to Financial Statements

13. Related Party Transactions

IDB Invest provides certain services to the IDB and the IDB provides certain services to IDB Invest pursuant to SLAs, which outline the duration, scope of work, roles and responsibilities, remuneration, and performance metrics of each institution. The services performed under the SLAs are further described below. IDB Invest also has related party relationships with trust funds it administers or IDB administers as described below and has entered into office space leases with the IDB as described in Note 12.

Private Sector Operations

Following the IDB Group private sector and non-sovereign guaranteed reorganization, all new private sector activities are originated by IDB Invest including co-financing arrangements by IDB Invest and the IDB. In co-financing arrangements, IDB Invest and the IDB have separate legal and economic interests in a financing transaction, which may be subject to certain minimum amounts as agreed between IDB Invest and the IDB.

IDB Invest earns revenue from an annual renewable SLA under which IDB Invest provides loan origination, credit risk evaluation and monitoring, and certain loan administration services for the IDB related to its private sector operations including operations that are co-financed by IDB Invest and IDB. IDB Invest also provides certain advisory services to the IDB Group. These amounts are included in Service fees from related parties in the income statements.

Management of External Funds

IDB Invest administers on behalf of other related party entities, which include donors and member countries, funds restricted for specific uses that include the co-financing of certain projects, technical studies for borrowers, project-related studies, and research and training programs. These funds are held in trust by IDB Invest and are not commingled with IDB Invest's funds, nor are they included in the assets of IDB Invest. IDB Invest receives a management fee that is generally a percentage of the funds received. These fees are included in Service fees from related parties in the income statements.

Access to IDB Administered Funds

In addition to the aforementioned funds, IDB Invest provides certain services for trust funds administered by the IDB on behalf of the trust fund donors (the Trust Funds). IDB Invest receives an allocation of the IDB's related Trust Fund fees. Such fees are intended to cover internal and external costs associated with administering the private sector activities for the Trust Funds and related operations over the expected lives of the Trust Funds and the underlying operations. Costs expected to be incurred approximate the allocable fee. The Trust Fund organizational documents provide for either the payment of a lump sum or scheduled payments. The timing of the payments may not correspond to the incurrence of the related costs. IDB Invest also provides certain technical assistance activities for private sector operations on behalf of donor trust funds that are directly funded by IDB Trust Funds. These arrangements are recognized on a cost reimbursement basis and presented gross in Service fees from related parties and Administrative expenses in the income statements.

For the year ended December 31, 2022, IDB Invest received \$3.3 million for these services (\$3.5 million for the year ended December 31, 2021). As of December 31, 2022, IDB Invest has recorded deferred revenue of \$17.1 million related to these services (\$16.0 million as of December 31, 2021), which will be recognized as revenue as services are provided. Deferred revenue is presented as a component of Payables and other liabilities in the balance sheets.

Inter-American Investment Corporation

Notes to Financial Statements

Revenue from related party transactions are as follows (US\$ thousands):

	Year ended December 31	
	2022	2021
SLA revenue	\$ 71,456	\$ 68,805
Management of external funds revenue	1,968	2,334
IDB administered funds revenue	7,604	7,803
Total	\$ 81,028	\$ 78,942

SLA Expenses

IDB Invest purchases various general and administrative services from the IDB under a series of annual renewable SLAs. For the year ended December 31, 2022, IDB Invest incurred expenses of \$16.7 million SLA services provided by the IDB (\$16.0 million for the year ended December 31, 2021), which are included in Administrative expenses in the income statements. Payables related to these SLA expenses are included in the total Due to IDB, net of \$10.2 million as of December 31, 2022 (\$16.6 million as of December 31, 2021). Refer to Note 8 for additional details.

Other Transactions with Related Parties

IDB Invest has a multi-currency credit facility with the IDB up to \$300.0 million at the rate in accordance with the IDB's lending rate policy. The tenor of borrowings under this facility shall not exceed twenty years from the disbursement date. This facility permits IDB Invest to supplement resources in local currencies to support its development related investment portfolio through December 31, 2033. As of December 31, 2022, IDB Invest's total drawdowns from the IDB multi-currency credit facility were \$209.7 million and \$90.3 million remain undrawn (\$206.9 million total drawdowns and \$93.1 million undrawn as of December 31, 2021). Refer to Note 6 for additional details.

14. Pension and Postretirement Benefit Plans

Both the IDB and IDB Invest are sponsors of the Pension Plans and PRBP and each employer presents its respective share of these plans using a December 31 measurement date.

Inter-American Investment Corporation

Notes to Financial Statements

Obligations and funded status

IDB Invest uses a December 31 measurement date for the Pension Plans and the PRBP. The following table summarizes IDB Invest's change in projected benefit obligation, change in plan assets, funded status of the Pension Plans and the PRBP, and the assets/(liabilities) recognized in the balance sheets (US\$ thousands):

	Pension Plans		PRBP	
	2022	2021	2022	2021
Reconciliation of benefit obligation				
Obligation as of January 1	\$ (426,530)	\$ (382,483)	\$ (206,493)	\$ (217,485)
Service cost	(26,798)	(25,224)	(9,182)	(10,567)
Interest cost	(11,950)	(9,340)	(5,605)	(5,385)
Participants' contributions	(4,307)	(4,015)	—	—
Net transfers between IDB and IDB Invest	(131)	(7,704)	(32)	14,775
Actuarial gains/(losses)	171,710	(1,779)	93,670	11,032
Benefits paid	5,225	4,015	1,276	1,153

Obligation as of December 31	\$ (292,781)	\$ (426,530)	\$ (126,382)	\$ (206,493)

Reconciliation of fair value of plan assets

Fair value of plan assets as of January 1	300,352	259,378	188,040	182,791
Net transfers between IDB and IDB Invest	131	7,704	32	(14,775)
Actual return on plan assets	(50,979)	25,039	(30,852)	16,395
Benefits paid	(5,225)	(4,015)	(1,276)	(1,153)
Participants' contributions	4,307	4,015	—	—
Employer contributions	8,820	8,231	5,115	4,782
Fair value of plan assets as of December 31	\$ 257,406	\$ 300,352	\$ 161,059	\$ 188,040

Funded status

Funded/(Underfunded) status as of December 31	(35,375)	(126,178)	34,677	(18,453)
Funded/(Underfunded) status as of December 31	\$ (35,375)	\$ (126,178)	\$ 34,677	\$ (18,453)

Amounts recognized in Accumulated other comprehensive income/(loss) consist of:

Net actuarial (gain)/loss	(49,452)	64,187	(34,465)	21,861
Prior service (credit)/cost	—	—	(525)	(962)
Net amount recognized as of December 31	\$ (49,452)	\$ 64,187	(34,990)	20,899

As of December 31, 2022, the Pension Plans were underfunded and PRBP funded (all underfunded as of December 31, 2021). In 2022 and 2021, the aggregate fair value of the Pension Plans and PRBP's assets were \$418.5 million and \$488.4 million, respectively, and aggregate projected benefit obligations were \$419.2 million and \$633.0 million, respectively, contributing to the total Pension Plans and PRBP net liability of \$0.7 million and \$144.6 million, respectively, as of December 31, 2022 and 2021.

Inter-American Investment Corporation

Notes to Financial Statements

The accumulated benefit obligation, which excludes the effect of future salary increases, in comparison to the fair value of the Pension Plans' assets is as follows as of December 31, 2022 and 2021 (US\$ thousands):

	Pension Plans	
	2022	2021
Accumulated benefit obligation	\$ (247,556)	\$ (350,266)
Fair value of plan assets	257,406	300,352
Funded/(Underfunded) status	\$ 9,850	\$ (49,914)

Components of net periodic benefit cost

Pension Plans and PRBP net periodic benefit costs recognized in the income statements consist of the following components (US\$ thousands):

	Year ended December 31			
	Pension Plans		PRBP	
	2022	2021	2022	2021
Service cost ⁽¹⁾	\$ 26,798	\$ 25,224	\$ 9,182	\$ 10,567
Interest cost ⁽³⁾	11,950	9,340	5,605	5,385
Expected return on plan assets ⁽²⁾⁽³⁾	(13,052)	(10,709)	(8,197)	(7,494)
Amortization of: ⁽³⁾				
Net actuarial (gain)/loss	5,959	7,006	1,705	3,788
Prior service (credit)/cost	—	—	(437)	(437)
Net periodic benefit cost	\$ 31,655	\$ 30,861	\$ 7,858	\$ 11,809

⁽¹⁾ Included in Administrative expenses.

⁽²⁾ The expected long-term rate of return on plan assets is 5.00% in 2022 and 4.75% in 2021.

⁽³⁾ Included in Other components of pension benefit costs, net.

Other changes in the Pension Plans and PRBP assets and projected benefit obligations recognized in Other comprehensive income/(loss) consist of the following components (US\$ thousands):

	Year ended December 31			
	Pension Plans		PRBP	
	2022	2021	2022	2021
Current actuarial (gain)/loss, net	\$ (107,680)	\$ (12,551)	\$ (54,621)	\$ (19,933)
Amortization of:				
Net actuarial (gain)/loss	(5,959)	(7,006)	(1,705)	(3,788)

Total recognized in Net periodic benefit cost and Other comprehensive (income)/loss	\$ (81,984)	\$ 11,304	\$ (48,031)	\$ (11,475)

Inter-American Investment Corporation

Notes to Financial Statements

Actuarial assumptions

The actuarial assumptions used in the Pension Plans and PRBP valuations are based on financial market interest rates, past experience, and management's best estimate of future benefit changes and economic conditions. Changes in these assumptions will impact future benefit costs and obligations. Actuarial gains and losses occur when actual results are different from expected results. Actuarial gains and losses recognized in Accumulated other comprehensive income/(loss), which exceed 10% of the greater of the benefit obligation or market-related value of the plan assets at the beginning of the period, are amortized to income over the average remaining service period of active participants expected to receive benefits under the Pension Plans and PRBP, which is approximately 10.6 years and 12.0 years, respectively.

Unrecognized prior service credit is amortized over a range of 0.4 years to 3.0 years for the PRBP.

The weighted-average assumptions used to determine the benefit obligation and the net periodic benefit cost were as follows:

	Pension Plans		PRBP	
	2022	2021	2022	2021
Weighted average assumptions used to determine benefit obligation as of December 31				
Discount rate	5.00 %	2.78 %	5.01 %	2.83 %
Inflation rate	2.47 %	2.55 %	2.47 %	2.55 %
Rate of compensation increase	4.26 %	4.59 %	n/a	n/a
<hr/>				
	Pension Plans		PRBP	
	2022	2021	2022	2021
Weighted average assumptions used to determine net periodic benefit cost for years ended December 31				
Discount rate	2.78 %	2.44 %	2.83 %	2.52 %
Expected long-term rate of return on plan assets	5.00 %	4.75 %	5.00 %	4.75 %
Rate of compensation increase	4.59 %	4.26 %	n/a	n/a
Inflation rate	2.55 %	2.12 %	2.55 %	2.12 %

Accumulated and projected benefit obligations are measured as the present value of expected payments. The discount rate used is selected in reference to the year-end yield of AA corporate bonds within the approved Financial Times Stock Exchange Pension Liability Index, with maturities that correspond to the payment of benefits. For the assumed rate of U.S inflation, the IDB and IDB Invest have established a process by which a range of inputs is reviewed, including 10-year, 20-year, 30-year forward looking expert opinion forecasts, the average of the 10-year, 20-year, and 30-year U.S. Treasury Inflation Protected Securities (U.S. TIPS) breakeven inflation rate, and historical averages for U.S Consumer Price Index (CPI).

The actuarial gains related to changes in the Pension Plans' and PRBP benefit obligations for the years ended December 31, 2022 and 2021 primarily resulted from changes in the discount rate and inflation rate.

The long-term expected rate of return on the Pension Plans' and PRBP investments was determined by surveying industry leading external providers' capital market assumptions (CMAs), most using a building-block method. Using CMAs as the base, best estimates of expected future nominal rates of return are assigned for each asset class, including expected excess returns over benchmark indices, and netting out investment expenses. The estimated future nominal returns of the asset classes are combined to produce the Pension Plans' and PRBP long-term expected rates of return. The Pension Plans' and PRBP strategic asset allocations (target weight to each asset class) are then multiplied by each asset class's expected future nominal rate of return. Respective volatilities and covariances across asset classes are also incorporated. Then, IDB Invest's

Inter-American Investment Corporation

Notes to Financial Statements

approved long-term rate of inflation, that is consistent with the long-term horizon for computing expected returns, is deducted from the nominal expected rates of return.

For participants assumed to retire in the United States, the accumulated postretirement benefit obligation was determined using the following health care cost trend rates as of December 31:

	PRBP	
	2022	2021
Health care cost trend rates assumed for next year		
Medical, Non-Medicare	4.50%	4.50%
Medical, Medicare	4.50%	3.00%
Prescription drugs	7.50%	6.00%
Dental	4.50%	4.50%
Rate to which the cost trend rate is assumed to decline (the ultimate trend rate)		
Medical, Non-Medicare	4.50%	4.50%
Medical, Medicare	3.00%	3.00%
Prescription drugs	6.00%	6.00%
Dental	4.50%	4.50%
Year that the rate reaches the ultimate trend rate		
Medical, Non-Medicare	2023	2022
Medical, Medicare	2027	2022
Prescription drugs	2026	2022
Dental	2023	2022

For those participants assumed to retire outside of the United States, a 6.00% and 5.00% health care cost trend rate was used for 2022 and 2021, with an ultimate trend rate of 4.50% in 2028.

Pension Plans and PRBP Assets

The assets of the Pension Plans and the PRBP are managed primarily by external investment managers engaged by the IDB who are provided with governing Committee-approved investment guidelines that take into account the Pension Plans and PRBP investment policies. Investment policies with long-term strategic asset allocations have been developed so that there is an expectation of sufficient returns to meet long-term funding needs. The Pension Plans and PRBP assets include both, fully-diversified main Funds, and their low-risk Stabilization Reserve Funds. The policies allocate 60% to 65% of the Pension Plans portfolio to growth-oriented, inflation-hedging assets (the Return Strategies), and 35% to 40% of assets to nominal and inflation-indexed U.S. fixed income which partially hedge the interest rate of the Pension Plans and PRBP's liabilities, and to protect against disinflation (the Liabilities Strategies). The Stabilization Reserve Funds invest in Liabilities Strategies only, specifically short/intermediate term U.S. fixed income.

The Pension and Managing Committees approve Investment Policy Statements (IPS) and Strategic Asset Allocations (SAA) of the Pension Plan's and PRBP, consistent with the IDB's Risk Appetite (RA) and Long-term Funding (LTF) policies and adopted by IDB Invest.

Inter-American Investment Corporation

Notes to Financial Statements

The IPS SAA target allocations as of December 31, 2022, are as follows:

	Pension Plans	PRBP
Main Funds:		
U.S. equities	20 %	20 %
Non-U.S. equities	18 %	18 %
Emerging markets equities	4 %	4 %
Public real estate	3 %	3 %
Long duration diversified fixed income	27 %	27 %
Core fixed income	4 %	4 %
High yield fixed income	2 %	2 %
U.S. inflation-indexed fixed income	4 %	4 %
Emerging markets fixed income	3 %	3 %
Private real estate	5 %	5 %
Public Infrastructure	3 %	3 %
Private Infrastructure	2 %	2 %
Tactical Asset Allocation	5 %	5 %
Commodity index futures	0 %	0 %
Short-term fixed income funds	0 %	0 %
Stabilization Reserve Fund:		
Core fixed income	50 %	50 %
U.S. inflation-indexed fixed income	0 %	0 %
Short-term fixed income funds	50 %	50 %

Investment and asset class risk is monitored, managed and mitigated by continuous oversight of each asset class level and investment manager, regular rebalancing of assets among asset classes, and compliance with the Pension Plans' and PRBP's investments policies and the Board of Executive Directors' Pension Plans and PRBP-related Policies. Investment managers are generally not allowed to invest more than 5% of their respective portfolios in the securities of a single issuer other than the U.S. Government. The use of derivatives by an investment manager for the Pension Plans and PRBP is limited, and subject to specific approval by the Managing Committees of the Pension Plans and PRBP. Investments are generally rebalanced monthly within IPS targets ranges using cash flows and other transactions.

The assets classes in which the Pension Plans (SRP and CSR) and PRBP, invest are described below:

- U.S. equities - For the Pension Plans and PRBP, commingled funds that invest, long-only, in U.S. publicly traded common stocks. Managers of the funds replicate or optimize the all capitalization (cap) Russell 3000 Index. For the SRP and PRBP only, approximately 50% of U.S. equities assets are actively managed in separate accounts holding individual stocks.
- Non-U.S. equities - For the Pension Plans and PRBP, commingled funds that invest, long-only, in non-U.S. develop market publicly traded common stocks. Managers of the funds replicate or optimize the large/mid-cap MSCI WORLD EX-USA Index and/or the large/mid-cap MSCI EAFE Index. For the SRP and PRBP only, approximately 60% of non-U.S. equities assets are actively-managed in separate accounts holding individual stocks.
- Emerging markets equities - For the Pension Plans and PRBP, actively managed commingled funds and/or mutual fund that invest, long-only, in emerging markets publicly traded common stocks.

Inter-American Investment Corporation

Notes to Financial Statements

Managers of the funds select securities, based upon fundamental characteristics, which are generally comprised within the large/mid-cap MSCI Emerging Markets Free Index.

- Public real estate - For the SRP and PRBP only, separate accounts which holds, long-only, publicly traded real estate securities. The accounts are actively-managed based upon fundamental characteristics, investing in securities generally comprised within the MSCI U.S. REIT Index.
- Long duration diversified fixed income - For the SRP and PRBP only, long duration fixed income assets are actively managed in separate accounts holding publicly traded individual bonds generally comprised within the Bloomberg Barclays U.S. Long Government/Credit Bond Index. For the CSRP only, actively managed commingled fund and/or mutual fund that invest, long-only, in publicly traded long duration government and credit securities. Managers of the funds select securities, based upon fundamental characteristics, which are generally comprised within the Bloomberg Barclays U.S. Long Government/Credit Bond Index, as well as opportunistic investments in non-index securities.
- Core fixed income - For the Pension Plans and PRBP, actively managed commingled funds that invest, long-only, in publicly traded intermediate duration government and credit securities. Managers of the funds select securities, based upon fundamental characteristics, which are generally comprised within the Bloomberg Barclays U.S. Aggregate Bond Index, as well as opportunistic investments in non-index securities.
- High yield fixed income - For the SRP only, assets are actively managed in a separate account holding publicly traded individual securities, and for the PRBP only, in an actively managed commingled fund. For both the SRP and PRBP, the investible universe is generally comprised of the securities within the Bloomberg Barclays High Yield 2% Constrained Index, as well as opportunistic investments in publicly traded non-index securities. High yield securities are financial obligations of U.S. companies, rated below investment-grade by at least one of the nationally recognized statistical rating organizations.
- U.S. inflation-indexed fixed income - For the Pension Plans and PRBP, investment in publicly traded individual U.S. Treasury Inflation Protected Securities in accounts managed internally. For the SRP, CSRP and PRBP, replicate or optimize the Bloomberg Barclays U.S. Treasury Inflation Notes 10+ Years Index. For the SRP and PRBP Stabilization Reserve Funds, replicate or optimize the Bloomberg Barclays U.S. Treasury Inflation TIPS 0-5 Years Index.
- Emerging markets fixed income - For the Pension Plans and PRBP, actively managed commingled funds that invest, long-only, in publicly traded emerging markets fixed income. The funds invest in sovereign and sub-sovereign United States dollar- and local-denominated debt. Managers of the funds invest in securities generally comprised within the J.P. Morgan EMBI Global Diversified Index, as well as opportunistic investments in non-index securities.
- Private real estate - For the Pension Plans and PRBP, open-end commingled funds which invest, long-only, in U.S. real estate properties. The funds are actively-managed based upon fundamental characteristics of the properties.
- Public infrastructure - For the CSRP, an enhanced index exchange-traded fund that invests, long-only, in U.S. and developed non-U.S. markets publicly traded common stocks within the infrastructure industries. Managers of the fund selects securities, based upon fundamental characteristics, which are generally comprised within the MSCI World Infrastructure Index. For the SRP and PRBP only, assets are actively managed in a separate account holding publicly traded individual stocks traded in the U.S. and developed non-U.S. markets.
- Private infrastructure - For the SRP and PRBP only, an actively managed , open-end commingled fund which invests, long-only, in U.S. and developed non-U.S. markets private equity within the infrastructure sector.

Inter-American Investment Corporation

Notes to Financial Statements

- Tactical asset allocation - For the SRP and PRBP only, actively managed commingled funds and mutual fund that invest in U.S. and developed markets equities, fixed income, commodities and currencies, investments could shift due to opportunistic behavior within these markets.
- Short-term fixed income funds - Commingled funds that invest, long-only, in publicly traded U.S. Government securities with maturities of less than 18 months. Managers of the funds invest in short-term government securities only, which are benchmarked against the Merrill Lynch 3-month Treasury Bill Index.

Effective December 2015, the IDB Board of Executive Directors (Board) approved and IDB Invest adopted the Long-Term Funding Policy (LTF) for the Pension Plans (SRP and CSRP) and the PRBP that established stable contribution rates of 20% (SRP), 0.71% (CSRP) and 12% (PRBP) of applicable salaries and established the Stabilization Reserve Funds (SRFs) for the SRP and PRBP for IDB Invest and the IDB. The LTF Policy had a five-year initial term. In July 2019, following a review of the LTF Policy components, the Boards of IDB Invest and the IDB adopted an enhanced version of the LTF policy as part of the ongoing financial policies of the IDB. The enhanced version of the LTF policy removes its sunset period, continues to keep the IDB Invest and IDB contribution rates at a stable level, and establishes a rules based mechanism to guide management decision making to allocate IDB Invest and IDB contributions when the SR Funds reaches its limits, as well as when the Pension Plans and PRBP reach their fully funded status. IDB Invest contributions made in excess (deficit) of the actuary's determined contribution rate are allocated (withdrawn) to (from) the SR Funds. The approved IPS SAA for the SR Funds is 50% Short-term fixed income funds and 50% Core fixed income and, for the SRP and PRBP only, a permitted 0% to 10% opportunistic investment in U.S. TIPS. The LTF also provides a rules based mechanism to guide Management decision making to allocated IDB and IDB Invest contributions when the SRFs reaches its limits, as well as when the Pension Plans and PRBP, reach their fully funded status.

The following tables set forth the investments of the Pension Plans and PRBP as of December 31, 2022 and 2021, which are measured at fair value and presented together with their weighted average allocation, by level within the fair value hierarchy (in thousands). As required by the fair value measurements accounting framework, these investments are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. Investments in funds that do not have a readily determinable fair value are measured at NAV as a practical expedient and are not classified within the fair value hierarchy (US\$ thousands).

Investment securities that are measured at fair value based on quoted market prices in active markets, a valuation technique consistent with the market approach, include U.S., non-U.S. infrastructure individual equity holdings, public infrastructure exchange trade funds, fixed income, emerging markets equity and tactical asset allocation mutual funds, U.S. treasury and U.S. inflation-indexed fixed income securities. Such securities are classified within Level 1 of the fair value hierarchy.

Investment securities that are measured at fair value based on quoted market prices for similar assets in active markets, or quoted prices for identical or similar assets in markets that are not active, a valuation technique consistent with the market approach, include corporate, non-U.S. government, high yield and municipal fixed income, and commercial mortgage backed securities. Also included are proprietary investment managers' commingled funds investing in U.S. and global equities, emerging markets fixed income, core and long-duration fixed income funds, and/or short-term fixed income investments. These commingled funds are not publicly traded and are measured at fair value based on the net asset per share, which is determined and published and are the basis for current transactions. Such securities are classified within Level 2 of the fair value hierarchy.

Inter-American Investment Corporation

Notes to Financial Statements

Proprietary investment managers' funds investing in private real estate and tactical asset allocation do not have readily determinable fair values and are measured at the NAV as a practical expedient. Such investments are not classified within the fair value hierarchy.

Contributions

Contributions from IDB Invest to the Pension Plans and the PRBP during 2023 are expected to be approximately \$9.4 million and \$6.5 million, respectively. All contributions are made in cash.

Estimated future benefit payments

The following table summarizes the benefit payments, which reflect expected future service, as appropriate, expected to be paid in each of the next five years and in the aggregate for the subsequent five years. These amounts are based on the same assumptions used to measure the benefit obligation as of December 31, 2022 (US\$ thousands).

	<u>Pension Plans</u>	<u>PRBP</u>
Estimated future benefit payments		
2023	\$ 6,213	\$ 1,761
2024	6,942	1,965
2025	7,627	2,217
2026	8,470	2,491
2027	9,484	2,844
2028-2032	63,313	20,773

15. Subsequent Events

Management has evaluated subsequent events through February 23, 2023, which is the date the financial statements were issued. Management determined that there were no subsequent events that require disclosure under ASC Topic 855, *Subsequent Events*.
