

The project has been pre-classified in category B, in accordance with IDB Invest's Environmental and Social Sustainability Policy because its environmental and social risks can be mitigated via measures that are available and feasible to implement in the context of the operation.

During the process of Environmental and Social Due Diligence (ESDD), IDB Invest will evaluate, among others, the following points: i) agreements for the construction of field hospitals; ii) the environmental license of the private hospital; iii) the HIAE's environmental and social management system; and iv) the management of hospital wastes. The Company will be required to ensure that the Project complies with the requirements of IDB Invest's Sustainability Policy and to close any identified gaps through an action plan.

Due to the travel restrictions imposed by the Corona Virus Pandemic, the ESDD will be based on information received, including pictures, videos and maps.

Based on the information received and reviewed so far the Performance Standards (PS) that the Project is likely to trigger are: i) PS1 Assessment and Management of Environmental and Social Risks and Impacts; ii) PS2 Labor and Working Conditions; iii) PS3 Resource Efficiency and Pollution Prevention; and iv) PS4 Community Health, Safety, and Security. The final determination of the PS triggered by the Project will be done by the end of the ESDD process.

Once the ESDD process is completed, an Environmental and Social Review Summary (ESRS) will be prepared and published on this website.
